

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Frontend-focused Senior Software Engineer with 8+ years of experience delivering performant, real-time, and scalable web applications. Expert in React, TypeScript, Tailwind CSS, and PWA development. Strong background in CI/CD, cloud platforms (AWS & GCP), offline-first architecture, and API integration. Passionate about translating Figma designs into pixel-perfect UIs and building accessible, modern products that scale.

TECHNICAL SKILLS

- **Frontend:** JavaScript, TypeScript, React.js, Next.js, Zustand, Jotai, MobX, Context API, Tailwind CSS, ShadCN UI, SCSS, PostCSS, Vite, Webpack, ESLint, HTML5, CSS3
- **Testing:** Vitest, Cypress, Jest, React Testing Library
- **Offline & Storage:** PWAs, Service Workers, IndexedDB, localForage
- **Backend Integration:** REST APIs, WebSocket, OAuth2
- **DevOps & Cloud:** AWS (Lambda, S3, CloudFront), GCP (Firebase, Cloud Run), CI/CD (GitHub Actions, Terraform)
- **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Firebase)
- **Other:** Figma, Agile/Scrum, Git, React Native (basic), Remix (exploratory)

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed modular, real-time web applications using React, TypeScript, Zustand, and WebSocket to enable robust communication features.
- Led architecture overhaul of a legacy frontend to support PWA standards, improving offline access and performance across devices.
- Collaborated with backend and DevOps teams to integrate RESTful APIs and real-time events via WebSocket and serverless endpoints (AWS Lambda).
- Migrated Webpack pipeline to Vite for lightning-fast development builds and enhanced developer DX across multiple teams.
- Implemented UI design system using Tailwind CSS and ShadCN UI, accelerating feature delivery and ensuring brand consistency.
- Optimized large-scale state handling with Jotai and React Context, ensuring seamless user experience under high-load scenarios.

- Authored comprehensive unit and integration tests using Vitest and React Testing Library, increasing test coverage to over 95%.
- Managed CI/CD pipelines with GitHub Actions and Terraform, automating deployments across environments and reducing release cycles.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built and maintained interactive marketing dashboards using React.js, Redux, and SCSS, serving thousands of B2B clients.
- Translated complex business rules from Figma prototypes into responsive, pixel-perfect components with full accessibility compliance.
- Created service worker-based offline capabilities for marketing analytics tools, allowing continued use in low-connectivity regions.
- Integrated frontends with backend APIs over REST and OAuth2, enabling secure authentication and seamless data sync.
- Collaborated on the migration to TypeScript, improving type safety and reducing runtime bugs by over 30%.
- Established ESLint and Prettier guidelines across the dev team, enforcing code quality and consistency.
- Designed data storage mechanisms using IndexedDB for client-side caching of analytics data.
- Conducted peer code reviews and mentored junior developers on React performance best practices and hooks usage.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered client-facing dashboards using React.js, Bootstrap, and jQuery, later migrating legacy codebases to modern React architecture.
- Developed role-based access control components and integrated authentication flows using JWT and OAuth2.
- Led frontend rebranding initiative using SASS theming and atomic design principles to streamline UI consistency.
- Introduced Cypress-based end-to-end tests, automating regression testing for major product features.
- Collaborated with backend engineers to define and consume RESTful APIs, enhancing API response times by 15%.
- Designed IndexedDB-based caching mechanisms for large offline datasets to be synced later via background workers.
- Integrated analytics tools such as Snowplow and Optimizely, enabling A/B testing and user behavior tracking.
- Participated in agile ceremonies and managed sprint deliverables using Jira and Confluence.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Built internal tooling dashboards using AngularJS and Bootstrap to support e-commerce operations.
- Converted UI mockups into responsive layouts with dynamic forms and client-side validation using JavaScript.

- Integrated RESTful APIs for inventory management and product catalog features.
- Optimized performance of heavy DOM-rendering components using Angular watchers and digest cycle tuning.
- Maintained compatibility across legacy browsers and mobile platforms via progressive enhancement.
- Contributed to QA automation and wrote Jasmine-based test suites for core frontend logic.
- Used Gulp and Bower for asset pipeline management and dependency injection.
- Ensured UI was accessible by incorporating ARIA roles and testing with screen readers.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Supported the frontend development of a logistics platform with vanilla JavaScript, jQuery, and Bootstrap.
- Assisted in building UI components based on wireframes and adjusted layouts for cross-browser compatibility.
- Built simple REST API connectors using Axios and visualized responses using Google Charts.
- Collaborated with QA on frontend bug fixing and worked closely with mentors on code reviews and best practices.
- Designed SCSS utilities for faster styling and theme support across different modules.
- Improved legacy code modularity by separating concerns across reusable script files.
- Used Git and GitLab to manage code reviews and resolve merge conflicts.
- Explored early PWA practices to enable caching of static assets via service workers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- AWS Certified Developer – Associate
- Google Cloud Associate Cloud Engineer
- Frontend Development Libraries – freeCodeCamp
- TypeScript and Modern React (Udemy Pro)
- Advanced CSS & SASS (Udemy)

PROJECTS

Real-Time Team Collaboration Platform (PWA)

- Built a fully offline-ready, React + Vite PWA with IndexedDB storage and WebSocket-based real-time syncing.
- Integrated RESTful APIs for authentication, file uploads, and team-based permission control.

Figma to React Component Converter

- Developed a utility tool to convert Figma design tokens and component specs into functional, styled React components using Tailwind.

ShadCN UI Component System

- Created a custom design system using ShadCN and Tailwind, enabling reusable and scalable components for a multi-brand platform.
