

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative Senior Software Engineer with over 10 years of experience designing, developing, and deploying scalable mobile and web applications, specializing in **Flutter and Dart** for the past 4 years. Adept at creating intuitive user interfaces, optimizing app performance, and delivering cross-platform mobile experiences with seamless integration into RESTful APIs and cloud-native backends. Strong background in mentoring teams, driving Agile workflows, and leveraging **AWS, GCP, Firebase, SQL, and NoSQL** to deliver high-performing, customer-centric products. Fluent in English and an **Arabic speaker**, enabling effective collaboration across international teams and diverse user markets.

TECHNICAL SKILLS

- **Languages & Frameworks:** Flutter, Dart, JavaScript, TypeScript, Angular, React, Node.js, C#, .NET, Java, Python, PHP
- **Mobile Development:** Flutter SDK, Riverpod, Provider, Bloc, Redux, Firebase, CI/CD for mobile pipelines
- **Cloud & Infrastructure:** AWS (Lambda, S3, DynamoDB, RDS), GCP (Firestore, BigQuery, Cloud Functions), Azure, Firebase, Docker, Kubernetes
- **Databases:** SQL (PostgreSQL, MySQL, MSSQL), NoSQL (MongoDB, DynamoDB, Firestore, Redis)
- **DevOps & Tools:** Git, GitHub Actions, Bitbucket, Jira, Jenkins, Terraform, CloudFormation
- **Testing & QA:** Unit Testing, Widget Testing, Integration Testing, Jest, Cypress
- **Other:** RESTful APIs, GraphQL, WebSockets, Agile/Scrum, Microservices, High-performance systems

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded the development of enterprise-grade mobile apps using **Flutter and Dart**, delivering seamless cross-platform performance across iOS and Android with optimized UI/UX.
- Collaborated closely with designers and product managers to translate wireframes and business requirements into functional features, ensuring top-tier user experience.
- Architected **CI/CD pipelines** for Flutter mobile deployments using Firebase App Distribution and GitHub Actions, reducing release cycles by 40%.

- Implemented state management patterns (Bloc, Riverpod) to handle large-scale application states, resulting in smoother performance and improved maintainability.
- Integrated applications with **RESTful APIs, GraphQL, Firebase, and cloud-native services (AWS & GCP)**, ensuring robust and scalable connectivity for millions of requests daily.
- Mentored and reviewed code for junior developers, establishing best practices for clean architecture, widget testing, and performance profiling in Flutter apps.
- Diagnosed and resolved complex performance bottlenecks, memory leaks, and frame rendering issues, improving app responsiveness by 30%.
- Delivered **multilingual support (including Arabic)**, ensuring accessibility and inclusivity for diverse global user bases.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed highly interactive mobile applications using **Flutter/Dart and Angular**, optimizing UI components for responsiveness and performance.
- Engineered **mobile-first solutions** integrated with SQL and NoSQL databases, handling high-traffic data pipelines and secure transactions.
- Automated deployments through CI/CD, integrating Firebase, Jenkins, and cloud storage to streamline app delivery and monitoring.
- Built reusable Flutter components and UI libraries, significantly accelerating development timelines for multiple products.
- Collaborated with cross-functional teams on **Agile sprints**, aligning features with user stories and delivering iterative improvements.
- Enhanced app observability by implementing logging, crash analytics, and monitoring tools such as Firebase Crashlytics and Google Analytics.
- Implemented **offline-first architecture** with local storage synchronization, ensuring app usability in low-connectivity environments.
- Conducted performance benchmarking across Android and iOS builds, fine-tuning rendering layers and animations for fluid user interactions.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built scalable web and hybrid mobile applications using **Flutter (early adoption), Angular, and Node.js**, introducing reusable UI components to enhance modularity.
- Integrated **payment gateways, external libraries, and REST APIs** within Flutter mobile solutions, enabling seamless e-commerce experiences.
- Designed database schemas for SQL and NoSQL systems, improving query performance and reducing transaction response times.
- Applied **mobile performance optimization techniques**, including image caching, lazy loading, and efficient state management.
- Collaborated with UI/UX teams to implement pixel-perfect designs across multiple screen sizes, ensuring accessibility compliance.
- Conducted comprehensive testing (unit, widget, integration), delivering apps with less than 2% defect leakage post-release.
- Automated deployment workflows with Jenkins, Docker, and Firebase, reducing manual intervention in release cycles.
- Enhanced application scalability through **microservices** and modular architecture, supporting rapid feature expansion.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed hybrid mobile apps and enterprise dashboards using Flutter (beta), React, and REST APIs, aligning with Agile methodologies.
- Implemented **role-based authentication** and data encryption, ensuring secure access for enterprise clients.
- Optimized application builds by applying caching strategies and API response throttling, reducing app load times by 25%.
- Collaborated with QA teams to establish **automated regression testing suites** for mobile deployments.
- Supported system integrations with third-party vendors, including e-commerce, logistics, and financial services.
- Built and maintained continuous integration scripts, ensuring reproducible builds across multiple environments.
- Partnered with stakeholders to gather requirements and refine mobile product roadmaps.
- Delivered production-ready mobile apps with strong emphasis on performance, scalability, and maintainability.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in the development of mobile applications, gaining hands-on experience with **Flutter prototypes and Dart scripting**.
- Participated in debugging and refactoring activities, ensuring higher code quality and fewer runtime issues.
- Documented development processes, coding guidelines, and testing procedures for mobile apps.
- Contributed to integration of APIs, including authentication and external data sources.
- Collaborated with senior developers in Agile ceremonies, learning sprint planning and code review practices.
- Built proof-of-concept projects demonstrating early **cross-platform capabilities** of Flutter.
- Assisted in UI/UX prototyping, creating responsive layouts across Android and iOS devices.
- Gained foundational skills in mobile testing, CI/CD, and app store deployment workflows.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Google Flutter & Dart Developer Certification** – Google
- ❖ **AWS Certified Developer – Associate** – Amazon Web Services
- ❖ **Google Cloud Professional Cloud Developer** – GCP

- ❖ **Microsoft Certified: Azure Developer Associate** – Microsoft
 - ❖ **Certified ScrumMaster (CSM)** – Scrum Alliance
-

PROJECTS

- ✓ **Cross-Border Banking App (Flutter + Firebase + GCP):** Designed and deployed a multi-lingual mobile banking app with biometric authentication, integrated REST APIs, and real-time currency conversion.
- ✓ **E-Commerce Mobile Platform (Flutter + AWS + SQL/NoSQL):** Built a scalable shopping app supporting payments, cart synchronization, and offline-first features across iOS and Android.
- ✓ **Healthcare Mobile App (Flutter + CI/CD + Firebase):** Developed a HIPAA-compliant telemedicine app with integrated video calls, appointment scheduling, and Firebase-based analytics.
- ✓ **Smart Logistics App (Flutter + AWS Lambda + DynamoDB):** Delivered a logistics tracking app with push notifications, route optimization, and real-time shipment monitoring using AWS services.
