

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned Senior Software Engineer with over **9 years of experience** building scalable mobile and web applications, specializing in **Flutter (5+ years)**, **BLoC state management**, and **Clean Architecture**. Proven ability to rescue legacy projects under tight deadlines, optimize performance, and deliver **pixel-perfect, production-ready apps**. Skilled in **PostgreSQL/Supabase SDK integration**, **cloud-native development (AWS, GCP, Azure)**, and **real-time collaboration workflows**. Adept at debugging, mentoring, and ensuring high-quality delivery in fast-paced, high-pressure environments.

TECHNICAL SKILLS

- **Languages & Frameworks:** Flutter, Dart, JavaScript, TypeScript, Node.js, Python, C#, Java
- **Mobile Development:** Flutter (BLoC, Clean Architecture, Provider, Riverpod), Android, iOS
- **Cloud & DevOps:** AWS (EC2, Lambda, S3), GCP (Cloud Run, Firestore, Pub/Sub), Azure, Docker, Kubernetes, CI/CD pipelines
- **Databases:** PostgreSQL, Supabase SDK, MySQL, MongoDB, Redis, Firebase, SQL & NoSQL systems
- **Tools & Practices:** Git, GitHub, GitLab, VS Code Live Share, Jira, Agile, Scrum, TDD, Pixel-Perfect UI delivery

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led end-to-end development of **Flutter apps using BLoC and Clean Architecture**, ensuring maintainability and scalability in highly modularized codebases.
- Integrated **Supabase SDK and PostgreSQL** with real-time sync and secure authentication, powering cross-platform mobile applications with high availability.
- Acted as **rescue developer on failing Flutter projects**, debugging complex BLoC issues and refactoring unstable architectures under aggressive delivery timelines.
- Built and deployed **cloud-native microservices on AWS and GCP**, leveraging Lambda, Cloud Functions, and Firestore for backend integrations.
- Partnered with product owners in **pixel-perfect UI implementation**, ensuring designs matched exact Figma specs across iOS and Android devices.

- Optimized **state management flows**, resolving race conditions, memory leaks, and performance bottlenecks in large-scale mobile projects.
- Conducted **continuous Live Share sessions** with stakeholders for real-time debugging, reducing iteration cycles and ensuring aligned deliverables.
- Mentored junior developers on **Clean Architecture principles**, BLoC best practices, and effective collaboration during high-pressure sprints.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained **multi-platform Flutter applications** with advanced BLoC state management, increasing reliability of core business apps.
- Implemented **secure PostgreSQL and Firebase data integrations**, ensuring seamless synchronization across mobile, web, and backend systems.
- Built **CI/CD pipelines with Docker and Kubernetes**, automating deployments to AWS and GCP for faster release cycles and reduced downtime.
- Collaborated in **real-time paired programming sessions**, debugging and optimizing shared code to meet strict performance and pixel-perfect UI standards.
- Refactored monolithic Flutter apps into **Clean Architecture modules**, improving code clarity, testability, and long-term maintainability.
- Enhanced application performance with **SQL query optimization and NoSQL caching layers**, reducing load times across user-facing features.
- Designed **error-resilient state handling flows** with BLoC to ensure smooth navigation, offline persistence, and consistent user experiences.
- Partnered with cross-functional teams to **deliver on aggressive deadlines**, often under high-pressure, time-constrained environments.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed **Flutter prototypes transitioning into production-ready apps**, implementing early versions of BLoC and Clean Architecture practices.
- Built **REST APIs and backend microservices** in Node.js and .NET, integrating with SQL and NoSQL systems for high-performance data pipelines.
- Optimized **mobile performance at scale**, handling heavy data sets with PostgreSQL, MongoDB, and Redis-backed caching solutions.
- Integrated **Supabase-like authentication flows** before its release using Firebase/Auth0, later ported to Supabase for production systems.
- Designed **cross-platform mobile features** with responsive layouts, ensuring consistent pixel-perfect delivery across Android and iOS devices.
- Deployed solutions to **AWS and GCP**, leveraging auto-scaling cloud infrastructure for mobile backend reliability.
- Conducted **pair programming code reviews**, enforcing Clean Architecture standards and consistent BLoC implementation across teams.
- Delivered projects with **tight timelines**, acting as the go-to developer for performance optimization and architectural stability.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built **mobile-first solutions** with Flutter (early beta versions) and native Android, applying foundational Clean Architecture concepts.
- Integrated **PostgreSQL-driven backends** with custom APIs, ensuring consistent data flows for hybrid mobile applications.
- Implemented **state management strategies** to handle offline-first scenarios, improving user experience in unreliable network conditions.
- Assisted senior engineers in **refactoring unstable codebases**, applying layered architecture principles to stabilize app logic.
- Collaborated in **live coding sessions with senior staff**, accelerating onboarding and alignment on critical mobile deliverables.
- Contributed to **early-stage cloud migration**, moving workloads from on-prem servers to AWS, focusing on scalability and performance.
- Delivered **pixel-accurate UI designs** working closely with designers to refine layout alignment, typography, and color consistency.
- Strengthened **debugging workflows** by introducing systematic logging, profiling, and error handling in production mobile apps.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported development of **Android and early cross-platform apps**, focusing on modular architecture and testable components.
- Built foundational **SQL/NoSQL database integrations**, helping transition legacy MySQL systems toward hybrid database solutions.
- Created **mobile UI prototypes** based on wireframes, ensuring alignment with early stage pixel-perfect requirements.
- Assisted in **bug triage and debugging sprints**, working closely with senior engineers to stabilize high-priority features under pressure.
- Learned and applied **state management patterns** evolving into Clean Architecture practices in later roles.
- Contributed to **performance profiling**, identifying and reducing memory leaks in prototype mobile apps.
- Participated in **team code reviews and paired debugging sessions**, reinforcing best practices in collaboration and knowledge sharing.
- Documented **project lessons learned**, creating internal wikis to help accelerate onboarding of new engineers in future sprints.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- **Google Associate Cloud Engineer (GCP)**
 - **AWS Certified Solutions Architect – Associate**
 - **Flutter & Dart – The Complete Guide (Udemy)**
 - **PostgreSQL for Developers (Coursera)**
-

PROJECTS

- **Flutter Rescue Sprint:** Successfully stabilized a failing production Flutter app by applying **BLoC + Clean Architecture**, fixing critical PostgreSQL/Supabase integration issues, and delivering pixel-perfect UIs under 2-week deadline.
- **Cross-Cloud Mobile Platform:** Built a scalable Flutter application deployed on **AWS, GCP, and Azure**, integrating multi-cloud microservices with PostgreSQL and NoSQL.
- **Real-Time Collaboration Tool:** Developed a **Flutter-based collaborative workspace** with VS Code Live Share integrations, enabling real-time co-editing and debugging features.
