

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience in designing and building scalable web applications using Angular, TypeScript, and modern UI frameworks. Proven expertise in crafting data-rich interfaces, real-time collaboration tools, and complex dashboards for enterprise platforms. Adept at integrating APIs, optimizing front-end performance, and ensuring pixel-perfect responsive design. Recognized for driving business impact by delivering clean, maintainable code and collaborating with cross-functional teams to shape product direction.

TECHNICAL SKILLS

- **Frontend:** Angular, TypeScript, JavaScript (ES6+), HTML5, SCSS, Angular Material, Bootstrap, Responsive Design
- **Mapping & Real-time:** Mapbox, Tileserv, Ably, WebSockets, SignalR
- **Backend:** .NET Core, Node.js, REST APIs, Swagger, Authentication Flows
- **Databases:** SQL Server, PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Azure, Google Cloud, Docker, Kubernetes, CI/CD pipelines
- **Tools:** Git, GitHub, GitLab, Jira, Confluence, Figma, Postman

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led the development of enterprise Angular applications with complex dashboards, maps, and analytics views, ensuring high performance and smooth UX across devices.
- Designed and implemented reusable Angular modules and Material components that reduced repetitive code and accelerated delivery of new product features.
- Integrated REST APIs with advanced HTTP interceptors, secure authentication flows, and efficient state management to improve scalability and reliability.
- Collaborated with product owners and designers to create pixel-perfect UI/UX, focusing on responsive layouts, accessibility standards, and high visual quality.
- Implemented WebSocket-based real-time updates for analytics dashboards, enabling live collaboration and reducing data refresh delays by over 60%.
- Built interactive custom map interfaces with Mapbox Studio and Tileserv, enhancing geospatial data visualization for job seeker–employer matching.
- Mentored junior engineers on Angular best practices, TypeScript typing, and testing strategies, improving team efficiency and code maintainability.

- Partnered with the CTO to design architecture decisions that balanced performance, modularity, and scalability for both client-facing and internal applications.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed Angular web apps that powered real-time campaign dashboards, integrating REST APIs and custom components for data visualization and reporting.
- Delivered UI features optimized for speed, accessibility, and mobile responsiveness, resulting in improved customer satisfaction across enterprise clients.
- Implemented custom Angular Material components and SCSS themes, creating a unified design language that supported rapid client onboarding.
- Built secure API integrations with OAuth2 authentication flows and token interceptors, ensuring compliance with enterprise security requirements.
- Collaborated closely with product teams to deliver real-time campaign monitoring tools powered by WebSockets, significantly reducing latency for clients.
- Designed and maintained scalable modules and reusable Angular services, decreasing bug reports and accelerating new feature development cycles.
- Introduced performance profiling and optimization techniques that reduced app load times by 30%, improving retention and overall user adoption.
- Coordinated with backend developers to align REST contracts and enhance system reliability, increasing efficiency across multi-disciplinary teams.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed Angular applications supporting enterprise back-office systems, implementing data-rich interfaces for internal and external users.
- Designed analytics dashboards with charts, graphs, and advanced filtering, empowering clients with actionable insights and custom reporting.
- Engineered scalable Angular services and modules that reduced complexity, standardized code practices, and simplified long-term maintenance.
- Integrated REST APIs with advanced error handling, request caching, and interceptor logic, improving resilience and reducing downtime incidents.
- Worked with designers to refine SCSS-driven themes, ensuring branding consistency and pixel-perfect implementation across web applications.
- Optimized UI rendering for large data sets using Angular change detection strategies, improving responsiveness and client satisfaction.
- Built real-time notifications and updates using SignalR, providing instant synchronization across distributed user devices.
- Conducted regular code reviews and shared Angular best practices, increasing team code quality and reducing post-release defects.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Developed front-end features using AngularJS and TypeScript, integrating them with back-end APIs for enterprise digital commerce platforms.

- Created responsive UI layouts and SCSS-based designs that adapted seamlessly across desktop, tablet, and mobile form factors.
- Contributed to reusable component libraries, enabling multiple teams to accelerate feature delivery and ensure design consistency.
- Implemented data-binding strategies and API integrations that improved customer portal performance and reliability.
- Collaborated with QA and backend teams to streamline CI/CD processes and ensure smooth feature releases.
- Participated in daily standups and sprint planning, helping shape priorities and aligning technical efforts with business goals.
- Delivered front-end optimizations that enhanced application performance, reducing load times and increasing adoption rates.
- Supported early-stage architecture discussions that influenced scalable application patterns adopted by subsequent projects.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in developing AngularJS and JavaScript web applications with a focus on learning scalable front-end practices and team collaboration.
- Built UI prototypes and proof-of-concept features for client demos, gaining exposure to enterprise-level design and development processes.
- Created responsive layouts using HTML, CSS, and SCSS to ensure consistency across multiple device resolutions and browsers.
- Learned to consume REST APIs, implement client-side authentication flows, and debug integration challenges.
- Participated in pair programming sessions and code reviews, receiving feedback to strengthen software engineering fundamentals.
- Contributed to documentation of Angular components and coding practices, providing reference material for junior developers.
- Improved page load performance by applying caching techniques and lightweight front-end optimizations.
- Collaborated with senior developers and gained experience with Agile methodologies, sprint planning, and task estimation.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Microsoft Certified: Azure Developer Associate
- Google Cloud Certified – Professional Cloud Developer
- Certified Kubernetes Administrator (CKA)

PROJECTS

- **Job Marketplace Platform (2023):** Designed Angular front-end for a real-time job matching system with live maps, analytics dashboards, and employer–job seeker collaboration features.
- **Enterprise Analytics Suite (2021):** Built data visualization dashboards with Angular Material and SCSS, integrated with REST APIs and WebSocket feeds for live updates.
- **Back-Office Automation (2019):** Developed reusable Angular modules for internal workflow automation, reducing manual effort by 40% across departments.
