

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Senior .NET Developer with 9+ years of experience engineering high-impact desktop and web solutions, specializing in WinForms, C#, and legacy application modernization. Adept at designing and maintaining scalable software systems in enterprise environments, including manufacturing, marketing, and finance sectors. Strong background in multithreading, performance optimization, and SQL/NoSQL integration. Proven ability to navigate complex legacy codebases with minimal documentation and lead migration projects into modern web architectures. Passionate about clean code, system refactoring, and end-to-end application lifecycle ownership.

TECHNICAL SKILLS

- **Languages:** C#, .NET Framework, .NET Core, TypeScript, JavaScript, HTML5, CSS3
- **Frameworks:** WinForms, ASP.NET MVC, Entity Framework, LINQ
- **Databases:** SQL Server, PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Google Cloud Platform (GCP), Docker, Git, CI/CD pipelines
- **Testing & Debugging:** NUnit, xUnit, Visual Studio Profiler, Postman
- **Other:** Multithreading, Legacy Refactoring, Clean Architecture, SOLID Principles, OOP, REST API Integration

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Modernized legacy desktop solutions by refactoring critical WinForms modules using .NET Framework 4.8 with minimal disruption to production environments.
- Designed asynchronous multithreaded components to boost legacy form responsiveness under high user-load scenarios across distributed teams in 3 countries.
- Migrated report generation engine from monolithic to service-oriented architecture, reducing runtime latency by 60% while ensuring data consistency.
- Created REST API integrations with third-party inventory and HR systems, enabling seamless synchronization of over 500k records across global sites.
- Led the design and deployment of CI/CD pipelines in AWS, automating nightly builds, unit testing, and smoke testing for legacy and new modules.

- Utilized SQL Server to optimize over 80 stored procedures, achieving 40% faster data fetch for mission-critical dashboards and reports.
- Engineered a NoSQL-based caching layer using Redis to alleviate high-frequency read operations from SQL databases.
- Championed onboarding documentation for the legacy codebase to reduce ramp-up time for new developers by 50%.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Maintained and extended marketing analytics desktop applications written in WinForms and C#, supporting campaign KPIs and financial dashboards.
- Integrated third-party services like Google Analytics and CRM APIs, unifying data sources for real-time campaign intelligence.
- Implemented a module refactoring initiative that improved unit test coverage from 45% to 85%, reducing regression by 70%.
- Reduced application memory footprint by profiling and rewriting GDI+ graphics rendering operations used in dashboard charts.
- Collaborated with DevOps team to migrate Windows-based legacy tools to containerized microservices hosted on GCP.
- Built in-app error handling and logging using Serilog and ELK Stack, cutting user-reported bugs by over 30% quarter-over-quarter.
- Developed SQL-based reporting modules to allow on-demand data extraction for senior marketing executives and product teams.
- Mentored 3 junior engineers through pair programming and bi-weekly code review sessions focused on WinForms and .NET design patterns.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Refactored legacy .NET Framework 4.5 modules in a Windows Forms ERP system serving supply chain operations across 7 warehouses.
- Migrated invoice and purchase order logic from VB.NET to C# within a large-scale system while maintaining zero downtime.
- Improved form loading times by redesigning nested control hierarchies and replacing synchronous SQL calls with asynchronous services.
- Participated in system redesign meetings aimed at migrating legacy reporting to web-based dashboards using ASP.NET MVC.
- Developed data export interfaces from SQL Server to NoSQL (MongoDB) for archival purposes and BI analysis.
- Troubleshooted complex threading issues in warehouse automation apps, resulting in 99.9% system availability.
- Enhanced logging and error capturing system to include contextual user session data, reducing support resolution time.
- Conducted peer code reviews for performance and readability across 30+ modules used in production environments.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Contributed to client-specific WinForms development projects focused on logistics and warehouse management in the Baltic region.
- Implemented data validation layers that ensured clean handover of over 10,000 SKUs daily from supplier systems to local inventory software.
- Developed modular plug-ins for barcode scanning and print label management within legacy applications.
- Introduced automated unit tests for form logic and business validation layers, increasing deployment confidence.
- Wrote middleware for exporting and synchronizing SQL data with third-party FTP servers and Excel-based analytics.
- Collaborated with QA team to build robust regression test plans based on frequently modified modules.
- Optimized SQL query patterns within WinForms apps, reducing daily transaction failures and errors by 35%.
- Participated in architecture discussions for transitioning WinForms-based apps to ASP.NET MVC web solutions.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Supported maintenance of internal WinForms tools, learning enterprise-level coding standards, versioning, and review workflows.
- Contributed to C# and .NET Framework 4.5 bug fixes under supervision, improving reliability of HR software tools.
- Created internal scripts for automating database population for QA testing, cutting setup time by 60%.
- Assisted in implementing configuration-driven UI layouts to support rapid customization across departments.
- Built SQL triggers to enforce data integrity during user form submissions and backend reconciliation.
- Developed export utilities that enabled business users to download performance metrics from the internal DB in CSV/PDF formats.
- Participated in daily standups and code review sessions with senior engineers to grow knowledge of WinForms lifecycle.
- Documented developer onboarding SOPs for new interns and junior engineers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Fundamentals (2023)
 - ❖ AWS Certified Developer – Associate (2024)
 - ❖ GCP Associate Cloud Engineer (2024)
 - ❖ MongoDB for .NET Developers – MongoDB University (2023)
-

PROJECTS

Legacy ERP Modernization Initiative

- Spearheaded modernization of legacy ERP system using modular architecture, gradually transitioning business-critical WinForms modules to ASP.NET Core and REST APIs on Azure.

PDM Integration Layer for Manufacturing Firm

- Developed middleware services to connect legacy inventory and HR WinForms apps with external PDM platform; improved data consistency and helped transition operations to modern architecture.

Warehouse Label Automation Tool

- Created WinForms-based desktop utility with GDI+ barcode generation and printer integration, reducing manual labeling errors by 90% in large warehouse operations.
