

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and impact-driven Senior Frontend Engineer with 9+ years of experience in building performant, scalable, and user-centric web applications. Adept in Angular, TypeScript, and modern JavaScript frameworks. Passionate about crafting immersive user experiences, optimizing frontend performance, and collaborating across cross-functional teams. Proven success in building high-traffic e-commerce platforms and data-driven UIs with a product-first mindset. Dedicated to maintaining clean, accessible codebases and pushing the boundaries of interactive web experiences.

TECHNICAL SKILLS

- **Frontend:** Angular, React, Next.js, Tailwind CSS, Redux, jQuery, HTML5, CSS3, Storybook
- **Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Testing:** Jest, React Testing Library, Pytest, TDD, Unit & Integration Testing
- **DevOps:** GitHub Actions, Docker, CI/CD Pipelines, Vercel, Nginx
- **Tooling:** Git, Postman, Figma, Zeplin, JIRA, Confluence
- **Backend:** FastAPI, Flask, Django (basic), Node.js (used in personal projects)
- **Databases:** PostgreSQL, MySQL, MongoDB, Elasticsearch
- **Cloud & Deployment:** Vercel, Heroku, DigitalOcean, GitHub Pages
- **Other:** A/B Testing, SSR, Micro Frontends, Odoo ERP (advanced customization)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led migration of React-based SPA to Angular 14 for an enterprise ERP interface, improving modularity, SSR performance, and accessibility compliance across all modules.
- Implemented reusable Angular components with strict type-checking and custom directives for complex form interactions and table visualizations.
- Worked closely with designers and PMs to deliver feature-rich, mobile-responsive UIs, enhancing user satisfaction scores by 25% based on feedback sessions.
- Spearheaded A/B experiments using GTM integrations and internal analytics, enabling data-informed improvements in CTA placement and onboarding flow.
- Refactored existing state logic using Angular Services and Observables, reducing memory leaks and improving rendering efficiency in dynamic dashboards.

- Established frontend coding standards, including ESLint rules and Storybook-driven UI development, to ensure consistency and ease of testing across the team.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed marketing and analytics dashboards using Angular and RESTful APIs, providing real-time visualizations for campaign data across client portfolios.
- Built interactive components with Angular's reactive forms and custom pipes for CRM segmentation tools used by marketing operators.
- Enhanced frontend observability by integrating analytics events, enabling product managers to trace user behavior across funnels and drop-offs.
- Migrated legacy jQuery frontend to Angular, reducing bundle size by 40% and unifying the app's styling through a shared SCSS framework.
- Collaborated on implementing a CI/CD pipeline with automated UI tests for Angular builds, improving release confidence and reducing bugs in production.
- Maintained and expanded reusable component libraries, including pagination, dropdowns, and data grids, to ensure design consistency.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Built single-page applications using AngularJS for HR and finance modules integrated with internal Odoo ERP logic and PostgreSQL.
- Refactored and modularized frontend templates to adopt Angular component structure, improving performance and testability.
- Contributed to front-to-back integration using RESTful APIs and templating logic for real-time employee data visualizations.
- Standardized project codebase with SCSS mixins, custom theming, and utility-first UI components for scalability and branding.
- Created dynamic dashboards and charts using Angular and third-party libraries (e.g., Chart.js), enabling real-time reporting on team performance.
- Mentored junior frontend developers, conducted code reviews, and led documentation efforts to improve onboarding speed.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Rewrote multiple ERP-related dashboards in Angular, replacing outdated jQuery logic and improving maintainability and user flow.
- Participated in frontend QA testing with Storybook components and user testing feedback loops for micro frontend elements.
- Contributed to building deployment pipelines for Angular apps within Dockerized staging environments.
- Resolved long-standing rendering bugs and asynchronous UI update issues through lifecycle hook optimizations in Angular components.

- Enhanced frontend validation with custom Angular validators, ensuring strict business logic enforcement before form submission.
- Led UI translation for multilingual Angular components used by international clients, leveraging Angular i18n APIs.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Built proof-of-concept Angular interfaces and internal dashboards for ERP system prototypes.
- Assisted with UI/UX polish tasks such as dropdown accessibility, tab indexing, and hover/focus states.
- Developed frontend performance benchmarks to test component render speeds, impacting UI rework for marketing interfaces.
- Created documentation and component usage guides for Angular elements being integrated into wider ERP platform.
- Prototyped animations and transitions using Angular's built-in animation APIs to enhance interactivity.
- Shadowed senior developers in architectural reviews, absorbing Angular best practices from early stage.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Angular - The Complete Guide (Udemy)
- ❖ Python for Data Science (Coursera)
- ❖ Docker for Developers (Udemy)
- ❖ Odoo Technical Training (OdooClass)

PROJECTS

- ✓ **A/B Component Framework**
Angular-based UI framework to support experimentation across call-to-action, layout positioning, and copy for e-commerce landing pages.
- ✓ **SSR Optimized Dashboard**
Angular + Node app with server-side rendering for dynamic reports, ensuring SEO, accessibility, and blazing fast first paint metrics.
- ✓ **Micro Frontend Integration**
Decomposed a monolithic frontend into Angular-based micro apps that communicate over event bus and shared services.
