

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Full Stack Developer with 10+ years of professional experience architecting and delivering scalable enterprise applications across healthcare, fintech, and SaaS industries. Expert in **C# .NET Core (7/8), React.js, REST APIs, SQL/NoSQL, and cloud platforms (AWS, Azure, GCP)**. Proven track record in designing microservices, implementing DevOps practices, and building secure, performant, and resilient systems. Adept at collaborating in cross-functional teams, leading projects from concept to deployment, and aligning business requirements with technical capabilities.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET Core 7/8, ASP.NET Core, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Node.js, Python, PHP
- **Cloud Platforms:** Microsoft Azure, AWS, Google Cloud Platform (GCP)
- **Databases:** SQL Server, MySQL, PostgreSQL, Oracle, MongoDB, Redis, Elasticsearch (SQL + NoSQL expertise)
- **DevOps & Tools:** Azure DevOps, Git, Docker, Kubernetes, Kafka, Terraform, Jenkins, CI/CD pipelines
- **Architectures & Practices:** Microservices, RESTful APIs, SOA, Event-driven design, Scalable SaaS solutions, Agile & Scrum
- **Security & Compliance:** Authentication, Authorization, Data Protection, Vulnerability Assessment, OWASP best practices

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and developed distributed microservices with **C# .NET Core 7/8 and React.js**, enabling enterprise healthcare clients to process sensitive drug rebate data securely at scale.
- Implemented **REST APIs and service-oriented architectures** handling millions of daily transactions with optimized latency, supporting compliance with healthcare data regulations.
- Built CI/CD pipelines with **Azure DevOps, Docker, and Kubernetes**, reducing deployment cycles from days to hours while improving release reliability.
- Integrated **Kafka-based event-driven architecture** to improve data consistency and responsiveness across pricing, access, and rebate modules.
- Optimized SQL Server and MongoDB queries for high-traffic workloads, reducing data retrieval times by 45% and ensuring seamless reporting for pharmaceutical clients.

- Developed and maintained frontend React.js applications with advanced state management and responsive UI, significantly improving usability for healthcare analysts.
- Implemented advanced security controls including **OAuth2, role-based access, and data encryption**, strengthening compliance with GDPR and HIPAA.
- Collaborated with international teams across engineering, product, and QA to deliver enterprise SaaS solutions, aligning business goals with technical execution.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed and maintained **.NET Core backend services and React.js frontends**, supporting digital marketing automation platforms used by multinational clients.
- Implemented scalable APIs with **service-oriented architectures**, integrating campaign analytics across MySQL, SQL Server, and Elasticsearch systems.
- Built **real-time reporting dashboards** with React.js and Elasticsearch queries, giving marketing teams actionable insights with near-zero latency.
- Automated infrastructure deployments with **Docker and Azure DevOps**, reducing environment setup time and eliminating configuration drift across dev/stage/prod.
- Enhanced system resilience by integrating **Kafka streaming pipelines**, ensuring high throughput and reliable message delivery for marketing data.
- Collaborated on security enhancements, introducing stricter **authentication and authorization mechanisms**, reducing exposure to common OWASP threats.
- Conducted code reviews, ensuring adherence to clean coding standards and scalable system designs that supported ongoing feature growth.
- Partnered with product teams to translate business objectives into technical specifications, ensuring alignment between functionality and ROI.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed enterprise solutions with **C# .NET Core and Angular/React frontends**, enhancing data-driven applications in construction and logistics sectors.
- Built and optimized complex SQL queries, stored procedures, and database models across **SQL Server and Oracle**, improving performance of mission-critical systems.
- Contributed to microservices migration strategy, decomposing monolithic systems into independent services deployed with Docker.
- Implemented **real-time monitoring dashboards** using React.js and REST APIs, giving business stakeholders access to live operational data.
- Optimized performance of backend services through query tuning and caching strategies, improving response times by over 50%.
- Collaborated with UX designers to enhance application usability, applying responsive design principles to support mobile and desktop clients.
- Improved CI/CD pipelines, introducing automated integration and unit testing, significantly reducing regression issues during releases.
- Engaged directly with clients, gathering requirements and ensuring systems delivered measurable improvements in efficiency and productivity.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed and deployed **.NET-based backend services** for digital platforms, focusing on REST API integrations.
- Designed **SQL Server stored procedures** and optimized database performance for high-volume applications.
- Assisted in the migration of legacy services to **.NET Core microservices**, improving maintainability and scalability.
- Integrated third-party APIs and messaging systems to extend product functionality.
- Contributed to **unit testing and secure coding standards**, ensuring compliance with client and industry regulations.
- Collaborated with UI developers to ensure seamless data exchange between backend and frontend layers.
- Maintained **Git repositories using Git Flow**, participating in peer code reviews and continuous improvement processes.
- Actively supported Agile sprints with daily standups and sprint reviews to ensure timely feature delivery.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in developing **.NET Framework applications** and database-driven solutions under senior mentorship.
- Wrote **SQL queries, triggers, and stored procedures** to support application workflows.
- Gained practical experience in **REST API integrations** and backend service development.
- Supported **QA processes by writing automated test scripts** and fixing bugs during iterative releases.
- Learned best practices for **Git version control, Agile processes, and CI/CD pipelines**.
- Provided maintenance and support for production systems while troubleshooting runtime issues.
- Documented application flows and prepared internal guides to support knowledge sharing across the team.
- Enhanced understanding of **cloud and DevOps concepts**, contributing to initial Docker adoption projects.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Microsoft Certified: **Azure Developer Associate**
- AWS Certified **Solutions Architect – Associate**

- Google Cloud Certified **Professional Cloud Developer**
 - Microsoft Certified: **Security, Compliance, and Identity Fundamentals**
-

PROJECTS

- **Healthcare Pricing & Rebate Management Platform:** Designed scalable .NET Core + React microservices integrated with SQL Server and Kafka for real-time rebate processing used by insurers and pharma clients.
- **Global Digital Marketing Automation Suite:** Built backend APIs and real-time dashboards with .NET Core, React, and Elasticsearch, processing millions of marketing events daily.
- **Logistics Workflow Optimization System:** Migrated monolithic system into microservices, implementing Dockerized deployments and automated pipelines on Azure DevOps.
- **E-commerce Platform Modernization:** Integrated payment gateways and redesigned frontends using React.js, improving transaction success rate and customer engagement.
