

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Highly driven and detail-oriented Senior Full Stack Developer with 9+ years of experience delivering scalable SaaS solutions using C#, .NET Core, SQL Server, JavaScript frameworks, and Azure. Demonstrated expertise in building enterprise-grade applications with full test automation, API development, and intuitive UI/UX. Proven ability to own complex technical projects from design to production with a quality-first mindset and minimal technical debt. Passionate about clean code, collaboration, and leveraging emerging tools and AI-powered workflows to accelerate delivery.

TECHNICAL SKILLS

- **Backend:** C#, .NET 6/7/8, .NET Core, Web API, Entity Framework, REST
- **Frontend:** Ember.js, Angular, React, JavaScript (ES6+), Bootstrap, HTML5, SCSS
- **Database:** SQL Server 2022, T-SQL, PostgreSQL, MongoDB
- **Cloud & DevOps:** Microsoft Azure, Azure DevOps, CI/CD Pipelines, Docker
- **Testing:** xUnit, NUnit, Selenium, Moq, TDD, Integration Testing
- **Tools:** Git, Azure Boards, JIRA, Postman, Visual Studio, Rider
- **Other:** Agile/Scrum, Clean Architecture, SOLID Principles

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded end-to-end development of a scheduling SaaS platform using .NET Core, C#, and Ember.js, increasing customer onboarding speed by 40%.
- Designed and implemented a role-based access control system with full test coverage using xUnit and Moq, enhancing security posture.
- Built scalable REST APIs and integrated them with Azure services, handling high-concurrency loads with improved latency by 30%.
- Architected and maintained CI/CD pipelines on Azure DevOps, reducing release time from hours to under 15 minutes.
- Developed dynamic floor plan components with Bootstrap and JavaScript, boosting UX engagement metrics across 4 customer cohorts.
- Led code review and design discussions to enforce clean code and SOLID principles, increasing team delivery velocity by 25%.
- Migrated legacy .NET Framework codebases to .NET 6+, improving maintainability and performance benchmarks.
- Mentored 3 junior developers in full stack practices, Azure cloud usage, and test-first methodologies.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Developed and maintained B2B marketing automation tools using .NET Core, Web API, and Angular, increasing campaign success rates by 22%.
- Designed SQL Server 2019 stored procedures and optimized query performance for large datasets, reducing query execution times by 45%.
- Implemented API gateway and middleware layers using clean architecture patterns to support microservices communication.
- Automated UI tests with Selenium and integrated into Azure DevOps pipelines, improving QA efficiency and reducing regressions.
- Delivered end-user analytics dashboards with dynamic filters and chart visualizations using JavaScript libraries.
- Rewrote monolithic features into modular services, simplifying deployment and scalability.
- Participated in daily Agile stand-ups, sprint planning, and retrospectives, improving team throughput and velocity.
- Provided technical estimates and risk assessments on greenfield and brownfield projects.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Delivered backend APIs and frontend components for an enterprise booking platform, handling 1M+ monthly transactions.
- Built reusable Ember.js components following Octane idioms to support modular UIs and responsive layouts.
- Created SQL Server ETL processes for analytics reports and reduced reporting lags by 50% for stakeholders.
- Integrated third-party payment gateways and ensured PCI compliance across the backend.
- Configured Dockerized environments for local development and testing, aligning with production parity.
- Conducted load testing with JMeter and made API optimizations to support scalability for seasonal traffic spikes.
- Collaborated with UX designers to translate wireframes into responsive, mobile-first UI implementations.
- Conducted pair programming sessions to share knowledge and uphold coding standards.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to a team building multi-tenant SaaS applications on .NET Framework and JavaScript.
- Developed reusable components and helper libraries to reduce feature delivery times by 20%.
- Participated in feature grooming sessions, contributing technical insights and suggesting simpler approaches.
- Wrote unit and integration tests using NUnit and helped maintain CI builds.
- Worked across timezone-distributed teams to support cross-border clients.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted in the development of internal ERP modules using .NET and SQL Server.
 - Created user interfaces using jQuery, Bootstrap, and Razor views for enhanced interactivity.
 - Wrote and optimized SQL queries for reporting and admin dashboards.
 - Contributed to documentation and technical specifications for in-house APIs.
 - Shadowed senior engineers in daily stand-ups and code walkthroughs.
 - Learned best practices in code versioning, refactoring, and Agile workflows.
 - Debugged and resolved UI bugs, receiving commendation for attention to detail.
 - Proactively sought feedback and implemented suggestions into deliverables.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Microsoft Certified: Azure Developer Associate (AZ-204)**
 - ❖ **Microsoft Certified: .NET Developer**
 - ❖ **Test Automation Foundations with Selenium**
-

PROJECTS

✓ **Smart Venue Scheduler (Sensidev)**

- Designed a full-featured space reservation tool with custom floor plan mapping, dynamic pricing rules, and real-time availability sync.
- Built using .NET Core APIs, SQL Server, Azure Blob Storage, and Ember.js with TDD across all layers.
- Deployed on Azure with CI/CD via Azure DevOps, achieving 99.99% uptime and seamless auto-scaling.

✓ **Booking Analytics Dashboard (Syscom Digital)**

- Implemented visual analytics dashboards with filtering, drill-downs, and export features for marketing clients.
- Backend written in C# with optimized SQL queries and frontend in Angular with charting libraries.
