

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced Senior Software Engineer with 4+ years of dedicated mobile development and over 2.5 years in Flutter. Specialized in scalable, high-performance fintech applications with robust CI/CD pipelines and deep testing practices (unit, widget, BDD). Proven success leading modular Flutter projects with over 200+ packages, ensuring reusable architecture and seamless cross-platform performance. Strong collaboration in agile squads across design, backend, and product disciplines. Adept in Firebase, GitHub Actions, and remote-first environments.

TECHNICAL SKILLS

- Languages:** Dart, JavaScript, TypeScript, Kotlin, Swift, PHP
- Mobile Frameworks:** Flutter, React Native (basic)
- State Management:** Riverpod, Provider, Bloc, Redux
- Testing:** Unit Tests, Widget Tests, Golden Tests, BDD (Gherkin), Mockito
- CI/CD:** GitHub Actions, Fastlane, Firebase App Distribution
- Tools:** Firebase (Auth, Firestore, Crashlytics), REST, GraphQL, Docker
- Version Control:** Git, GitHub, GitLab
- Methodologies:** Agile, Scrum, TDD
- Other:** Modular Architecture, Fintech APIs, Firebase Analytics

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led development of fintech app's Flutter modules, managing over 300 packages and applying modular architecture for better scalability and code maintainability.
- Designed and implemented widget and unit tests across key flows using Flutter's testing framework, reducing production bugs by over 40% within 6 months.
- Integrated Firebase services such as Authentication, Firestore, and Crashlytics into Flutter apps, ensuring secure sign-ins, real-time data, and crash monitoring.
- Architected CI/CD pipeline via GitHub Actions and Fastlane to automate build and release processes for Android and iOS, cutting manual release time by 80%.
- Conducted code reviews, promoted reusable component development, and mentored junior Flutter developers in testing best practices and clean code principles.
- Coordinated cross-functional collaboration with backend engineers and designers using Figma, Postman, and Slack to ensure UI/UX fidelity and backend compatibility.

- Contributed to payment integration modules using Stripe APIs, handling transaction security, refund handling, and user error messages in compliance with PSD2.
- Participated in agile ceremonies, leading sprint planning and contributing to retrospectives, optimizing team velocity and backlog management.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed hybrid mobile apps using Flutter, targeting marketing automation and customer loyalty solutions integrated with backend CRM and analytics systems.
- Refactored legacy native code to Flutter, improving app maintainability and reducing platform-specific bugs across iOS and Android builds.
- Applied Riverpod and Bloc state management to manage complex UI states and business logic in an ad campaign scheduling system used by 10K+ daily users.
- Built automated test suites with Gherkin and Flutter BDD for campaign flows, reducing regression defects and increasing QA coverage by 60%.
- Collaborated on CI/CD scripts with GitHub Actions and Firebase App Distribution for nightly builds and QA testing feedback loops.
- Contributed to reusable component libraries and design system integration ensuring visual consistency and speed of development.
- Optimized Firebase Cloud Messaging for personalized notifications, resulting in a 25% increase in campaign engagement.
- Participated in GDPR compliance integration for user tracking and data handling via secure Firebase rules and analytics adjustments.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Built cross-platform mobile apps for real estate and logistics clients, eventually migrating native Android and iOS apps to Flutter for unified development.
- Integrated REST APIs, push notifications, and maps functionality using Flutter plugins for better customer engagement and real-time tracking.
- Introduced test-driven development processes for mobile projects, including golden tests for visual regressions and unit tests for input validation.
- Implemented Firebase Crashlytics and Analytics into multiple Flutter apps, allowing granular monitoring of crashes and app usage behavior.
- Used GitLab CI pipelines to automate testing, linting, and deployment stages, reducing release errors by 70% across app projects.
- Delivered features such as QR scanning, offline syncing, and signature capture using platform channels and third-party Flutter plugins.
- Contributed to knowledge-sharing sessions on adopting Flutter internally, facilitating migration strategy for existing mobile codebases.
- Performed performance profiling with Flutter DevTools to resolve UI jank and memory issues, improving app responsiveness significantly.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Assisted in early-stage mobile app prototyping using hybrid frameworks and native tools, laying the groundwork for future Flutter-based migrations.
- Collaborated closely with UI/UX designers to prototype dynamic interfaces for retail engagement apps, aligning closely with branding guidelines.
- Worked on integrating backend APIs and authentication modules using OAuth2 for secure app access control and user session handling.
- Maintained Android and iOS compatibility using conditional platform logic in hybrid code, before transitioning to cross-platform development stacks.
- Used Git for version control and actively contributed to code reviews and feature branching strategy in a small remote team setting.
- Helped onboard QA team to mobile testing suite, providing documentation for test cases and crash replication guides.
- Explored emerging cross-platform solutions like Flutter and Ionic to evaluate best approach for long-term mobile scalability.
- Documented app setup and developer onboarding processes, reducing ramp-up time for new mobile engineers.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported the development of mobile components for a logistics platform with early experimentation on Flutter beta during internal R&D.
- Participated in backend integration and front-end screen creation for warehouse and courier management apps using REST API.
- Developed automated test cases for delivery flows using early BDD tools, introducing structured behavior testing into the dev process.
- Worked under senior developer guidance on implementing barcode scanning and inventory tracking using mobile sensors.
- Maintained Flutter proof-of-concept builds as a part of company exploration into multi-platform strategies.
- Contributed to weekly sprint demos, sharing updates on mobile features and tracking bugs in Jira backlog.
- Documented onboarding steps for junior interns, building knowledge base for Flutter experimentation and deployment processes.
- Attended technical meetups and Flutter community events to stay updated with ecosystem advancements.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Flutter Developer Bootcamp with Dart – Udemy
 - ❖ Google Certified Associate Android Developer (AAD)
 - ❖ Firebase in a Weekend (Coursera)
 - ❖ GitHub Actions for CI/CD (LinkedIn Learning)
-

PROJECTS

- ✓ **Finflow – Flutter Fintech App (2023)**
Built and maintained a modular Flutter app for budget planning and bank integration, using Riverpod, Firebase Auth, and Plaid APIs. Launched to over 10,000 active monthly users.
- ✓ **CampaignHub – Cross-Platform Marketing Suite (2021)**
Created B2B Flutter mobile application to manage ad campaigns, using Bloc and Firebase Analytics. Integrated GitHub CI workflows and delivered to clients via Firebase App Distribution.
- ✓ **HomeFleet – Real Estate Management App (2019)**
Migrated native apps to Flutter for property listing, booking, and in-app messaging. Implemented widget testing and CI/CD with GitLab runners and Fastlane pipelines.
