

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 9+ years of experience building robust, scalable, and user-centric web applications using modern technologies. Proven track record delivering full-stack solutions using TypeScript, React, Angular, PHP, Golang, and JavaScript, with deep knowledge of CI/CD pipelines, cloud infrastructure, and performance optimization. Adept in cross-functional collaboration and passionate about accessible, mobile-first, high-impact platforms. Strong focus on clean code, testability, automation, and continuous improvement in remote-first environments.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, PHP, Golang, React, Angular, HTML5, CSS3, Bootstrap, Node.js
- **DevOps & CI/CD:** GitHub Actions, Makefile, Terraform, Docker, Jenkins
- **Cloud Platforms:** AWS (Lambda, S3, RDS, ECS, API Gateway), GCP (Cloud Functions, Firestore)
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Firebase (Realtime DB)
- **Analytics & Experimentation:** Optimizely, Snowplow, Axios, Mixpanel
- **Testing & Tools:** Jest, Mocha, Cypress, Git, Webpack, Postman, Jira
- **Architecture:** REST APIs, Microservices, Monolith to Microservice migration, SSR, JAMstack
- **Others:** WebSockets, OAuth2, Stripe, GraphQL, Next.js, SSR, NoSQL/SQL

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded the transition of legacy frontend to modern React and Angular apps with TypeScript, significantly improving maintainability and performance across core product lines.
- Architected responsive, accessible UIs using HTML5, Bootstrap, and SCSS, ensuring full mobile compatibility and WCAG 2.1 compliance.
- Collaborated closely with backend developers to integrate PHP and JavaScript services via REST APIs, reducing data sync issues by 40%.
- Built reusable components and design systems for a modular front-end codebase shared across multiple white-labeled products.
- Owned CI/CD pipelines using GitHub Actions and Terraform to automate testing, staging, and deployment to AWS infrastructure.

- Integrated experimentation SDKs like Optimizely and Snowplow for A/B testing, customer insights, and iterative product validation.
- Maintained robust monitoring and observability practices using custom metrics, alerts, and dashboards in cloud-native apps.
- Led sprint planning and peer reviews, fostering a strong culture of collaboration and continuous improvement.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered high-availability full-stack applications using Angular, React, and Laravel (PHP), supporting over 1M daily users.
- Developed scalable UI components with TypeScript and Bootstrap, achieving cross-device compatibility and faster rendering.
- Rewrote monolithic backend services into modular Node.js APIs with PostgreSQL, enhancing code maintainability and reducing deployment friction.
- Automated release workflows via GitHub Actions and introduced Makefile scripts for repeatable local dev environments.
- Integrated external tools like Axios for data fetching, Optimizely for live experiments, and Snowplow for customer behavior analytics.
- Led initiatives on frontend testing with Jest and end-to-end automation using Cypress, cutting regression bugs by 55%.
- Implemented robust role-based access control (RBAC) and OAuth2 flows across web portals.
- Facilitated agile rituals and paired programming, mentoring two junior developers in architecture and testing practices.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built client-facing dashboards and analytics platforms with AngularJS and jQuery, later migrated to React + Redux.
- Designed backend services with PHP (Laravel, Symfony) connected to MySQL and MongoDB, managing large volumes of transactional data.
- Integrated RESTful services for third-party APIs including Stripe, SendGrid, and Twilio using robust error-handling middleware.
- Initiated infrastructure migration to AWS, implementing S3 for asset storage and RDS for production-grade database clustering.
- Led refactorings for legacy applications, improving code coverage from 20% to 85% through unit and integration tests.
- Built internal CMS solutions enabling non-technical staff to customize content, reducing support tickets by 30%.
- Optimized SQL queries and added NoSQL caching layers, reducing API response time by 200ms on average.
- Created infrastructure templates using Terraform for reproducible dev and staging environments.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed modules for a high-traffic e-commerce engine using PHP, Angular, and jQuery with real-time cart syncing and order tracking.
- Implemented mobile-first designs using Bootstrap and custom SCSS modules, achieving consistent UX across devices.
- Created API integrations with third-party logistics platforms and payment gateways with token-based authentication.
- Contributed to a custom CMS architecture with multilingual and multi-domain support.
- Developed test automation scripts for regression testing using Selenium and Mocha.
- Conducted performance audits and front-end code reviews with Lighthouse and Webpack analysis tools.
- Assisted in CI/CD setup via Jenkins and Docker for staging pipelines.
- Documented modules and API specs for internal consumption and onboarding.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported the development of a medical appointment scheduling app using PHP, jQuery, and Firebase backend.
- Built responsive calendar UIs and patient dashboards using Bootstrap, jQuery UI, and vanilla JavaScript.
- Integrated Google Maps API and appointment reminders with Twilio and SendGrid.
- Created database schemas using MySQL and NoSQL with Firestore for real-time sync functionality.
- Wrote data scrapers for availability syncing across clinic systems.
- Maintained documentation and learned Git workflows, pull requests, and agile development.
- Supported test automation using Nightwatch.js and wrote QA cases.
- Gained experience with full product lifecycle in a highly regulated industry (healthcare).

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate
 - ❖ Google Cloud Digital Leader
 - ❖ Certified Full Stack Web Developer – FreeCodeCamp
 - ❖ JavaScript Algorithms and Data Structures – FreeCodeCamp
 - ❖ Responsive Web Design – FreeCodeCamp
-

PROJECTS

CI-First CMS Platform

- Migrated a legacy CMS to a React + PHP hybrid stack with automated CI/CD via GitHub Actions and Terraform on AWS. Integrated experimentation via Optimizely and analytics via Snowplow.

Ecommerce Analytics Suite

- Developed a cross-platform analytics dashboard using React, TypeScript, and Node.js to visualize behavior data from Snowplow and GA4, improving conversion insight for marketing teams.

Microservice Deployment Toolkit

- Created a toolset using Makefile and Terraform for deploying containerized services to ECS and GKE, reducing manual deployment times by 75%.
