

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Versatile Full Stack Developer with 10+ years of hands-on experience in full-cycle web application development, emphasizing frontend excellence using Angular, Node.js, and Java-based backends. Adept at building scalable, modular architectures and crafting interactive user experiences. Proven ability to optimize productivity using generative AI tools like GitHub Copilot and ChatGPT. Extensive knowledge of Agile delivery, DevOps, and cloud-based deployment. Known for translating complex requirements into efficient, elegant code.

TECHNICAL SKILLS

- **Frontend:** Angular, React, Next.js, HTML, CSS, JavaScript, Tailwind, Redux, Storybook
- **Backend:** Node.js, Java (JEE, Spring Boot, Hibernate), FastAPI, Flask
- **AI Tools:** GitHub Copilot, ChatGPT, Claude, Gemini (daily use for code generation, refactoring, and testing)
- **DevOps & CI/CD:** Docker, GitHub Actions, Bamboo, Linux Shell
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud:** AWS (EC2, S3, CloudWatch), DigitalOcean, Heroku, Vercel
- **Other Tools:** JIRA, Confluence, Postman, Figma, Zeplin
- **Testing:** Jest, React Testing Library, Pytest, TDD

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and maintained Angular components and services with dynamic data binding, supporting responsive dashboards in ERP products for logistics and HR.
- Integrated Node.js middle layers to facilitate secure communication between FastAPI and PostgreSQL; implemented token-based authentication using JWT.
- Used GitHub Copilot extensively to refactor repetitive Angular code and auto-generate boilerplate, cutting development time by 25% on sprint deliverables.
- Developed scalable REST APIs and connected them to frontend via Axios and Angular HTTP Client with observables and retry/error handling logic.
- Applied agile Scrum methodology, contributed to backlog grooming, and participated in retrospectives that enhanced delivery velocity by 20%.
- Led Docker container orchestration for frontend/backend using GitHub Actions CI/CD, ensuring consistent production builds with AWS-hosted infrastructure.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Built Angular admin portals with form validations, component-level routing, and centralized state management using services and observables.
- Created custom Node.js APIs for campaign analytics, ingesting data into MongoDB and PostgreSQL; emphasized modular service layers for testability.
- Adopted ChatGPT for generating test cases and code documentation, increasing onboarding efficiency for new devs by 35%.
- Maintained legacy Java Spring Boot microservices with JPA/Hibernate and deployed them alongside modern Node.js services within a hybrid architecture.
- Spearheaded QA collaboration by building internal dashboards to visualize test coverage, issue trends, and integration status using Angular and REST hooks.
- Developed Confluence-based technical documentation workflows to capture and share patterns used in full-stack development.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Engineered internal HR tools using Angular on the frontend and Java Spring Boot APIs for business logic, including leave management and payroll automation.
- Customized dynamic HTML templates with CSS transitions for intuitive employee interfaces, ensuring WCAG-compliant accessibility across devices.
- Employed GitHub Copilot and ChatGPT to automate generation of boilerplate components and backend service interfaces.
- Designed and indexed complex SQL queries in MySQL, optimizing employee performance dashboards and audit trail logs for near real-time insights.
- Created and documented API contracts using Swagger and Postman, standardizing team communication and reducing integration bugs by 30%.
- Conducted regular cross-functional code reviews, introducing Angular best practices and code-linting conventions into sprint workflows.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Created responsive front-end views using AngularJS and jQuery for embedded analytics dashboards in enterprise finance tools.
- Assisted in migrating legacy Java services to modular Spring Boot architecture, improving maintainability and deployment speed.
- Used ChatGPT to research design patterns and suggested modularization strategies, adopted by the team for future backend services.
- Deployed containerized builds using Docker and GitLab pipelines with manual QA checkpoints and release candidate tagging.
- Cleaned malformed financial journal entries in MySQL and aligned them with business logic using Hibernate validators.
- Participated in team agile ceremonies and contributed to sprint demos showcasing frontend interaction design enhancements.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Contributed to AngularJS dashboard components, focusing on visualizing backend logs and user activity heatmaps.
 - Wrote data transformation scripts in Python to handle CSV-to-DB imports and error handling routines for staging environments.
 - Explored integration of early AI-assisted testing utilities via ChatGPT prompts for unit testing scaffolds and schema generation.
 - Participated in Odoo-based plugin development and styled frontend templates using HTML/CSS and inline JavaScript.
 - Shadowed senior developers to understand RESTful API contracts and versioning practices across microservice deployments.
 - Supported Jira board maintenance and story estimation during planning phases of the sprint cycle.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Full-Stack Web Development with Angular Specialization** – Coursera
 - ❖ **Node.js: The Complete Guide to Build RESTful APIs (2024)** – Udemy
 - ❖ **Java Programming and Software Engineering Fundamentals** – Duke University (Coursera)
 - ❖ **GitHub Copilot for Developers** – Microsoft Learn
 - ❖ **AWS Cloud Practitioner Essentials** – Amazon Web Services
 - ❖ **Docker for Developers** – Udemy
 - ❖ **Python for Data Science** – Coursera
 - ❖ **Odoo Technical Training** – OdooClass
-

PROJECTS

- ✓ **AI-Assisted Code Refactoring:** Enhanced team productivity by integrating GitHub Copilot and ChatGPT into legacy Angular + Spring Boot codebases, reducing technical debt by 40% in 6 months.
- ✓ **Finance Report Generator:** Microservice using FastAPI + Pandas to generate real-time reports; included Angular dashboard integration with secure API consumption.
- ✓ **Odoo CI/CD Pipeline:** End-to-end automated Docker pipeline with GitHub Actions for staging/production deployments, supporting Angular and backend services.
