

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with 9+ years of full-stack web development expertise, specializing in .NET Core, ASP.NET, C#, MVC, and RESTful API design. Proven track record of delivering scalable, cloud-ready applications with strong emphasis on performance, test coverage, and code quality. Adept at problem-solving, cross-browser compatibility, and leading cross-functional teams. Demonstrated success in containerization, database optimization, and transitioning legacy code to modern architectures.

TECHNICAL SKILLS

- **Languages:** C#, .NET Core, ASP.NET MVC, JavaScript, TypeScript, SQL
- **Frameworks:** .NET 6/5/Core, Entity Framework, LINQ, Web API
- **Frontend:** HTML5, CSS3, Bootstrap, Angular, jQuery
- **Databases:** SQL Server, PostgreSQL, MySQL, SQLite
- **Tools & Platforms:** Git, Docker, Kubernetes, Azure DevOps, GitHub Actions, IIS
- **Concepts:** Object-Oriented Programming, SOLID Principles, RESTful Services, Unit Testing, TDD, CI/CD
- **Other:** Windows Services, Microservices, Azure Functions, Message Queues

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered and maintained scalable .NET Core applications supporting investment tracking and analytics across global clients, enhancing user retention by 22%.
- Developed reusable services using ASP.NET Core Web API and integrated robust role-based access control for financial software tools.
- Migrated legacy services to Dockerized microservices using Azure DevOps pipelines, reducing build & deployment time by 35%.
- Led full-stack development efforts across web modules using C#, SQL Server, Angular, and RESTful APIs ensuring compliance with OWASP security standards.
- Collaborated cross-functionally with product managers and QA engineers to deliver new features under Agile methodology with biweekly sprints.
- Optimized SQL queries and indexes in large datasets to boost report generation time by 42% across multi-tenant applications.

- Implemented CI/CD pipelines with GitHub Actions to ensure consistent deployments and automated test coverage across environments.
- Conducted detailed code reviews, wrote unit tests using xUnit and Moq, and mentored junior developers on clean code practices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Designed data-driven backend services using .NET Core and EF Core ORM to manage high-volume marketing automation workflows.
- Created dynamic REST APIs with ASP.NET MVC and ensured full integration with third-party systems via secure token authentication.
- Designed and deployed containerized services with Docker Compose in staging and production environments to improve scaling.
- Built dashboard and reporting interfaces in Angular communicating with .NET APIs, enabling real-time analytics for campaign performance.
- Refactored core modules for async/await patterns and parallel processing to boost app throughput by over 50% under concurrent load.
- Troubleshoot production defects via logging tools and unit/integration tests, ensuring stable SLA compliance for enterprise clients.
- Maintained GIT branching strategies and versioning across release cycles, minimizing code conflicts and enhancing team velocity.
- Participated in architectural design meetings to recommend improvements for data schema and service partitioning.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered several internal tools using ASP.NET MVC 5 and LINQ to streamline business operations in logistics and inventory.
- Designed normalized schemas for relational databases (PostgreSQL and SQL Server), optimizing data integrity and minimizing redundancy.
- Engineered multi-step forms and server-side validation logic ensuring consistent user input across 3 web portals.
- Deployed services to Windows IIS servers and maintained uptime metrics above 99.95% across all client-facing apps.
- Developed and consumed SOAP and REST APIs for third-party integration with CRM and finance systems.
- Improved performance through lazy loading and caching strategies in web apps serving over 15,000 monthly users.
- Created end-to-end testing automation with Selenium integrated into Jenkins pipelines for critical workflows.
- Maintained project documentation using Swagger, enabling client onboarding and faster developer ramp-up.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to the modernization of outdated WinForms-based internal systems to ASP.NET MVC web solutions.
- Built CRUD-based admin panels with Bootstrap and jQuery connected to secure backend services in .NET.
- Tuned database procedures and indexes for better performance in customer reporting modules.
- Collaborated with QA to perform UAT and regression tests before production deployments.
- Maintained agile sprint boards in JIRA and tracked bugs and enhancements via Confluence.
- Assisted in analyzing technical debt and preparing a plan for incremental refactoring.
- Wrote LINQ-based logic for data filtering, transformation, and presentation in reporting views.
- Integrated error logging and tracking via ELMAH and SQL-based logs for ongoing support.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Developed internal tools in C# and .NET for process automation in HR and finance departments.
- Supported API development and documentation, assisting senior engineers on core system modules.
- Designed basic SQL queries and forms for employee management tools, used by 50+ staff.
- Worked on UI improvements using Bootstrap and JavaScript for improved mobile compatibility.
- Participated in SCRUM ceremonies including daily standups, retrospectives, and sprint reviews.
- Researched emerging .NET technologies and presented findings to internal teams monthly.
- Provided technical support to testers by replicating issues and providing workarounds.
- Created user manuals and technical documentation for internal software tools.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
 - ❖ Microsoft Certified: .NET Fundamentals
 - ❖ Docker for .NET Developers – Pluralsight
 - ❖ Advanced C# Programming – Udemy
 - ❖ Clean Architecture in .NET – LinkedIn Learning
-

PROJECTS

Investment Portfolio Analytics Platform

- Designed and built core backend APIs using .NET Core and EF Core to aggregate investment performance and risk indicators from multiple sources.
- Integrated with third-party financial services via REST and GraphQL APIs, enabling real-time data sync with 99.9% accuracy.
- Deployed microservices to Azure Kubernetes Service (AKS) and managed config via Helm and Azure Key Vault.

Cloud Migration Initiative (Legacy → .NET Core)

- Spearheaded migration of legacy ASP.NET apps to .NET Core microservices hosted on Azure, reducing technical debt by 60%.
- Refactored legacy DAL to adopt EF Core with migration scripts and updated schema to PostgreSQL.
- Ensured zero-downtime deployment using blue-green strategy and containerized rollout.
