

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with over 9 years of hands-on experience designing, developing, and deploying full-stack enterprise applications with a strong focus on .NET, React, Azure integration, and distributed architectures. Proven ability to translate complex business requirements into scalable and maintainable software solutions across industries such as e-commerce, marketing, and financial platforms. Adept at modern DevOps, CI/CD, messaging systems, and EDI integrations using AS2 protocols. Strong advocate for clean code, automated testing, and team-driven agile methodologies.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, .NET 9, ASP.NET Core, Entity Framework Core, TypeScript, JavaScript, React, Redux, HTML5, CSS3
- **Cloud & DevOps:** Azure App Services, Azure Container Apps, Azure Logic Apps, Azure Integration Services, Azure Blob Storage, Azure SQL, Azure Monitor, GitHub Actions, GitLab CI/CD, Docker, Kubernetes
- **Messaging & Integration:** NServiceBus, Azure Service Bus, EDI (EDIFACT, ANSI X12), AS2, REST APIs, WebSockets
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis
- **Testing & Quality:** xUnit, NUnit, Jest, Playwright, Cypress, Postman, Swagger, Clean Code, TDD, E2E Testing
- **Tools:** Visual Studio, VS Code, Figma, JIRA, Azure DevOps, Git
- **Additional:** AWS, GCP, Terraform, NoSQL, ClickHouse, OpenSearch, Apache Kafka

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led full-stack development for a business-critical e-commerce platform, building scalable features with C#, .NET 6/7, and React TypeScript across distributed microservices.
- Designed and deployed robust CI/CD pipelines on Azure DevOps and GitHub Actions, reducing deployment lead time by 60% and ensuring high availability.
- Implemented NServiceBus and Azure Service Bus for reliable asynchronous messaging, enhancing system resilience during B2B integrations.
- Integrated complex EDI workflows (EDIFACT, X12) over AS2 protocol using Azure Logic Apps, enabling seamless communication with third-party logistics and trading partners.

- Migrated legacy .NET Framework services to .NET 7+ microservices hosted on Azure Container Apps with full observability through Azure Monitor and App Insights.
- Developed custom APIs for catalog sync and inventory updates using ASP.NET Core Web APIs and integrated them with frontend in React/Redux via REST and SignalR.
- Conducted performance audits and optimization, resulting in 30% latency reduction in high-volume transactional modules using profiling tools and caching strategies.
- Mentored 5+ junior developers on clean code practices, advanced debugging, and cloud infrastructure setup, significantly raising team velocity and onboarding efficiency.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Engineered scalable multi-tenant marketing automation modules using .NET Core APIs with Entity Framework Core, handling large data ingestion and segmentation logic.
- Developed interactive frontend dashboards with React and TypeScript, allowing business users to visualize engagement metrics and optimize campaign performance.
- Designed integration pipelines between core CRM and third-party systems using Azure Integration Services and Logic Apps, reducing manual sync errors by 80%.
- Leveraged Azure App Service and Azure SQL to deploy and manage cloud-native .NET services, applying autoscaling strategies based on usage patterns.
- Built automated testing pipelines using NUnit and Cypress for backend and frontend respectively, achieving over 85% test coverage.
- Implemented AS2-based B2B messaging for secure data exchange with enterprise clients, integrating with their procurement and inventory platforms.
- Created internal libraries for form management and validation in React, shared across projects to streamline frontend development and UI consistency.
- Collaborated with DevOps to containerize microservices using Docker and orchestrate with Kubernetes for dev/stage/prod parity and zero-downtime deployments.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built modular web applications using ASP.NET MVC and transitioned later to .NET Core for performance and cross-platform deployment benefits.
- Managed database schema evolution and optimization for high-load transactional apps using SQL Server and PostgreSQL.
- Participated in legacy migration efforts, converting tightly coupled monoliths into maintainable domain-driven designs using Clean Architecture principles.
- Integrated Redis caching to optimize performance on frequently accessed endpoints, reducing API response time by over 50%.
- Deployed applications to AWS EC2 and S3, integrating with AWS RDS for DB provisioning and monitoring using CloudWatch.
- Supported frontend development with AngularJS and eventually migrated interfaces to ReactJS for maintainability and performance.
- Delivered automated PDF generation and reporting modules using .NET libraries, utilized for real-time invoice processing and audits.
- Established internal development standards around Git branching strategy, PR reviews, and documentation, increasing delivery quality.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Contributed to core components of a digital commerce solution by developing reusable backend modules using ASP.NET Web API and EF.
- Integrated payment gateways and third-party services via REST APIs, ensuring proper authentication, error handling, and compliance with PCI standards.
- Assisted in CI/CD automation setup using Jenkins and Git, reducing manual intervention in release cycles.
- Conducted unit testing and post-deployment validation to minimize bugs and regression issues in production environments.
- Maintained consistent communication with remote clients to gather requirements, showcase features, and refine acceptance criteria.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed and maintained internal admin tools using C#, ASP.NET, and jQuery, streamlining operations for non-technical staff.
- Supported junior dev tasks such as bug fixing, basic database operations, and writing documentation for APIs and backend processes.
- Gained initial experience in version control (Git), agile methodology, and QA testing using manual test plans.
- Shadowed senior engineers during architectural planning and sprint ceremonies, gaining practical exposure to enterprise development environments.
- Created basic cloud storage integrations using AWS S3 for document archiving and retrieval from internal web apps.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Microsoft Certified: Designing and Implementing Microsoft DevOps Solutions
- ❖ AWS Certified Solutions Architect – Associate
- ❖ Google Cloud Certified – Associate Cloud Engineer
- ❖ EDI Implementation and Integration (GS1 Training Series)

PROJECTS

B2B Marketplace Integration System

- Led design and development of full-stack B2B platform integrating over 15 EDI partners using Azure Logic Apps, AS2, and .NET APIs. Supported seamless onboarding and message validation.

Retail Order Processing Pipeline

- Built a distributed order processing system using NServiceBus and Azure Service Bus to decouple microservices, ensuring resilience and consistency across stock, payment, and shipping systems.

Cloud Native Platform Migration

- Migrated legacy application stack to Azure App Services with containerization, CI/CD automation, blob storage, and monitoring integration. Resulted in 40% cost reduction and better observability.
