

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Versatile Senior Software Developer with 8+ years of professional experience specializing in Angular, TypeScript, and responsive web applications. Proven ability to lead development and optimization of scalable front-end architectures and cross-platform mobile solutions. Demonstrated adaptability in learning and implementing Ionic framework and mobile-first best practices, including RESTful API integration, responsive UI, and client-server communication. Passionate about clean code, mobile deployment workflows, and building seamless experiences across Android and iOS platforms.

TECHNICAL SKILLS

- **Frontend:** Angular, Ionic, TypeScript, HTML5, SCSS, CSS3, JavaScript, Capacitor, Cordova
- **Mobile:** Hybrid Mobile Apps, Android/iOS, Responsive UI, PWA, Mobile Deployment
- **Backend:** Node.js, Express, Firebase, RESTful APIs
- **Tools & DevOps:** Git, GitHub, Docker, Postman, CI/CD, Agile, JIRA
- **Testing:** Jasmine, Karma, Protractor
- **Nice to have:** Swift (basic), Kotlin (basic), Figma integration, Capacitor Plugins

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led development of Angular-based enterprise solutions, focusing on modular architecture and scalable state management for mobile-ready applications.
- Collaborated closely with UI/UX designers to ensure pixel-perfect, responsive designs adaptable across Android and iOS platforms.
- Integrated RESTful APIs and implemented robust client-server communication layers using RxJS and HTTP Interceptors.
- Spearheaded Ionic adoption for cross-platform mobile development, optimizing performance and leveraging Capacitor for native device integration.
- Enhanced mobile responsiveness and adaptive layouts using SCSS mixins, viewport calculations, and device-specific breakpoints.
- Delivered end-to-end mobile application prototypes using Angular + Ionic, including build, test, and deploy phases to emulator and physical devices.
- Coordinated app store submission process and managed release cycles for internal mobile projects targeting both Android and iOS.
- Advocated for Angular best practices including lazy loading, standalone components, and strict type safety with TypeScript.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Developed B2C and B2B Angular applications focused on responsive design and performance across mobile devices.
- Created reusable UI components and shared modules to support a unified design system and mobile consistency.
- Transitioned legacy web codebases into modern Angular 10+ applications with mobile-first priorities.
- Wrote unit and E2E tests using Jasmine, Karma, and Protractor to ensure app stability on mobile web views.
- Participated in building hybrid mobile apps using Cordova and evaluated migration strategy toward Capacitor.
- Interfaced with RESTful services and implemented efficient data handling through async observables and pagination logic.
- Ensured accessibility and responsiveness through rigorous QA on multiple screen sizes and devices.
- Maintained clean Git workflows and performed peer reviews, enforcing mobile-first design considerations.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Worked on Angular 2+ applications targeting both web and mobile use cases using hybrid design strategies.
- Built TypeScript-based reusable services and providers to manage state and API communication across screens.
- Designed responsive SCSS architecture ensuring consistency on mobile browsers and PWA-compliant devices.
- Collaborated with mobile QA to address touch gesture issues, viewport scaling, and Cordova plugin errors.
- Created dynamic dashboards and form systems integrated with REST APIs and offline storage support for mobile.
- Tuned Angular applications for runtime performance on mid-range Android devices using lazy modules and tree-shaking.
- Assisted in Capacitor plugin integration for geolocation, camera, and file access within hybrid apps.
- Mentored junior developers in TypeScript and Angular ecosystem, with emphasis on mobile-first design patterns.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Delivered AngularJS web applications with custom UI elements optimized for mobile responsiveness.
- Converted desktop-only layouts to mobile-compatible interfaces using Bootstrap and media queries.
- Participated in REST API integration and cross-origin request handling for mobile web app clients.
- Resolved complex layout bugs affecting touch interactions on hybrid mobile browsers.
- Coordinated with backend team to ensure mobile payload optimization and caching strategies.

- Conducted early research on hybrid frameworks including Ionic and React Native.
- Contributed to internal tools used in QA testing and visual debugging of mobile breakpoints.
- Optimized font rendering and image scaling issues across Android WebView and Safari Mobile.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted in development of single-page applications using AngularJS and jQuery for mobile web.
- Created custom CSS styles to support mobile layouts and emulate native app behavior.
- Supported Ionic v1 migration project by documenting plugins and device testing workflows.
- Worked with JSON-based REST APIs and developed loaders, feedback states, and error messages for mobile users.
- Explored app wrapping and Cordova-based deployment pipelines for Android.
- Identified key user behavior differences between mobile and desktop via analytics integration.
- Helped implement SCSS theme customization for mobile branding and responsiveness.
- Shadowed senior developers during app store submission and provisioning process.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Ionic Developer Certification** – Ionic Academy, 2023
- ❖ **Mobile Web Specialist** – Google Developers Certification, 2022
- ❖ **Responsive Web Design** – freeCodeCamp, 2021

PROJECTS

- ✓ **CrossPlatNav** — *Ionic + Angular Navigation App*
A location-based hybrid mobile app using Angular and Ionic with Capacitor. Developed features such as route plotting, GPS-based suggestions, and offline maps. Implemented native device access for geolocation and camera using Capacitor plugins. Successfully deployed to Google Play beta testing.
- ✓ **AgileBoard Mobile** — *Mobile Kanban Task Manager*
Built a lightweight mobile Kanban task manager app using Angular, Ionic, and Firebase. Integrated real-time sync and offline persistence, designed for responsiveness across Android/iOS using SCSS and flexible grids.
