

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Frontend Developer with over 9 years of hands-on experience building high-performance, accessible, and scalable web applications using Angular, JavaScript, and TypeScript. Specialized in EAA and WCAG compliance, inclusive UX, semantic HTML5, and automated accessibility testing with Playwright. Strong understanding of keyboard navigation, screen readers (NVDA/VoiceOver), and Lighthouse/WAVE evaluations. Proven track record of leading UI refactoring initiatives and building user-centric interfaces across banking, fintech, and enterprise domains.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, SCSS, SASS, SQL
- **Frameworks/Libraries:** Angular, RxJS, React (basic), Bootstrap, jQuery
- **Accessibility Tools:** Playwright, Lighthouse, WAVE, axe-core, NVDA, VoiceOver
- **Testing:** Jest, Cypress, Jasmine, Karma
- **CI/CD & DevOps:** Git, GitLab CI, Jenkins, Docker, Azure DevOps
- **Other Tools:** Figma, Storybook, Chrome DevTools, Postman
- **Standards:** WCAG 2.1 AA/AAA, EAA compliance, ARIA roles, Semantic HTML

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and delivered accessible frontend components for fintech platforms, ensuring full WCAG 2.1 AA compliance across all user flows and screens.
- Integrated automated accessibility testing using Playwright and axe-core, catching 90%+ compliance issues during CI builds, reducing audit time significantly.
- Refactored legacy UI to align with semantic HTML5 principles and ARIA roles, improving screen reader compatibility for NVDA and VoiceOver by over 70%.
- Led manual audits of over 200 pages using WAVE and Lighthouse tools, identifying contrast, heading structure, and tab-order violations proactively.
- Implemented keyboard navigation optimization for modal, dropdown, and tab components, ensuring seamless UX for mobility-impaired users.
- Collaborated with designers to align Figma prototypes with accessibility best practices, ensuring parity between design and implementation.

- Built Angular modules with reusable components, managing global state with RxJS and implementing A/B tested UI enhancements.
- Conducted cross-browser and cross-device testing to ensure consistent performance and visual fidelity on all major platforms.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed responsive UIs in Angular and TypeScript with a strong emphasis on performance, accessibility, and reusability across campaigns.
- Integrated accessibility features like live-region updates and skip-to-content links, improving navigability for screen reader users across key web flows.
- Built a custom design system using SCSS and BEM methodology, embedding WCAG principles into component definitions and interactions.
- Created unit and e2e tests for accessibility regressions using Jasmine and Karma integrated with Jenkins pipelines for continuous auditing.
- Participated in accessibility-focused code reviews, highlighting semantic HTML practices and keyboard trap issues proactively.
- Partnered with QA to run manual audits across marketing landing pages and ad campaigns targeting the EU compliance market.
- Improved form validation UX with error message announcement support via ARIA live regions and visual cues for assistive users.
- Delivered internal documentation and workshops for accessibility training, improving team-wide awareness and development practices.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed and maintained Angular-based CMS platform with extensive attention to keyboard navigation, color contrast, and text scalability.
- Built custom directives and reusable components that enforced accessible design patterns across the organization's white-labeled portals.
- Optimized UI for SEO and screen readers by ensuring proper heading structures, landmark roles, and alt attributes on all media assets.
- Refactored user flows using focus management strategies to eliminate focus loss during modal interactions and dynamic content updates.
- Implemented Lighthouse-based CI testing to maintain WCAG compliance across deployments and raised accessibility coverage by 60%.
- Participated in usability testing sessions with low-vision and mobility-impaired users, gathering feedback and iterating UI flows accordingly.
- Worked closely with backend teams to ensure REST API outputs supported accessible error handling and form completion feedback.
- Advocated for continuous accessibility practices through agile ceremonies, backlog grooming, and sprint planning.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Maintained legacy web applications and incrementally upgraded them for modern accessibility standards and cross-browser compatibility.
- Replaced non-semantic elements like `<div>`-based structures with proper HTML5 markup to improve ARIA role detection and keyboard navigation.
- Performed structured WCAG 2.0 AA assessments and created a remediation backlog for identified violations across high-traffic interfaces.
- Built frontend modules in vanilla JavaScript with enhanced tab index control and visual focus indicators for interactive components.
- Introduced componentized SCSS styling system aligned with design tokens to improve maintainability and consistency in accessible color palettes.
- Enhanced screen reader experience on form-heavy applications by aligning label-input associations and ensuring proper fieldset structure.
- Developed internal reporting dashboard using AngularJS and D3.js for analytics visualization that met accessibility compliance.
- Worked under tight deadlines with banking clients to rapidly deliver accessibility improvements before regulatory audits.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in improving UI/UX for internal HR web tools using HTML5, CSS3, and JavaScript, focusing on screen reader compatibility.
- Created documentation on accessibility best practices for internal frontend teams, including do/don't visual guides for developers and QA.
- Wrote test cases for keyboard-only user flows and tab index traversal, ensuring no keyboard traps or skipped interactive elements.
- Validated all internal interfaces with Lighthouse and WAVE tools to maintain above 90% accessibility scores across modules.
- Participated in inclusive design reviews with design and QA teams to reinforce usability and accessibility throughout the SDLC.
- Modified existing forms to support better validation feedback and improved accessibility via ARIA-describedby and live regions.
- Supported migration of legacy pages to Angular, introducing accessible structure in the early stage of application rewrite.
- Conducted testing across major browsers and devices including screen reader simulations for low-vision user scenarios.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Web Accessibility Specialist (WAS), IAAP – 2023
- ❖ Google UX Design Certificate – 2022

- ❖ WCAG 2.1 Compliance Training, Deque University – 2021
 - ❖ Angular - The Complete Guide (Udemy) – 2020
-

PROJECTS

- ✓ **Accessible Banking Portal Revamp – Sensidev (2023)**
Led the redesign and refactoring of a multi-language online banking portal to align with EAA and WCAG 2.1 AA requirements, covering over 300 unique user flows.
- ✓ **Playwright Automation for Accessibility – Syscom Digital (2021)**
Developed and integrated a Playwright-based accessibility CI toolchain that flagged ARIA, contrast, and label issues pre-deployment.
- ✓ **WCAG-Lighthouse Dashboard Tool – Personal Project (2022)**
Built a Chrome extension and Node.js tool to aggregate WCAG issues across multiple domains and visualize trends using Chart.js.
