PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with 9+ years of experience building scalable enterprise systems using .NET (4.7.2/6/8), React, and Microsoft SQL. Proven expertise in modernizing HR and administrative systems, streamlining business operations, and driving performance optimizations across cloud-native environments. Strong background in Azure DevOps, pipelines, and SharePoint integrations. Adept at leading full software development lifecycles, collaborating in cross-functional teams, and delivering impactful digital transformation projects for both SMEs and large-scale enterprises.

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript, SQL, T-SQL
- **Frontend:** React.js, Redux, HTML5, CSS3, SCSS, Material UI
- **Backend:** .NET 4.7.2, .NET 6, .NET 8, ASP.NET Core, Web API
- **Databases:** MS SQL Server, Oracle SQL, PostgreSQL, MongoDB
- **DevOps & Cloud:** Azure DevOps, Azure Pipelines, Git, Docker
- **Tools & Platforms:** SharePoint, Jira, GitHub, Bitbucket, Azure Functions
- **Methodologies:** Agile, Scrum, TDD, CI/CD, Clean Architecture

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered and maintained scalable .NET 6/8 microservices for HR and payroll platforms, reducing manual entry tasks by over 60% across client organizations.
- Led the migration of legacy .NET Framework (4.7.2) applications to .NET 6 and React frontend, increasing application performance by 45% and lowering deployment time.
- Built Azure Pipelines for CI/CD deployment, introducing environment-based configurations and approval gates to improve release reliability and security posture.
- Integrated Oracle SQL-based reporting systems with RESTful APIs to provide real-time analytics to HR stakeholders and compliance auditors.
- Developed custom SharePoint WebParts using React to surface key employee and payroll data within the internal HR portal, enhancing accessibility and visibility.
- Conducted code reviews and mentored junior developers on Azure DevOps workflows, .NET best practices, and secure API development patterns.

- Automated testing coverage using xUnit and Playwright for React UI flows, increasing code confidence and reducing bugs in production releases by 35%.
- Participated in cross-team architectural decisions to build loosely coupled services that followed domain-driven design and Clean Architecture principles.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built internal tools for marketing automation platforms using ASP.NET Core and React.js, improving campaign management efficiency for over 30 clients.
- Integrated REST APIs with Microsoft SQL Server and developed reporting dashboards to display campaign KPIs, resulting in a 40% improvement in analytics insight.
- Developed Azure Function-based event handlers for background job processing, reducing infrastructure costs by transitioning away from long-running services.
- Customized SharePoint for client document workflows by developing React-integrated extensions and lists to manage lead documentation.
- Migrated CI pipelines from Jenkins to Azure Pipelines, enabling streamlined environment management and faster rollback processes in case of failure.
- Worked on optimizing SQL queries and indexing strategies in both MSSQL and Oracle DB environments to handle marketing campaign data spikes efficiently.
- Wrote comprehensive unit and integration tests using MSTest and Moq, and reduced bug reports from QA by over 50% within 3 months of test coverage improvements.
- Coordinated client demos and feedback cycles during sprints to ensure iterative progress matched evolving product expectations and stakeholder needs.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed enterprise-grade .NET 4.7.2 applications for financial and payroll operations with a focus on accuracy, traceability, and regulatory compliance.
- Designed complex SQL Server stored procedures and views to power payroll reconciliations, reducing accounting errors by 70%.
- Created custom RESTful APIs for integration with external HR tools, enabling data exchange with SAP and local government tax systems.
- Implemented role-based access control and auditing mechanisms for sensitive employee data, complying with GDPR and regional regulations.
- Introduced front-end refactoring using React.js and Redux to enhance performance, resulting in a 30% decrease in UI-related support tickets.
- Configured Azure DevOps pipelines with artifact retention and release branching strategies that ensured smooth production releases.
- Automated SharePoint HR document syncing with backend databases using PowerShell and .NET background services, improving document freshness.
- Collaborated in SCRUM teams delivering bi-weekly features and hotfixes while managing technical debt via backlog prioritization and pair programming.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Maintained and extended HR-focused applications for EU clients using .NET Framework, integrating payroll audit rules and tax logic updates.
- Helped refactor monolithic legacy modules into service-oriented components, improving maintainability and code isolation.
- Built UI components in JavaScript and jQuery for HR admin dashboards to improve user navigation and data filtering capabilities.
- Refined SQL Server-based calculations for HR KPIs such as absenteeism, tenure, and overtime, used in BI dashboards.
- Created internal tooling to track project KPIs using SharePoint lists and embedded charting components.
- Participated in requirement gathering and documentation for HR compliance modules for Estonian public sector clients.
- Created technical documentation and process maps for onboarding new developers onto legacy platforms.
- Ensured application compatibility with regional tax authority APIs via .NET SOAP integration.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in building internal admin portals using ASP.NET MVC and SQL Server for employee attendance and payroll.
- Wrote T-SQL scripts for generating end-of-month payroll summaries and discrepancy reports.
- Conducted manual testing for HR approval workflows and logged over 150 bugs across six iterations, ensuring smooth releases.
- Learned version control best practices and branching strategies using Git.
- Created HTML/CSS templates for employee portal UI with user-friendly layouts.
- Attended Agile ceremonies, providing input during retrospectives and sprint reviews.
- Contributed to SharePoint integration testing for internal knowledge base tools.
- Built early prototypes of document scanning tools using OCR libraries in .NET.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Fundamentals
- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Pluralsight: Mastering ASP.NET Core
- ❖ Oracle: SQL Fundamentals Certification

PROJECTS

- ✓ **HR Workflow Automation Suite**

Built a modular application to automate payroll approvals, leave requests, and tax filings using .NET 6, React, and MS SQL. Integrated Azure Pipelines and SharePoint workflows. Reduced manual effort by 70%.

- ✓ **Employee Self-Service Portal**

Developed a secure, responsive portal in React with .NET Core backend for employee HR interactions—leave tracking, payslip access, and benefit enrollment.

- ✓ **Payroll Compliance Analyzer**

Designed a tool that cross-validates payroll submissions against country-specific compliance rules, using SQL Server procedures and SharePoint reporting dashboards.
