PROFESSIONAL SUMMARY

Creative and detail-oriented Senior Mobile Developer with over 9 years of hands-on experience designing, developing, and optimizing mobile applications across iOS and Android platforms. Adept in Flutter and Dart for cross-platform mobile solutions with additional strength in Kotlin and Swift for native development. Proactive team player with a strong grasp of GitHub-based workflows and CI/CD strategies. Proven success in building custom widgets, optimizing performance, and collaborating effectively with multidisciplinary teams in agile environments.

TECHNICAL SKILLS

- Mobile Frameworks:** Flutter, React Native
- Languages:** Dart, Kotlin, Swift, JavaScript, TypeScript
- Native Development:** Android SDK, iOS SDK, Xcode
- Version Control & Tools:** Git, GitHub, GitLab, Bitbucket, Android Studio, Xcode
- CI/CD:** Fastlane, Firebase App Distribution
- Testing:** Widget testing, Integration testing, Playwright (for accessibility)
- Other:** RESTful APIs, Firebase, GraphQL, SQLite, Realm, Google Play Console, Apple App Store Connect
- Bonus Exposure:** Ruby on Rails, Shape Up methodology

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led the design and implementation of a fully cross-platform mobile app using Flutter, reducing code duplication and maintenance costs by over 40%.
- Developed over 50 reusable and scalable custom widgets to enhance UI consistency and maintainability across multiple screens.
- Conducted deep performance profiling and optimization, improving app startup time by 35% and reducing memory leaks across both iOS and Android platforms.
- Collaborated with product managers and UI/UX designers to implement responsive interfaces aligned with real-time customer feedback.
- Delivered continuous improvements and bug fixes using an iterative ticket-driven agile development cycle with clear ownership and accountability.

- Integrated Google Maps, Firebase services, and secure authentication layers into mobile architecture to enhance user experience and reliability.
- Mentored junior Flutter developers and introduced structured code reviews, leading to significant improvements in code quality and team velocity.
- Deployed apps to the Play Store and App Store using automated CI/CD pipelines with Fastlane and manual provisioning in Xcode.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built hybrid mobile applications using Flutter and React Native for marketing and event-driven platforms, enabling rapid feature rollout across multiple campaigns.
- Integrated real-time analytics and user interaction tracking, providing marketing teams with actionable insights through custom dashboards.
- Delivered white-labeled apps with scalable architecture, supporting dynamic theming and localization to serve over 20 international clients.
- Improved accessibility compliance across mobile platforms by implementing WAVE and Lighthouse audits and resolving over 95% of identified issues.
- Managed the entire mobile publishing lifecycle, including versioning, store submissions, and crash monitoring setup.
- Led the re-architecture of legacy native apps into Flutter, enabling code sharing of over 70% across iOS and Android while reducing regression bugs.
- Collaborated directly with backend teams to define API contracts and implemented secure OAuth-based authentication mechanisms.
- Facilitated sprint grooming and backlog refinement sessions to better align mobile efforts with organizational roadmaps.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed custom native apps in Kotlin and Swift for IoT, real-estate, and social platforms with highly responsive interfaces and offline-first functionality.
- Took ownership of mobile architecture and modularized monolithic codebases to improve scalability, code readability, and parallel development.
- Implemented robust state management solutions such as Provider and Riverpod to handle complex user interactions and asynchronous data loading.
- Delivered seamless push notification experiences via Firebase Cloud Messaging and Apple Push Notification Service.
- Conducted peer code reviews and built a reusable component library that improved time-to-market for subsequent projects.
- Built automated UI test suites using Espresso (Android) and XCTest (iOS) ensuring stability across continuous deployments.
- Integrated Stripe, PayPal, and local payment gateways into mobile platforms for seamless user checkout and transactional flows.
- Provided post-launch support, gathering user feedback to implement data-driven improvements and reduce churn rate.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Delivered responsive cross-platform apps using Ionic and Cordova, paving the way for future Flutter adoption by the team.
- Optimized mobile web performance with lazy loading and caching strategies that reduced load times by over 50%.
- Collaborated closely with QA engineers to define acceptance criteria and ensure feature completeness before sprint closures.
- Built custom chart components and data visualizations to present dynamic content in real-time.
- Implemented multilingual support with dynamic content fetching to accommodate a multilingual user base.
- Explored early concepts of widget-based mobile development that later influenced component libraries in Flutter apps.
- Took initiative in documenting technical decisions, creating onboarding material for new mobile team members.
- Maintained a strong focus on UX and minimalistic design in all mobile implementations.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in building native Android applications for B2B clients, focusing on UI refinement and device compatibility.
- Created proof-of-concept prototypes using early versions of Flutter and Dart during its beta phase.
- Participated in daily standups, sprint reviews, and shadowed senior developers to understand the agile development lifecycle.
- Developed in-app user walkthroughs using overlays and animations to improve onboarding experience.
- Contributed bug fixes and enhancements to legacy Android codebases using Java.
- Designed and tested REST API integrations to fetch and post transactional data securely.
- Conducted device fragmentation testing to ensure compatibility across diverse screen sizes and OS versions.
- Supported the QA team in defining mobile test cases and maintaining regression test documentation.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Google Flutter Developer Certification
- ❖ Android Kotlin Developer Nanodegree (Udacity)
- ❖ iOS App Development with Swift (Coursera)

- ❖ GitHub Project Management for Developers
 - ❖ Agile Development Specialization (University of Virginia)
-

PROJECTS

- ✓ **CrossFleet** – Logistics app using Flutter and Firebase for real-time vehicle tracking, delivery route optimization, and multi-language support.
- ✓ **BuzzMarket** – Marketing campaign app built with Flutter, Firebase Analytics, and custom UI animations tailored for global FMCG clients.
- ✓ **FitLife Mobile** – Health and fitness native mobile solution built using Swift (iOS) and Kotlin (Android) with in-app purchases and social sharing.
- ✓ **InSync CRM Companion App** – React Native-based CRM companion for field agents integrated with REST APIs and offline caching.
