PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of hands-on experience in designing and building scalable web applications using Microsoft and open-source technologies. Adept in developing microservices-based backend systems in .NET Core with C#, and crafting responsive frontends using Angular, HTML, CSS, and JavaScript. Strong expertise in Azure cloud services, CI/CD pipelines with Azure DevOps, and database management using SQL Server, Cosmos DB, and NoSQL. Proven record of delivering complex solutions as an individual contributor while collaborating in Agile teams.

TECHNICAL SKILLS

- **Backend:** .NET Core, C#, RESTful APIs, Microservices, ASP.NET
- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap
- **Cloud:** Microsoft Azure (App Services, Functions, Cosmos DB, Key Vault, Blob Storage), Azure DevOps, AWS (basic exposure)
- **Database:** SQL Server, Cosmos DB, MongoDB, Firebase Realtime DB
- **DevOps & Tools:** Azure Pipelines (CI/CD), Git, Docker, Postman, Swagger, Jenkins, JIRA
- **Testing:** xUnit, Moq, Jasmine, Karma, Playwright
- **Others:** Agile/Scrum, REST, MVC, Entity Framework, LINQ

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed and deployed microservice-based solutions in .NET Core hosted on Azure App Services, utilizing Cosmos DB for distributed storage and performance scaling.
- Delivered RESTful APIs for cross-platform integrations with robust exception handling, versioning, and JWT-based authentication.
- Designed and implemented Angular 14+ modules for enterprise-grade single-page applications, ensuring full responsiveness and accessibility compliance.
- Led migration of legacy .NET Framework apps to .NET Core microservices architecture, improving maintainability and system resilience.
- Integrated CI/CD pipelines via Azure DevOps for automated testing, staging, and production deployments, reducing manual release errors by 95%.

- Constructed data pipelines using Azure Functions to sync operational data from third-party vendors into Cosmos DB and SQL Server.
- Participated in daily Agile ceremonies, code reviews, and sprint planning, contributing significantly to team velocity and code quality.
- Mentored junior developers in Angular, C#, and cloud-first design principles, leading to reduced onboarding times and improved code practices.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed full-stack CRM features using Angular and .NET Core APIs, integrating them with SQL Server for transactional operations.
- Built Azure Pipelines for deploying containerized services to Kubernetes clusters, streamlining release cycles across dev/test/prod environments.
- Implemented role-based access control and JWT-based security across services to comply with GDPR and client compliance requirements.
- Introduced logging and monitoring with Azure Application Insights to track system health and user flows, reducing incident detection time by 40%.
- Developed reusable UI components using Angular Material, following accessibility and performance best practices.
- Conducted integration testing and load testing with Postman and Azure Load Testing, improving system throughput under load.
- Supported infrastructure as code with ARM templates and Terraform for cloud resource provisioning.
- Collaborated with cross-functional teams to build interactive marketing dashboards using Angular, boosting data visibility for campaigns.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed and maintained several customer-facing portals using Angular and ASP.NET Core, interfaced with NoSQL and relational databases.
- Refactored monolithic .NET codebases into domain-specific microservices, facilitating better scalability and feature isolation.
- Led the implementation of authentication flows using Azure AD B2C and OAuth 2.0 for secure user sign-on experiences.
- Maintained Cosmos DB integrations to manage hierarchical and distributed data sets for enterprise reporting modules.
- Created and documented Swagger-based API specs for frontend consumption and third-party integrations.
- Integrated Azure Key Vault to secure sensitive configuration and API keys across environments.
- Spearheaded the creation of automated unit and integration tests with xUnit and Moq, reaching over 90% code coverage in core modules.
- Provided production support and root cause analysis, implementing proactive monitoring and self-healing scripts.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed AngularJS web modules tied to ASP.NET MVC APIs for real-time booking and scheduling platforms.
- Built dashboard analytics using Chart.js and SQL aggregation views, driving actionable insights for end-users.
- Assisted in deploying applications to Azure Web Apps with staged rollout strategies.
- Conducted cross-browser and mobile compatibility testing to ensure responsiveness across devices.
- Wrote detailed technical documentation and user guides to support new client onboarding.
- Integrated REST APIs with third-party payment providers and messaging platforms.
- Participated in weekly planning meetings and demo sessions with stakeholders to ensure project alignment.
- Delivered several front-end optimization patches that cut average page load times by 40%.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in the development of .NET Web APIs to support internal tooling applications.
- Built responsive UI screens using Bootstrap and vanilla JavaScript, following mobile-first design.
- Participated in schema design and stored procedures for SQL Server-backed services.
- Deployed CI/CD automation scripts for test and build management using Git hooks and custom scripts.
- Contributed to the refactoring of legacy VB.NET applications into modular C# libraries.
- Created internal monitoring dashboards to visualize app logs and performance metrics.
- Implemented basic cloud storage integrations using Azure Blob for media handling.
- Wrote technical blog posts to document internal processes and learning experiences.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Microsoft Certified: DevOps Engineer Expert
- ❖ Angular - The Complete Guide (Udemy)
- ❖ Cosmos DB for Developers (Pluralsight)

PROJECTS

- ✓ **Enterprise Sales Dashboard:** Full-stack application with Angular, .NET Core, and SQL Server; integrated CI/CD on Azure DevOps with role-based dashboards.
- ✓ **IoT Asset Tracker:** Microservices system on Azure Functions and Cosmos DB for real-time tracking of logistics data.
- ✓ **Marketing Campaign Portal:** Angular SPA with C# APIs and MongoDB, deployed via Azure Pipelines with Playwright end-to-end testing.
- ✓ **Customer Identity Platform:** Authentication and authorization solution using Azure AD B2C and Angular for a financial services client.
