PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with over 9 years of experience building scalable backend services and full-stack applications in startup and enterprise environments. Specialized in Node.js, TypeScript, NestJS, and Google Cloud Platform, with a strong emphasis on building service-oriented architectures, delivering robust APIs, and writing maintainable, testable code. Passionate about innovation, clean design, and contributing to high-impact logistics and operations systems.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript, Node.js, NestJS, Express.js, PHP, Laravel, HTML5, CSS3
- **Cloud & DevOps:** Google Cloud Platform (GCP), AWS (Lambda, S3, RDS, ECS), Docker, CI/CD (GitHub Actions, GitLab CI)
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis (SQL & NoSQL)
- **Testing:** Jest, Mocha, Chai, Cypress, Supertest
- **Tools:** Git, Postman, Swagger, Jira, Webpack
- **Other:** Magento v2.4.x, RESTful API Design, Microservices, Agile/Scrum, Serverless Architecture

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and implemented scalable backend services in TypeScript using NestJS and Express, processing millions of logistics and customer-related transactions weekly.
- Architected microservice-based systems running on GCP and AWS, improving service uptime and deployment flexibility.
- Collaborated with product and frontend teams to build customer-facing features, integrating them with internal APIs and logistics tools.
- Integrated Magento v2.4.x with internal services, streamlining inventory and delivery workflows.
- Created comprehensive test coverage with Jest and Cypress, reducing bugs in production by 40%.
- Conducted architectural reviews and mentored junior developers on TypeScript best practices.
- Automated CI/CD pipelines using GitHub Actions for faster release cycles and rollback safety.
- Optimized database queries and introduced Redis caching for better performance and scalability.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed logistics and marketing platform backends using Node.js and MySQL, focusing on campaign tracking and reporting.
- Designed and built RESTful APIs serving mobile and frontend apps, handling over 300k requests per day.
- Wrote reusable modules and middlewares for authentication, validation, and error handling.
- Maintained consistent test coverage with Mocha, Chai, and Supertest.
- Worked in agile sprints with cross-functional teams and ensured technical feasibility of product requirements.
- Migrated legacy PHP services to Node.js, reducing maintenance effort by 60%.
- Participated in daily standups and retrospectives to align engineering and business goals.
- Integrated 3rd party APIs for messaging, delivery tracking, and data enrichment.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built internal enterprise tools and dashboards using PHP (Laravel), PostgreSQL, and Vue.js.
- Engineered multiple backend features including invoicing, delivery routing, and reporting services.
- Integrated systems with GCP and AWS for file storage, analytics, and real-time messaging.
- Maintained production systems and reduced tech debt by refactoring legacy codebases.
- Led efforts to introduce unit and integration testing across all services.
- Designed data models and optimized queries for multi-region reporting solutions.
- Collaborated with DevOps engineers to containerize applications using Docker.
- Built RESTful interfaces to expose data to external vendors and partners.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Delivered Magento 2 modules for European e-commerce businesses with custom shipping logic.
- Extended backend functionality for cart management, discounts, and analytics.
- Customized APIs and integrated payment and inventory services.
- Developed debugging tools for e-commerce analytics data pipelines.
- Tuned database performance for high-concurrency Magento deployments.
- Maintained version control and performed code reviews for offshore teams.
- Built deployment scripts and improved QA/staging environment stability.
- Coordinated with clients to gather requirements and define acceptance criteria.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in backend development of customer onboarding and ticketing systems.
- Created internal dashboards with CRUD features and real-time status updates.
- Participated in refactoring initiatives and adopted early-stage testing practices.
- Integrated MongoDB and MySQL databases for hybrid storage.

- Learned Git workflow, issue tracking, and participated in agile ceremonies.
 - Contributed to API versioning and changelog documentation.
 - Shadowed senior developers and participated in code reviews.
 - Presented project demos during bi-weekly sprints.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Google Cloud Associate Cloud Engineer (2023)
 - ❖ AWS Certified Solutions Architect – Associate (2022)
 - ❖ TypeScript & Node.js Masterclass – Udemy (2021)
-

PROJECTS

- ✓ **Scalable Logistics Operations Platform** (*Sensidev, 2023*)
Led design and development of a backend system for tracking real-time logistics data, integrating with multiple delivery APIs and internal order management. Reduced delivery latency by 35% through route optimization features.
- ✓ **E-commerce Fulfillment Engine** (*Soft Build, 2018*)
Engineered a Magento v2-based backend to manage inventory, packaging, and order routing across 4 warehouses. Implemented bulk data sync processes with GCP Cloud Functions and Pub/Sub.
- ✓ **Customer Campaign Tracker** (*Syscom Digital, 2020*)
Built and deployed a full-featured campaign analytics platform serving marketing data to clients in real time. Delivered high-performance RESTful APIs with automated email and SMS alerts.
