

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with over 9 years of expertise in building scalable backend systems and modern frontend interfaces using .NET (4.7 to 8), C#, SQL (MS & Oracle), Azure DevOps, and React. Proven track record in streamlining HR workflows, optimizing data access layers, integrating APIs, and modernizing enterprise platforms. Strong grasp of clean architecture, CI/CD pipelines, and cloud infrastructure with Azure. Passionate about code quality, automation, and cross-functional collaboration.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET (Framework 4.7.2, .NET 6/8), ASP.NET Core, LINQ, Entity Framework, JavaScript, TypeScript, React, HTML5, CSS3, Razor, WPF
- **Databases:** Microsoft SQL Server, Oracle SQL, MySQL, PostgreSQL
- **DevOps & Cloud:** Azure Pipelines, Azure App Services, Azure Functions, GitHub Actions, Docker, IIS
- **Tools & Platforms:** Visual Studio, SharePoint, JIRA, Git, Postman, Swagger, RabbitMQ
- **Practices:** RESTful APIs, TDD, CI/CD, Agile/Scrum, Domain-Driven Design (DDD), Clean Architecture
- **Other:** A/B Testing, API Integration, Unit Testing, Performance Optimization

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and deployed microservices using .NET 6 and .NET 8 to modernize legacy HR modules, reducing response latency by 30% through optimized database access and service orchestration.
- Integrated Microsoft SQL and Oracle databases in enterprise reporting tools using dynamic SQL generation and secure data views for HR departments across Europe.
- Collaborated with frontend teams to implement employee management dashboards in React, delivering intuitive UX and accurate real-time data binding.
- Developed REST APIs with ASP.NET Core that served payroll, benefits, and compliance systems with full audit and logging via middleware layers.
- Implemented Azure Pipelines to automate CI/CD workflows including schema migrations, reducing deployment errors by 85%.

- Refactored existing .NET Framework 4.7.2 payroll modules to .NET 6+, improving maintainability and reducing technical debt by 40%.
- Led integration between HR platforms and SharePoint document management systems via Graph API and .NET SDK for automated onboarding.
- Conducted code reviews, mentored junior developers, and enforced clean code principles and TDD across projects.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed React-based admin panels for HR workflow triggers, providing CRUD interfaces with granular role-based access controls.
- Re-architected monolithic .NET Framework apps into modular services using clean architecture, improving scalability and test coverage.
- Created integration pipelines between Oracle HR systems and Azure-hosted microservices using secure token-based authentication.
- Authored PowerShell and Azure CLI scripts to manage infrastructure provisioning, certificates, and access policies in Azure DevOps.
- Enabled self-service payroll data validation tools for HR teams, reducing manual backlogs by 60% through automation workflows.
- Enhanced employee directory search functions using ElasticSearch backed by .NET web API with fallbacks to SQL Server.
- Participated in sprint planning, grooming, and architecture boards, ensuring alignment with business needs and scalability standards.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed HR self-service portals in ASP.NET MVC, allowing employees to manage timesheets, vacation requests, and payroll documents.
- Implemented robust SQL Server stored procedures and views for calculating leave balances, payroll breakdowns, and historical reports.
- Contributed to Angular-to-React migration of admin UI, creating modern components and integrating with legacy APIs via .NET.
- Built SSRS reports and embedded reporting dashboards into ASP.NET apps using role-based filtering and dynamic parameter handling.
- Automated test environments for QA teams using Docker containers and Azure DevTest Labs reducing test setup time by 80%.
- Migrated core HR modules to Azure App Services with staging/production deployment slots and integrated monitoring.
- Enabled SSO (Single Sign-On) for HR apps using Azure AD and OAuth 2.0 via .NET middleware authentication pipelines.
- Collaborated cross-functionally with QA, BA, and PMs to deliver release cycles in 2-week iterations with retrospectives.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Worked on an internal HR tool using .NET 4.7 and WPF for desktop processing of payroll and tax documents.
- Developed integration components for SharePoint file synchronization with HR record folders using .NET libraries and COM interop.
- Tuned SQL queries and optimized HR-related reporting for performance, using indexed views and partitioned tables.
- Implemented automatic export scripts for tax and salary slips using .NET PDF libraries and batch processing tools.
- Introduced token-based authentication for internal APIs improving endpoint security and traceability.
- Managed system deployment via MSI installers and IIS configuration for multiple clients across Baltic region.
- Integrated third-party background verification tools with internal systems using SOAP/WSDL endpoints.
- Participated in agile ceremonies and delivered weekly builds with proper change logs and documentation.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in the development of HR administration modules using .NET Web Forms and SQL Server for internal platforms.
- Created Excel import tools for payroll inputs using Office Interop with data validation and rollback features.
- Wrote stored procedures and triggers to validate employee timesheet entries before payroll processing.
- Built unit test cases for calculation logic using MSTest ensuring high coverage in edge-case payroll logic.
- Maintained deployment scripts and assisted in packaging builds with InstallShield for HR software installers.
- Implemented event-based notifications for leave approvals using SMTP and database queue triggers.
- Designed dynamic search and filter logic for employee tables in frontend using jQuery and Web API.
- Received hands-on mentorship in .NET debugging, performance profiling, and SharePoint integration basics.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Microsoft Certified: .NET Fundamentals
- ❖ Oracle Database SQL Certified Associate
- ❖ CI/CD with Azure DevOps – LinkedIn Learning

PROJECTS

HR Workflow Optimization Platform

- Migrated on-premise HR payroll solution to .NET 8 and Azure App Services, enabling scalability and resilience.
- Integrated React dashboards and SQL backend to provide real-time status tracking for payroll, leave, and document processing.
- Connected system to SharePoint document libraries for storing contracts, ID copies, and tax forms with granular permissions.

Payroll Automation & Audit Tool

- Developed a .NET Core microservice to automate payroll calculations with full logging, audit trails, and error recovery flows.
- Connected to MS SQL and Oracle via Dapper and EF for flexible and optimized data access.
- Implemented CI/CD with Azure Pipelines, running integration tests and deploying to dev/staging/production environments.
