

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with **10+ years of experience in backend and full-stack development**, specializing in **.NET (Framework, Core, 8.0), microservices, REST APIs, SQL Server, Elasticsearch, Redis, and Kubernetes**. Proven track record in building scalable, secure, and high-performance distributed systems for international, multi-cultural teams. Hands-on expertise with **CI/CD pipelines, OAuth authentication, Azure DevOps, and cloud solutions (AWS, GCP, Azure)**. Adept in Agile/SCRUM environments, code reviews, and mentoring engineers to maintain best practices, performance, and secure coding standards.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET 8.0, .NET Core, ASP.NET, Python, Java, TypeScript, JavaScript
- **Backend & APIs:** Microservices, REST APIs, GraphQL, gRPC, OAuth 2.0, ADFS
- **Databases:** SQL Server (stored procedures, indexing, performance tuning), PostgreSQL, MySQL, Elasticsearch, Redis, Neo4j (Graph DB), MongoDB
- **Cloud & DevOps:** Azure DevOps, Git (git flow), CI/CD pipelines, Docker, Kubernetes, Helm, AWS, GCP, Azure
- **Messaging & Event Systems:** ActiveMQ, RabbitMQ, Kafka, Event-driven architecture
- **Testing & Monitoring:** Moq, NUnit, xUnit, Jest, Postman, Swagger, OpenTelemetry, Kibana dashboards
- **Other Tools:** Terraform, Jenkins, SonarQube, Jira, Confluence, Agile/SCRUM

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and developed scalable **.NET 8.0 microservices** integrated with SQL Server, Elasticsearch, and Redis, ensuring reliable data flows across distributed systems.
- Built and optimized **REST APIs** supporting high-throughput environments, incorporating **OAuth-based authentication mechanisms with ADFS integration** for secure user access.
- Implemented **Kubernetes Helm charts** for deployment and automated Azure DevOps pipelines, streamlining delivery cycles across multiple international teams.
- Created advanced **SQL Server stored procedures** and indexing strategies, significantly improving database query response times for large-scale enterprise applications.
- Developed **ActiveMQ-based messaging solutions** to support asynchronous data processing, ensuring resilience and scalability of core backend systems.

- Enhanced **logging, tracing, and observability** by integrating OpenTelemetry and building **Kibana dashboards**, enabling faster troubleshooting and performance monitoring.
- Conducted **code reviews via pull requests**, enforced secure coding practices, and mentored junior engineers on .NET best practices and microservices patterns.
- Collaborated in **Agile/SCRUM ceremonies** across multicultural teams, ensuring backlog prioritization, sprint planning, and iterative delivery of production-ready features.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed and maintained **.NET Core backend systems** with SQL Server and Redis integration, delivering highly available services for enterprise clients.
- Built and deployed **Dockerized applications** in Kubernetes clusters, ensuring scalable deployments and smooth environment consistency across staging and production.
- Developed **unit and integration test frameworks using Moq and NUnit**, improving code quality and test coverage across core modules.
- Managed **OAuth 2.0 flows** for secure API authentication, enabling compliance with industry-standard security practices.
- Created **Swagger-based API documentation** to streamline integration for frontend and third-party developers.
- Implemented **CI/CD pipelines in Azure DevOps**, ensuring automated builds, test executions, and environment deployments.
- Optimized **Elasticsearch queries and indices**, enabling real-time analytics and log-based monitoring for mission-critical applications.
- Collaborated with business stakeholders to refine requirements and deliver scalable backend solutions under Agile practices.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered full-stack solutions with **.NET Framework and .NET Core**, integrated with relational and non-relational databases including **SQL Server, PostgreSQL, and MongoDB**.
- Created **reusable backend components** and microservices that reduced redundancy across multiple enterprise projects.
- Enhanced application **performance by tuning SQL stored procedures and designing efficient relational schemas**.
- Implemented **Redis caching strategies**, reducing API response times and improving scalability for high-traffic endpoints.
- Contributed to **DevOps adoption**, building initial CI/CD pipelines and containerizing legacy .NET applications with Docker.
- Conducted **integration testing of distributed services**, validating resilience under high load and complex data exchanges.
- Built **custom logging mechanisms** and integrated with Elasticsearch for centralized monitoring and reporting.
- Participated in **international Agile teams**, collaborating with product managers, QA engineers, and designers to deliver iterative releases.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed and deployed **.NET-based backend services** for digital platforms, focusing on REST API integrations.
- Designed **SQL Server stored procedures** and optimized database performance for high-volume applications.
- Assisted in the migration of legacy services to **.NET Core microservices**, improving maintainability and scalability.
- Integrated third-party APIs and messaging systems to extend product functionality.
- Contributed to **unit testing and secure coding standards**, ensuring compliance with client and industry regulations.
- Collaborated with UI developers to ensure seamless data exchange between backend and frontend layers.
- Maintained **Git repositories using Git Flow**, participating in peer code reviews and continuous improvement processes.
- Actively supported Agile sprints with daily standups and sprint reviews to ensure timely feature delivery.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in developing **.NET Framework applications** and database-driven solutions under senior mentorship.
- Wrote **SQL queries, triggers, and stored procedures** to support application workflows.
- Gained practical experience in **REST API integrations** and backend service development.
- Supported **QA processes by writing automated test scripts** and fixing bugs during iterative releases.
- Learned best practices for **Git version control, Agile processes, and CI/CD pipelines**.
- Provided maintenance and support for production systems while troubleshooting runtime issues.
- Documented application flows and prepared internal guides to support knowledge sharing across the team.
- Enhanced understanding of **cloud and DevOps concepts**, contributing to initial Docker adoption projects.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Microsoft Certified: **Azure Solutions Architect Expert**
- Microsoft Certified: **Azure Developer Associate**

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Developer
 - Certified Kubernetes Administrator (CKA)
-

PROJECTS

- **Distributed Microservices Platform** – Designed scalable .NET 8.0 microservices integrated with SQL Server, Redis, and Elasticsearch, deployed via Kubernetes and Azure DevOps.
- **Secure Authentication Gateway** – Built OAuth 2.0 and ADFS-based authentication service integrated into REST APIs, enhancing compliance with security standards.
- **Data Warehousing Pipeline** – Developed ETL pipelines with SQL Server and Elasticsearch for real-time analytics and monitoring with Kibana dashboards.
- **Cloud Migration Initiative** – Migrated legacy .NET Framework systems to containerized .NET Core microservices on Azure and AWS, improving scalability and cost efficiency.
