

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and highly skilled Senior Full-Stack Developer with 8+ years of experience architecting and delivering scalable web applications and data-driven platforms. Proven track record in backend development using Django and Django REST Framework, complemented by advanced React.js skills for dynamic, responsive frontends. Expertise in building robust APIs, integrating data pipelines, and collaborating with cross-functional remote teams. Adept at leading full project lifecycles, from technical planning to deployment, with a passion for clean code and scalable solutions.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, Material UI
- **Backend:** Django, Django REST Framework, Node.js, Express
- **Database:** PostgreSQL, MongoDB, MySQL, Redis
- **Data Engineering:** Pandas, NumPy, Apache Airflow, ETL Pipelines, API Data Sync
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, GitHub Actions, CI/CD, Nginx
- **Testing:** Pytest, React Testing Library, Jest
- **Other Tools:** Git, Figma, Jira, Postman, Swagger, GraphQL

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Architected and implemented full-stack web solutions using Django REST API on the backend and React.js for front-end interfaces, optimizing performance for high-traffic research dashboards.
- Led development of scalable RESTful services handling millions of records, supporting real-time analytics for global research operations.
- Designed and integrated data pipelines with Python and Pandas to automate ETL workflows from internal tools and third-party APIs, reducing manual data handling by 80%.
- Collaborated with designers and analysts to transform Figma mockups into clean, responsive, and interactive UIs with React.js and Tailwind CSS.
- Established CI/CD pipelines using GitHub Actions and Docker to streamline testing and deployment for staging and production environments.

- Implemented role-based access control and JWT authentication for internal web portals, ensuring secure access across teams.
- Reviewed and mentored junior developers in pull requests, design reviews, and sprint planning, ensuring consistency and code quality.
- Created unit, integration, and API tests using Pytest and Postman, achieving 95% coverage and reducing production issues by 40%.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained multiple marketing analytics platforms using Django REST Framework and React.js, integrating with Google Analytics and custom APIs.
- Built performant single-page applications (SPA) from scratch, improving user experience and engagement metrics across digital campaigns.
- Designed and implemented backend logic for real-time user behavior tracking, integrating Redis for fast cache processing and analytics aggregation.
- Automated marketing reports using Python scripts and Pandas, delivering customized insights to stakeholders with minimal manual work.
- Integrated third-party APIs including Facebook Graph API and Google AdWords API to enrich campaign data pipelines.
- Refactored legacy PHP/JS codebases to Django-based modular services, enhancing maintainability and security.
- Led daily standups, sprint grooming, and roadmap planning in agile environments with distributed global teams.
- Provided technical documentation and training for junior developers and QA testers to ensure seamless project transitions.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Engineered scalable web applications and dashboards using Django and jQuery, later transitioning to modern JavaScript stacks with React.js.
- Created RESTful APIs to serve construction monitoring and asset management tools, used by field operators and site managers.
- Developed geospatial data visualizations using Leaflet.js and Mapbox APIs, enabling dynamic mapping for equipment locations.
- Optimized backend database queries with Django ORM and PostgreSQL indexes, reducing API response time by 60%.
- Implemented secure file upload/download modules with AWS S3, improving data management reliability for project files.
- Built a role-based permission system to separate client and admin access with granular control in Django admin.
- Enhanced frontend maintainability by introducing component-based architecture and reusable UI patterns.
- Coordinated with stakeholders and non-technical teams to translate business needs into technical specifications and prototypes.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Supported development of Django-based e-commerce and CMS platforms, integrating payment systems and product management tools.
- Developed custom modules for content scheduling and media galleries, used in editorial publishing systems.
- Conducted API integrations with logistics partners, enabling real-time shipment updates and stock sync.
- Enhanced site SEO performance by implementing server-side rendering (SSR) and schema.org markup strategies.
- Assisted in migration from legacy PHP system to Django, standardizing architecture and streamlining backend functionality.
- Conducted unit and integration testing to ensure product stability ahead of public launches.
- Collaborated with UI/UX designers to implement accessible and responsive layouts using Bootstrap.
- Managed deployments and server configurations using DigitalOcean droplets and custom Nginx setups.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Built internal tools for sales and HR teams using Django, including a custom leave tracker and client CRM system.
- Created and maintained Python scripts to automate employee time tracking and payroll calculations.
- Assisted in the development of REST APIs consumed by Android mobile applications for field agents.
- Participated in daily scrums and pair programming sessions to learn code review practices and agile workflows.
- Maintained internal wiki and documentation hub for project onboarding and feature planning.
- Developed test cases and ran regression tests for critical features ahead of each sprint demo.
- Implemented dashboards using Chart.js and D3.js for internal data visualization needs.
- Gained experience working with Git version control, Jira boards, and collaborative sprint planning.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Certified Django Developer – Coursera (2024)
- ❖ Python for Data Science – DataCamp (2023)
- ❖ Full-Stack Web Development with React – Meta / edX (2023)
- ❖ Data Engineering with Python – Pluralsight (2023)

PROJECTS

- ✓ **Dataflow ETL Engine**
Built a modular Django-based ETL engine to fetch, clean, and sync data from external APIs into PostgreSQL, integrated with Celery for async job handling and Airflow for scheduling.
- ✓ **Client Portal Platform**
Developed a secure, React-based B2B portal enabling partners to view real-time project data and reports powered by a Django REST backend, with OAuth2 authentication and custom dashboards.
- ✓ **Remote Research Dashboard**
Architected a fully responsive analytics dashboard for research teams, allowing users to filter and visualize large datasets interactively using React, Redux, and Chart.js, fed by REST APIs.
