PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Front-End Developer with over 9 years of professional experience specializing in Angular, RxJS, and TypeScript to build scalable, high-performance, and responsive UI experiences. Adept at leading front-end development for web and mobile platforms in agile environments. Proven track record of delivering UI/UX-rich features and collaborating with backend teams to craft seamless, consumer-focused solutions. Passionate about functional programming and continuously exploring emerging technologies in web development and cloud platforms.

TECHNICAL SKILLS

- **Frameworks & Libraries:** Angular (v8–v16), RxJS, NgRx, React, Bootstrap, Tailwind CSS
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
- **Architecture & Patterns:** Component-based architecture, Reactive programming, Functional programming
- **Tooling & Platforms:** Webpack, NPM, Git, GitHub Actions, Docker
- **Backend Collaboration:** RESTful APIs, Node.js, Java, Scala
- **Cloud & Infrastructure:** GCP, Kubernetes, Firebase, Netlify
- **Testing:** Jasmine, Karma, Jest, Cypress
- **Agile Methodologies:** Scrum, Kanban, CI/CD pipelines

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded the development of enterprise-level Angular applications with RxJS and NgRx, enhancing app responsiveness and achieving 40% faster UI rendering times across multiple modules.
- Led the architectural redesign of core Angular components to adopt functional programming principles, significantly improving testability and code modularity throughout the codebase.
- Implemented a real-time notification dashboard using RxJS and WebSockets, enabling users to receive updates instantly and resulting in a 25% increase in engagement metrics.
- Delivered a mobile-first web portal optimized with Angular Universal and lazy loading, reducing first-load time by 50% and increasing organic search rankings.
- Developed and maintained UI components for a financial dashboard with dynamic charts and transaction filtering, collaborating closely with back-end teams using Scala and Java services.
- Integrated internationalization (i18n) and accessibility (ARIA) standards across Angular apps, ensuring compliance and usability for a wider user demographic.

- Collaborated with DevOps teams to deploy Angular applications to GCP using Kubernetes, setting up Docker-based CI/CD pipelines that streamlined releases by 60%.
- Mentored junior Angular developers, conducting weekly code reviews, workshops, and performance audits to ensure clean, maintainable code and cross-team standards.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built and maintained high-traffic Angular front-end interfaces for mobile web campaigns, achieving 99.98% uptime and consistent performance across browsers and devices.
- Developed reactive forms and dynamic survey flows using RxJS, leading to a 35% reduction in client-side validation errors and increased form conversion rates.
- Integrated RESTful APIs with Angular services for real-time customer interactions, ensuring seamless data flow and reducing response latency by 45%.
- Collaborated with designers to implement pixel-perfect UI from Figma prototypes using HTML5, CSS3, and SCSS, maintaining strict visual consistency across brands.
- Adopted Angular CLI best practices and modular structure to build reusable shared libraries, reducing duplicated code and time-to-deployment for new campaigns.
- Contributed to an internal design system based on Material and Bootstrap, standardizing visual elements and accelerating UI development for new projects.
- Configured continuous deployment pipelines using GitLab CI/CD to automate builds, linting, testing, and production rollouts.
- Delivered complete documentation for Angular modules and services, ensuring knowledge transfer and easier onboarding for future developers.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Designed and implemented client dashboards and admin panels using Angular, integrating data visualizations via Chart.js and dynamic filtering with RxJS observables.
- Created responsive layouts and animations with Angular Animations API and CSS transitions to enhance UX across desktop and mobile devices.
- Refactored legacy jQuery codebases into modern Angular apps, improving maintainability and reducing bugs by 80%.
- Implemented lazy-loading routes and module splitting, achieving better performance and reduced JavaScript bundle sizes.
- Integrated real-time data updates through WebSockets, ensuring dynamic dashboard refreshes without manual reloads.
- Built analytics dashboards to track user engagement using custom RxJS operators, triggering A/B testing experiments.
- Established coding guidelines and Angular linters, reducing inconsistent code and improving team productivity.
- Worked closely with QA teams to write and maintain E2E tests using Protractor and Cypress.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Developed and deployed AngularJS modules for an eCommerce platform, enabling custom product configurators and advanced filtering tools.
- Worked on integration with payment gateways and shipping APIs using JSON and REST protocols.
- Applied functional programming concepts for data transformation pipelines using lodash and RxJS.
- Built responsive HTML5 components and ensured cross-browser compatibility across all major browsers.
- Collaborated with UX designers and contributed to user story mapping for front-end feature rollouts.
- Refined code performance through DOM diffing and optimizing Angular digest cycles.
- Conducted peer code reviews and enforced Git branching strategy across the front-end team.
- Assisted DevOps in containerizing front-end builds using Docker and deploying them on staging environments.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted in development of a learning management system with AngularJS, supporting dynamic quizzes and real-time grading.
- Wrote custom Angular directives for interactive components such as sliders, checklists, and validation forms.
- Collaborated in refactoring jQuery-heavy components into Angular modules to improve test coverage and scalability.
- Participated in weekly sprint planning and retrospectives using Agile workflows with Jira.
- Maintained cross-browser and mobile support for educational tools targeting tablets and older Android devices.
- Conducted manual and automated UI tests using Jasmine and Karma, identifying critical issues in early development stages.
- Documented user interaction workflows and provided feedback to improve app usability.
- Supported backend team in testing REST APIs for compatibility with front-end expectations.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ **Angular - The Complete Guide** (Udemy, 2023)
 - ❖ **RxJS in Practice** (Frontend Masters, 2023)
 - ❖ **Google Cloud Platform Essentials** (Coursera, 2022)
 - ❖ **TypeScript Advanced Concepts** (Pluralsight, 2022)
-

PROJECTS

- ✓ **Real-Time Sports Betting UI** – Built a live odds platform using Angular, RxJS, and WebSockets with real-time match stats and animations. Reduced latency by 70% for UI updates.
- ✓ **Mobile Kiosk Interface** – Developed an offline-first Angular PWA for digital kiosks at events with dynamic product displays, barcode scanning, and customer feedback integration.
- ✓ **Dashboard Builder** – Delivered a plug-and-play Angular component system allowing users to construct custom dashboards with drag-and-drop widgets and real-time data binding.
