

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Highly experienced .NET engineer with over a decade of hands-on development expertise in web and desktop applications, cloud integration, complex billing systems, API architecture, and enterprise-grade software solutions. Demonstrated mastery of the full SDLC, TDD, and advanced OOP practices, with a track record of delivering robust, scalable platforms in diverse, multicultural, and fully remote environments. Proven leadership in developing secure, high-performance services with modern .NET frameworks and cutting-edge technologies like Web API, SQL Server, and Git.

TECHNICAL SKILLS

- **Languages:** C#, .NET 6/7, VB.NET, JavaScript, TypeScript, SQL
- **Frameworks:** ASP.NET MVC, ASP.NET Core, Web API, Entity Framework, NUnit, xUnit
- **Frontend:** HTML5, CSS3, AJAX, Angular, Razor, jQuery
- **Databases:** MS SQL Server (2014–2019), PostgreSQL, MongoDB, SQLite
- **Tools:** Git, Azure DevOps, TFS, Jira, Confluence, Fiddler, Postman
- **Architectures:** Microservices, Layered Architecture, Event-Driven, RESTful APIs
- **Other:** Active Directory, TDD, OOP, Design Patterns, UML, CI/CD, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered a robust invoice processing and billing engine using ASP.NET Core and SQL Server, delivering monthly invoices for 200K+ active users with 99.9% uptime.
- Designed secure APIs for third-party integrations using Web API and token-based auth; decreased API response time by 45% through optimized middleware and logging strategy.
- Collaborated across multiple cultures in a fully distributed Agile team to implement business-critical logic using layered architecture and reusable service components.
- Developed internal tools for reconciliation and payment analysis, automating 85% of previously manual processes and reducing errors in payment processing workflows.
- Led TDD implementation using NUnit and Moq across all microservices, raising code coverage to 92% and substantially improving maintainability and regression safety.
- Built and maintained automated CI/CD pipelines using Azure DevOps, reducing deployment time from 40 minutes to 5 minutes with zero manual steps.

- Conducted in-depth code reviews and design walkthroughs, identifying architectural anti-patterns and promoting best practices in OOP and separation of concerns.
- Authored and maintained detailed API and architectural documentation using Confluence and UML diagrams for team onboarding and cross-team clarity.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built and scaled customer billing modules and campaign analytics tools using .NET Framework, Entity Framework, and MS SQL 2016 to support enterprise marketing flows.
- Implemented complex stored procedures and triggers for data validation and report generation; optimized large-scale joins reducing query execution time by 60%.
- Used GitFlow branching strategy with pull request pipelines, ensuring code quality through automated static analysis and review checklists.
- Delivered responsive web interfaces using ASP.NET MVC and integrated JavaScript and AJAX components for dynamic report dashboards and user engagement insights.
- Maintained integration with external payment providers and ensured end-to-end traceability and transaction consistency via retry strategies and rollback logic.
- Built user identity modules using Active Directory Federation Services (ADFS) and claims-based authentication for enterprise single sign-on.
- Delivered training workshops on secure .NET coding practices, educating junior developers on preventing SQL injection, CSRF, and improper error handling.
- Spearheaded a performance tuning initiative by profiling memory usage and garbage collection behavior, cutting memory footprint by 30% across services.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered custom web and desktop software in C# and VB.NET for SME clients in logistics and HR, including leave tracking, invoicing, and payroll systems.
- Created internal admin dashboards using ASP.NET Web Forms and AJAX for real-time client data management, improving administrative productivity.
- Refactored monolithic codebases to adopt domain-driven design principles, enhancing modularity and testing ease across large legacy systems.
- Developed real-time notifications and event logging system using SignalR, enhancing user experience and system observability.
- Authored comprehensive test suites using xUnit and integrated them into Jenkins CI pipelines for automated nightly builds and regression tests.
- Collaborated with UI/UX teams to implement consistent design components using Razor views and jQuery, aligning with WCAG accessibility standards.
- Conducted technical interviews and onboarded new engineers, creating standardized starter projects and documentation packs.
- Configured and monitored SQL Server Agent jobs for data imports, exports, and archival processes, ensuring SLA compliance and performance efficiency.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Participated in designing and developing a catalog management system using .NET and Web API for a European e-commerce retailer.
- Integrated APIs with external inventory providers, ensuring data consistency and robust error handling across RESTful endpoints.
- Improved system security by enforcing OAuth2 authentication and implementing rate-limiting middleware for third-party consumers.
- Utilized Git for version control and introduced peer-review workflows, reducing production defects and increasing team collaboration.
- Designed data visualization components using ASP.NET MVC, D3.js, and Chart.js for interactive revenue reporting dashboards.
- Refactored legacy stored procedures to use table-valued parameters and window functions, optimizing execution times for large datasets.
- Implemented CI/CD using TeamCity and MSBuild, reducing manual deployment errors and enabling faster QA iteration cycles.
- Maintained documentation in Markdown and UML for all new endpoints, ensuring compliance with internal API versioning policy.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in developing core modules for a desktop invoicing application using Windows Forms and ADO.NET with SQL Server 2014 backend.
- Built prototypes of billing logic for handling tax scenarios across multiple regions, influencing production feature sets.
- Wrote integration scripts to synchronize data between CRM systems and internal accounting tools, reducing manual work by 70%.
- Fixed bugs in data entry forms and contributed to UI redesigns based on user feedback sessions conducted with local stakeholders.
- Authored utility functions for data export to CSV, Excel, and PDF using third-party libraries like iTextSharp and EPPlus.
- Participated in daily Scrum meetings and documented sprint deliverables in Jira and Excel trackers for academic credit.
- Designed and executed SQL unit tests for stored procedures, uncovering logic issues and recommending fixes in stored data workflows.
- Built internal Wiki pages for the onboarding of future interns with visual guides and system setup documentation.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
 - ❖ Microsoft Certified: .NET Fundamentals
 - ❖ Udemy: Mastering ASP.NET MVC and Entity Framework
 - ❖ Pluralsight: Designing RESTful APIs with ASP.NET Core
-

PROJECTS

- ✓ **Global Billing Engine (Sensidev)**
Designed and deployed a robust multi-tenant billing platform handling 10M+ transactions per month using .NET Core, MS SQL, and Angular for dashboards.
- ✓ **Campaign Automation & Analytics (Syscom Digital)**
Delivered a web-based campaign management tool with real-time analytics, billing reports, and CRM integrations using ASP.NET MVC and SQL Server 2016.
- ✓ **E-Commerce Catalog & Inventory API (Decima Digital)**
Built APIs integrating supplier inventories and pricing models with advanced caching and RESTful versioning to serve large-scale traffic reliably.
