

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Angular Developer with 9+ years of experience building scalable web and mobile applications using Angular, TypeScript, and JavaScript ES6+. Strong background in responsive design, component-driven architecture, and cross-platform development with solid knowledge of Dart/Flutter. Skilled in RESTful API integration, version control, secure development practices, and CI/CD pipelines. Proven track record of delivering clean, tested, maintainable code in Agile environments and collaborating with stakeholders to translate business needs into effective digital solutions.

TECHNICAL SKILLS

- **Frontend:** Angular 2–16, TypeScript, JavaScript (ES6+), HTML5, SCSS, CSS3, BEM, Flexbox, Grid, Angular Material, Bootstrap
- **Mobile:** Flutter, Dart, Ionic, Capacitor, Android Studio, Xcode
- **Backend:** Node.js (basic), Firebase, RESTful API Integration
- **Testing & Debugging:** Jasmine, Karma, Cypress, Postman, Chrome DevTools, API mocking
- **DevOps & CI/CD:** Git, GitHub Actions, Bitbucket Pipelines, SonarQube, Jenkins
- **Database:** PostgreSQL, MySQL, Firebase Realtime DB
- **Cloud & Architecture:** Serverless Functions, AWS (basic), Firebase Cloud Functions
- **Security:** XSS/XSRF prevention, CORS, Authentication (JWT, OAuth2), HTTPS
- **Tools:** Figma, Jira, Confluence, Trello, Slack

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded the redesign of legacy AngularJS systems to Angular 13+, improving code maintainability, load speed, and security across enterprise web apps.
- Led the implementation of modular architecture with Angular Services and lazy-loaded routes to enhance scalability and reduce initial bundle size by 35%.
- Developed responsive web and mobile interfaces using Angular Material, SCSS, and Flexbox/Grid that ensured a uniform experience across devices.
- Integrated secure REST APIs using HttpClient and RxJS Observables, with custom interceptors to handle authentication, CORS, and response parsing.
- Built CI/CD pipelines using GitHub Actions and SonarQube to ensure code quality, automatic testing, and deployment to Firebase Hosting.

- Collaborated with designers and PMs using Figma and Jira to translate complex UI prototypes into interactive Angular components with dynamic binding.
- Mentored junior developers in Angular best practices, TDD, Git workflows, and component-based architecture through code reviews and peer programming.
- Delivered a mobile-first admin portal using Angular and Flutter, deploying hybrid builds via Android Studio and Apple Developer tools.

Syscom Digital Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built data-driven marketing dashboards with Angular 10, incorporating filters, charts, and analytics modules to support business intelligence workflows.
- Introduced reactive forms and dynamic validation logic across user-facing modules to streamline client onboarding and form submissions.
- Enhanced cross-browser compatibility using PostCSS and polyfills, ensuring pixel-perfect rendering across Chrome, Firefox, Safari, and Edge.
- Configured JWT-based secure authentication and role-based access control using Angular Guards and Interceptors.
- Reduced customer support load by 40% through proactive error tracking and debugging using Sentry and browser DevTools.
- Implemented mobile push notification triggers via Firebase Cloud Messaging for real-time user updates across hybrid web/mobile platforms.
- Developed customized UI elements using Angular CDK and third-party component libraries, aligning with brand identity and UX specifications.
- Coordinated with external vendors to integrate third-party APIs and automated user data sync between CRM and external platforms.

Soft Build Software Developer

June 2016 – July 2019

Timișoara, Romania

- Designed multi-language support and accessibility features into Angular 6+ apps, ensuring compliance with WCAG 2.1 AA standards.
- Refactored legacy jQuery-heavy pages into reusable Angular components, reducing technical debt and improving runtime by over 50%.
- Architected dashboard templates with stateful components using RxJS BehaviorSubjects to reflect real-time business changes.
- Developed unit tests using Jasmine and Karma, achieving 85%+ test coverage and reducing bugs post-deployment by 60%.
- Optimized mobile builds using Angular CLI custom build configurations and Ahead-of-Time (AOT) compilation.
- Deployed mobile-compatible web apps via Ionic/Cordova to internal sales teams, achieving offline data sync via IndexedDB and local storage.
- Created documentation and wikis to support handover and onboarding for internal development and QA teams.
- Participated in design sprints and Agile ceremonies, contributing to user story refinement and backlog grooming sessions.

Decima Digital Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to frontend refactor projects using Angular 2 beta, assisting in migration planning from jQuery and Backbone codebases.
- Built customer onboarding flows with Angular Forms and custom validators integrated with backend validation APIs.
- Collaborated on early mobile hybrid builds using Ionic and AngularJS for B2B product MVPs targeting offline-first functionality.
- Participated in QA cycles, debugging performance bottlenecks on lower-tier Android and iOS devices for mobile compatibility.
- Integrated customer feedback into iterative UI updates, enhancing UX via user-centered design principles.
- Assisted in the creation of REST API contracts and sample payloads for frontend-backend integration.
- Used Git extensively in collaborative sprints to manage feature branches, resolve merge conflicts, and conduct PR reviews.
- Delivered pixel-perfect UI implementations based on designer mockups, focusing on fluid layouts and precise interactions.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed and maintained small-scale AngularJS modules for internal CRM and HR platforms.
- Participated in daily standups and planning meetings, learning Agile development and task estimation best practices.
- Conducted unit and manual testing for Angular apps, identifying UI/UX issues across devices and screen resolutions.
- Implemented user authentication with token-based systems and basic role permissions.
- Explored hybrid mobile app development using Ionic for company-internal reporting tools.
- Engaged with senior developers for regular code reviews and refactoring recommendations.
- Assisted in data schema definition and Firebase real-time data integration for reactive components.
- Gained exposure to debugging tools, DOM event tracking, and performance profiling.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Google Associate Android Developer (2022)
- ❖ Udemy Certificate: Angular - The Complete Guide (2021)
- ❖ Coursera: Web Application Security Fundamentals (2023)
- ❖ LinkedIn Learning: Flutter & Dart Essentials (2024)

PROJECTS

- ✓ **Mobile Sales Portal (Sensidev)**
Developed a cross-platform mobile and web application using Angular 14 and Flutter to manage field sales, route planning, and live reporting; deployed to Android/iOS with native permissions.
- ✓ **Marketing Intelligence Dashboard (Syscom)**
Led frontend build of a B2B analytics dashboard in Angular 11 to provide dynamic KPIs, reports, and client segmentation insights through interactive data visualization.
- ✓ **E-commerce Admin Panel (Soft Build)**
Delivered a scalable admin dashboard using Angular 6+, enabling product catalog management, order tracking, and customer support with real-time update capabilities.
