PROFESSIONAL SUMMARY

Results-driven Senior Front-End Engineer with **9+ years of experience** building scalable, modern, and accessible web applications using **React, Next.js, and Sitecore XM Cloud**. Expert in **headless CMS implementations, GraphQL, REST APIs, Sitecore JSS, and Azure DevOps pipelines**. Adept at optimizing UI performance, enforcing accessibility standards, and leading engineering practices through mentorship, architecture decisions, and CI/CD automation. Proven ability to deliver **enterprise-grade digital experiences** in agile, distributed, and client-facing environments.

TECHNICAL SKILLS

- **Front-End Development:** JavaScript (ES6+), TypeScript, React, Next.js, Redux, Zustand, TailwindCSS, SCSS, Material UI, Storybook, Responsive Design, Accessibility (WCAG)
- **Headless CMS & Integrations:** Sitecore XM Cloud, Sitecore JSS, GraphQL, REST APIs, Contentful, Strapi, Headless Architecture
- **Backend & APIs:** Node.js, Express.js, NestJS, .NET Core (basic), Python (API integrations)
- **Cloud & DevOps:** Azure DevOps, GitHub Actions, GitLab CI/CD, Docker, Kubernetes, AWS (S3, ECS, Lambda), GCP (Cloud Run, Firestore)
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, DynamoDB, Redis
- **Testing & Quality:** Jest, React Testing Library, Cypress, Playwright, Postman, SonarQube, ESLint, Prettier
- **Collaboration & Tools:** Git, Jira, Confluence, Agile/Scrum, Figma, Miro

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Developed scalable, reusable **front-end components in React and Next.js**, integrating them with **Sitecore XM Cloud** for headless CMS-driven enterprise platforms.
- Implemented **GraphQL queries and REST API endpoints** for seamless headless CMS integrations, enabling dynamic content delivery across multiple digital channels.
- Designed and enforced **front-end architecture standards** that improved scalability, reusability, and performance across multiple enterprise-grade projects.
- Optimized **page load performance and accessibility (WCAG 2.1)** by applying advanced lazy-loading, code-splitting, image optimization, and Lighthouse audits.
- Collaborated with **Azure DevOps CI/CD pipelines**, ensuring automated builds, unit testing, and deployment workflows for faster release cycles.

- Mentored junior developers, conducted **code reviews, pair programming, and knowledge-sharing sessions**, improving overall team productivity and code quality.
- Partnered with **UX/UI designers** to implement responsive, pixel-perfect interfaces, balancing design fidelity with performance and accessibility standards.
- Led **cross-functional collaboration with backend engineers**, ensuring consistent API contracts, efficient data-fetching strategies, and microfrontend integrations.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed **front-end applications with React and TypeScript**, integrating with Sitecore CMS APIs and delivering responsive marketing campaign platforms.
- Built **custom headless CMS integrations** using Sitecore JSS and GraphQL, allowing real-time synchronization between front-end apps and CMS-managed content.
- Collaborated with backend engineers to optimize **API performance**, designing caching strategies and reducing redundant calls by implementing Apollo Client caching.
- Improved **CI/CD pipelines in Azure DevOps and GitLab**, adding automated unit/integration testing that reduced post-deployment issues by 35%.
- Enhanced **SEO performance and Core Web Vitals** through server-side rendering (Next.js), dynamic routing, and prefetching strategies.
- Introduced **front-end monitoring and logging tools** (Sentry, LogRocket) to proactively detect performance bottlenecks and UI errors in production systems.
- Conducted **security hardening on front-end applications**, implementing content security policies, sanitization, and secure authentication workflows.
- Actively participated in **agile ceremonies**, aligning with product managers and stakeholders to refine backlog priorities and deliver business-critical features.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered **React-based front-end applications integrated with Sitecore CMS**, building reusable components and enhancing digital experiences for enterprise clients.
- Implemented **responsive and accessible interfaces**, ensuring compliance with WCAG standards and cross-browser/device compatibility.
- Designed **REST API integration layers** to improve data consistency and reliability, enabling seamless headless CMS-driven workflows.
- Built and maintained **UI component libraries** with Storybook, streamlining front-end development and ensuring brand consistency across multiple products.
- Migrated **legacy jQuery apps** to modern React and TypeScript solutions, improving performance, maintainability, and reducing technical debt.
- Worked on **database-driven features** with PostgreSQL and MongoDB, supporting complex queries and optimized caching for front-end data needs.
- Introduced **CI/CD pipelines with Jenkins and Git**, automating testing and deployment for faster delivery cycles.
- Collaborated closely with **design and QA teams**, ensuring production-ready releases that met quality and performance standards.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Developed **front-end components** for Sitecore-powered websites using JavaScript and integrated them with Sitecore's headless capabilities.
- Implemented **RESTful API consumption layers** in React applications, enabling real-time content updates and modular CMS integrations.
- Worked on **cross-functional agile projects**, contributing to sprint planning, backlog refinement, and cross-team architectural discussions.
- Participated in **performance optimization efforts**, reducing initial page loads and improving Lighthouse scores by applying caching and SSR strategies.
- Designed **multi-language support** in React apps integrated with Sitecore CMS, enhancing localization and user reach.
- Developed **unit and integration tests** to ensure feature reliability and reduce production incidents.
- Partnered with **UX teams** to deliver high-quality user experiences while maintaining Sitecore CMS consistency and scalability.
- Assisted senior engineers in **Sitecore upgrades and migration projects**, ensuring smooth transitions between versions and feature parity.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported the **development of front-end applications** integrated with Sitecore CMS, contributing to feature enhancements and bug fixes.
- Gained hands-on experience with **JavaScript, HTML, CSS**, and CMS-driven websites, learning industry best practices for web development.
- Assisted in **API integration tasks**, connecting front-end applications to back-end systems for dynamic content delivery.
- Worked under the guidance of senior developers on **responsive UI improvements**, ensuring applications were mobile-first and accessible.
- Participated in **code reviews and debugging sessions**, improving code quality and reducing defects across projects.
- Implemented **basic test automation scripts** using JavaScript testing frameworks, supporting QA teams in regression testing.
- Contributed to **technical documentation and user guides**, ensuring clear communication of implemented features for end-users.
- Developed **problem-solving skills** by troubleshooting performance issues and applying solutions suggested by senior engineers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **Sitecore Certified Developer – XM Cloud**
 - **Microsoft Certified: Azure Developer Associate**
 - **AWS Certified Developer – Associate**
 - **Google Cloud Associate Cloud Engineer**
-

PROJECTS

- **Headless Sitecore XM Cloud Implementation** – Led the front-end development of a Sitecore XM Cloud-driven digital platform using React, Next.js, GraphQL, and JSS. Delivered dynamic, multi-lingual, responsive experiences with optimized performance and accessibility.
- **Content Personalization Engine** – Built a personalization layer integrated with Sitecore CMS, enabling tailored user experiences based on behavioral data.
- **Multi-Channel Campaign Platform** – Developed a React-based platform connected to Sitecore APIs, allowing marketing teams to manage campaigns across web and mobile.
