

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Software Developer with over 9 years of professional experience delivering scalable, maintainable, and secure web applications. Strong expertise in Angular, Node.js, TypeScript, RxJS, and cloud-native architecture with a proven track record in Agile and SCRUM environments. Adept at working in distributed international teams, contributing to enterprise-level projects, and mentoring junior developers while continuously adopting modern technologies and best practices.

TECHNICAL SKILLS

- **Frontend:** Angular, React, RxJS, HTML5, CSS3, SASS, Bootstrap, Tailwind
- **Backend:** Node.js, Express.js, REST APIs, Java, Jakarta EE (basic), WildFly (basic)
- **Languages:** JavaScript, TypeScript, Java, SQL
- **Tools:** Azure DevOps, Git, Docker, Postman, ESLint, Prettier, Jenkins
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Testing:** Jasmine, Karma, Jest, Cypress, Mocha
- **Practices:** Agile/SCRUM, TDD, CI/CD, Clean Code, SOLID principles
- **Cloud & DevOps:** Azure (Pipelines, Boards), GitHub Actions, containerization with Docker

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and developed modular Angular applications with enterprise-grade architecture, achieving significant performance gains and maintainability.
- Led a micro-frontend migration initiative, breaking a monolith Angular application into reusable independent modules.
- Created and maintained custom RxJS operators to streamline complex data flows in real-time dashboards and reduce redundancy.
- Integrated RESTful and GraphQL APIs using Node.js backend, reducing frontend latency by 40% through optimized endpoint design.
- Built and deployed end-to-end CI/CD pipelines on Azure DevOps, ensuring zero-downtime deployments and faster release cycles.
- Conducted Angular code audits and enforced consistent usage of reactive patterns, resulting in a 30% drop in runtime bugs.
- Mentored junior developers on Angular best practices, observables, and unit testing, accelerating onboarding time by 25%.

- Spearheaded implementation of accessibility (WCAG 2.1) and localization in Angular, enabling adoption by wider user base.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed dynamic, responsive web applications using Angular, TypeScript, and SCSS while collaborating with cross-functional teams.
- Built reusable components for a marketing analytics platform used by Fortune 500 clients, reducing future dev effort by 40%.
- Integrated third-party APIs for real-time data visualization with RxJS, achieving fluid UX and improved KPI tracking accuracy.
- Implemented automated testing using Jasmine and Karma to achieve 90%+ code coverage across all modules.
- Optimized existing Angular app by applying lazy loading and change detection strategies, cutting load time by 35%.
- Participated in SCRUM ceremonies, estimation sessions, and sprint reviews using Azure DevOps to maintain agile velocity.
- Refactored legacy JavaScript to modern TypeScript structures, increasing maintainability and reducing runtime issues.
- Collaborated with designers and QA to create pixel-perfect UIs adhering to strict client branding guidelines.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered full-stack features using Angular and Node.js across multiple business domains including HR, Fintech, and Retail.
- Created Angular services and interceptors for centralized API interaction, error handling, and token management.
- Built backend logic using Express.js and integrated with MongoDB and MySQL based on the domain-specific needs.
- Designed role-based access control systems and JWT-based authentication mechanisms to secure SaaS apps.
- Collaborated with DevOps team to containerize Node.js services using Docker for staging and production environments.
- Ensured smooth frontend-to-backend communication by maintaining OpenAPI (Swagger) specifications and mock servers.
- Participated in continuous delivery cycles and contributed to branching strategy discussions across agile squads.
- Reviewed PRs and enforced semantic versioning and commit standards across the engineering team.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to AngularJS single-page applications for internal tooling used by logistics clients across the Baltics.

- Migrated internal CMS frontend from jQuery to AngularJS, improving scalability and developer efficiency.
- Developed form-heavy UI workflows with advanced validation rules and reactive forms.
- Integrated RESTful services and handled edge case validations on the frontend to reduce back-and-forth user input errors.
- Collaborated in daily standups and sprints with remote teams spread across Estonia, Romania, and Germany.
- Improved legacy build process by introducing Gulp.js tasks for bundling, SASS compilation, and linting.
- Wrote documentation for Angular modules and shared components library for internal developer onboarding.
- Added keyboard navigation and screen reader support to boost accessibility and UX for vision-impaired users.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted with frontend development of internal dashboards using AngularJS and Bootstrap under mentorship.
- Built reusable UI components to visualize sensor data and trigger alerts in real-time using sockets.
- Implemented REST API integration and helped debug asynchronous flows during heavy data refreshes.
- Gained hands-on experience in debugging, writing test cases, and optimizing Angular digest cycles.
- Participated in bug triage meetings and helped automate frontend regression testing using Protractor.
- Supported build tasks and environment setup using Grunt and npm scripts during deployment cycles.
- Documented frontend module interfaces and designed low-fidelity mockups for proposed UI improvements.
- Learned industry practices in Git branching, merge conflict resolution, and sprint-based delivery.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate
 - Angular - The Complete Guide (Udemy)
 - Node.js Microservices (Pluralsight)
 - TypeScript Masterclass (Udemy)
-

PROJECTS

- **Enterprise Budget Planner:** Designed and implemented Angular-based dynamic spreadsheet UI with real-time cell formula support; backend built with Node.js and MongoDB.
- **Cloud KPI Dashboard:** Developed Angular front-end for a customizable metrics dashboard with drag-and-drop widgets and RxJS streams; integrated via GraphQL API.
- **DevOps Monitoring App:** Full-stack app using Angular, Node.js, and PostgreSQL deployed on Azure; supported alert triggers and team notifications via Teams & Slack.
