PROFESSIONAL SUMMARY

Accomplished Senior Software Developer with over 9 years of international experience designing and developing scalable enterprise web applications, with deep expertise in Adobe Experience Manager (AEM), Java, OSGi, and Apache Sling. Proven ability to lead AEM-based digital transformation projects and deliver high-performance solutions across on-premise and cloud environments. Adept at crafting RESTful APIs, ensuring security compliance, and mentoring teams in agile environments. Passionate about clean code, performance optimization, and continuous improvement in development practices.

TECHNICAL SKILLS

- **Adobe Experience Manager (AEM):** AEM as a Cloud Service, AEM Sites, AEM Assets, Dispatcher, CRXDE Lite, JCR, Apache Sling, OSGi
- **Backend:** Java 8–17, Spring Boot, RESTful APIs, Maven, Gradle, OSGi Bundles
- **Frontend:** HTML5, CSS3, JavaScript (ES6+), jQuery, React
- **DevOps/Cloud:** AWS, Azure, AEM Cloud Manager, Docker, Jenkins, GitLab CI/CD
- **Tools:** Git, JIRA, Confluence, Bitbucket, IntelliJ IDEA, Postman, SonarQube
- **Testing:** JUnit, Mockito, Cypress, Selenium, Adobe AEM Testing Framework
- **Agile Practices:** Scrum, Kanban, Pair Programming, TDD, Code Review, Holacracy

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the implementation of AEM Sites projects for large-scale clients, leveraging Apache Sling and OSGi to build reusable components and workflows across multiple content channels.
- Designed and deployed cloud-native AEM solutions using Adobe as a Cloud Service, improving scalability and reducing deployment overhead by 40%.
- Refactored legacy Java modules into modular OSGi bundles, enabling dynamic service discovery and reducing technical debt.
- Developed and secured RESTful services integrated with AEM, ensuring GDPR compliance and OWASP top 10 vulnerability mitigation.
- Collaborated in cross-functional teams to implement continuous deployment pipelines for AEM projects using GitLab CI/CD and Cloud Manager.

- Mentored junior developers on best practices in AEM component development, Sling Models, and servlet optimization techniques.
- Conducted code reviews and unit testing across backend and frontend modules, ensuring maintainability and 90%+ code coverage.
- Documented internal AEM architectural guidelines and patterns for cloud deployments and version upgrades.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered custom AEM components for marketing automation systems, enabling content editors to manage campaigns without engineering involvement.
- Implemented dynamic content targeting in AEM using ContextHub and Adobe Target integration, increasing campaign engagement by 35%.
- Developed author-friendly dialogs and templates using Touch UI and Granite UI for better content management usability.
- Configured AEM Dispatcher rules for cache invalidation and improved content delivery speed across global CDNs.
- Integrated analytics tracking into AEM pages using Adobe Launch, improving insight on customer behavior and digital KPIs.
- Participated in sprint planning and backlog grooming sessions, actively contributing to technical feasibility discussions.
- Developed frontend modules using JavaScript and CSS pre-processors, aligning with AEM component architecture.
- Maintained version control and branching strategies using Git and Bitbucket across distributed teams in EMEA.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Contributed to the development of Java-based CMS solutions for mid-sized clients transitioning to digital platforms.
- Wrote performant backend APIs using Spring Boot, interfacing with AEM and custom-built content repositories.
- Configured Maven archetypes for rapid project initialization aligned with company standards and AEM deployment structures.
- Designed page templates using HTL (Sightly) and custom Sling Models, resulting in more maintainable and testable code.
- Developed integration with third-party REST APIs including CRMs and marketing tools, handling auth and rate limiting.
- Optimized application performance using AEM caching strategies and JVM profiling tools.
- Coordinated with UX designers to align page responsiveness and component hierarchy with WCAG accessibility standards.
- Managed DevOps tasks such as Jenkins builds and Dockerized local environments for team consistency.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Assisted in migrating static enterprise portals to dynamic AEM instances with localization support and structured content hierarchy.
- Developed reusable AEM templates and client libraries to streamline project consistency and performance.
- Participated in Agile ceremonies and cross-functional reviews with distributed development teams and QA analysts.
- Debugged and resolved servlet response issues and dispatcher caching conflicts, minimizing downtime for business-critical pages.
- Created documentation for component usage and authoring workflows to improve onboarding of non-technical staff.
- Implemented multilingual support for custom AEM components based on i18n and language masters.
- Collaborated closely with QA to define test scenarios and automate regression test suites.
- Supported production releases and patches with quick turnaround fixes and rollback strategies.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed internal CMS features using Java and JSP, later migrated to Adobe AEM to enhance editorial flexibility.
- Conducted proof-of-concept experiments for transitioning to AEM 6.x from legacy content frameworks.
- Created unit and integration tests for AEM services and servlet-based endpoints, achieving early testing culture adoption.
- Learned fundamentals of Apache Sling and OSGi through active development and code review sessions.
- Assisted senior engineers in component migration and structured content modeling.
- Built admin-facing tools for monitoring content updates and author workflow tasks.
- Explored Adobe documentation and forums to resolve sandbox configuration issues and dispatcher setup errors.
- Supported deployment activities and environment provisioning for development and staging servers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Adobe Certified Expert – Adobe Experience Manager Sites Developer
- ❖ AWS Certified Developer – Associate
- ❖ Java SE 11 Developer Certification – Oracle
- ❖ Certified Scrum Developer (CSD)

PROJECTS

Global Retail CMS Migration

- Led migration of a legacy e-commerce CMS to AEM Sites with full integration of commerce APIs, user personalization, and multilingual content.
- Ensured minimal disruption and 99.99% availability during go-live phase using blue-green deployment strategy.

AEM Cloud Readiness Toolkit

- Built internal toolkit to assess and migrate customer AEM codebases to Adobe's Cloud Service.
- Toolkit flagged deprecated APIs and offered module-by-module upgrade paths, saving 100+ engineering hours.

Omnichannel Campaign Platform

- Architected and implemented content delivery APIs in AEM serving native mobile and kiosk applications.
- Enhanced reusability and versioning of assets with automated tagging and metadata extraction.
