

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-866410383/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Senior Frontend Engineer with over 9 years of experience delivering scalable, secure, and user-centric applications in healthcare, digital marketing, and enterprise sectors. Expertise in React, Vue.js, and Angular, with deep experience in building AI-integrated dashboards, real-time UI for clinical workflows, and LLM-triggering interfaces. Strong background in API integration, performance optimization, and data visualization using D3.js and Chart.js. Passionate about creating interfaces that adhere to accessibility standards and empower non-technical users. Proven track record of cross-functional collaboration in agile environments, delivering robust software under tight timelines.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, HTML5, CSS3, React, Vue.js, Angular, Node.js
- **Visualization:** D3.js, Chart.js, Highcharts
- **State Management:** Redux, Vuex, Context API
- **Testing:** Jest, Cypress, Mocha, RTL
- **DevOps & Tooling:** Git, GitHub, Azure DevOps, Webpack, Babel
- **CI/CD & Deployment:** Azure Pipelines, Docker
- **Accessibility & Compliance:** WCAG 2.1, PHI protection, GDPR
- **Design Tools:** Figma, Storybook, Material-UI, Ant Design

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Built clinician-facing dashboards using React and D3.js to visualize patient risk scores and care plans derived from AI pipelines.
- Integrated LLM workflows into frontends allowing hospital staff to auto-generate discharge summaries and triage suggestions securely.
- Led WCAG 2.1 compliance efforts across frontend apps, reducing accessibility incidents and improving inclusive user experience.
- Collaborated with backend teams to consume REST and GraphQL APIs for real-time updates on patient status and agentic task queues.

- Developed a file upload and monitoring module with chunked uploads and resumable sessions for EHR integration in medical systems.
- Translated Figma designs into responsive UIs using Material-UI and ensured pixel-perfect alignment for complex component layouts.
- Created Cypress and Jest-based testing pipelines with 85% test coverage, ensuring quality across continuous delivery cycles.
- Spearheaded component library development for healthcare workflows, establishing reusable patterns aligned with clinician UX studies.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed responsive React apps to manage campaign dashboards, utilizing Redux for persistent UI states across sessions.
- Delivered AI-integrated visual insights for client behavior analytics using Chart.js and integrated real-time monitoring APIs.
- Built Angular components for multi-tenant admin panels with healthcare client segments, customizing themes via SCSS modules.
- Improved rendering of large customer datasets by virtualizing DOM elements and optimizing JSON parsing pipelines.
- Collaborated with UI/UX teams on accessibility features including keyboard navigation, ARIA tagging, and high-contrast modes.
- Wrote Cypress regression suites covering business-critical paths including scheduling, consent tracking, and opt-out flows.
- Led frontend integration with backend microservices for health-related promotional programs and campaign tracking dashboards.
- Ensured compliance with GDPR and healthcare-specific data protection requirements in all UI components handling PHI.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built and maintained Vue.js-based monitoring dashboards for hospital logistics and internal resource management.
- Designed role-based permission control interfaces for admin-level users, syncing with backend RBAC APIs.
- Developed chart components with Chart.js and integrated filters for dynamic patient cohort data manipulation.
- Worked with designers to implement pixel-perfect component designs from Adobe XD and Figma, ensuring accessibility.
- Contributed to CI/CD pipelines using Azure DevOps to auto-deploy frontend modules in sandbox environments for QA teams.
- Integrated real-time socket connections for clinician alert systems, maintaining data freshness across tabs.
- Built onboarding wizard for healthcare operators with guided interactions and embedded video explanations.
- Refactored frontend modules for modularity and maintainability, reducing average bug resolution time by 25%.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Created healthcare admin dashboards in AngularJS with modules for task tracking and patient file upload management.
- Integrated Kafka-driven notification system into clinician UI to reflect lab result updates and task completions.
- Collaborated with backend engineers to build mock API services and conducted API contract alignment workshops.
- Designed charts and data tables to reflect aggregated test results, filtered by department and urgency flags.
- Participated in daily standups and agile retrospectives, providing frontend insights and quality recommendations.
- Assisted in performance testing of JavaScript codebase using Lighthouse and improved TTI by optimizing asset loading.
- Built responsive navigation and routing with Angular's ui-router for clinician tools module.
- Coordinated with QA on visual regression tests using Percy to catch layout issues across deployments.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Contributed to internal analytics dashboards for hospital sensor data streams, using React and Redux.
- Designed reusable UI components for patient tracking screens and batch admission log views.
- Collaborated with AI team to visualize ML outputs like patient clustering and readmission probabilities.
- Built low-code internal UI builder tool for business team to create dashboards from real-time data inputs.
- Helped migrate legacy jQuery dashboards to Vue.js, reducing code complexity and improving performance.
- Conducted UX audits of clinician-facing tools, recommending layout and font adjustments for readability.
- Maintained frontend CI pipeline using Jenkins and automated unit testing with Mocha + Chai.
- Participated in cross-team workshops to brainstorm UI features based on hospital partner feedback.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Clinical Agent Dashboard (Sensidev)** – Built an end-to-end React + D3.js interface for launching LLM tasks, uploading admission files, and tracking AI agent outputs, deployed in multiple European hospitals.
 - ❖ **Realtime Patient Risk Analyzer (Syscom Digital)** – Designed and deployed a frontend analytics portal for viewing AI-derived patient risk scores and triage recommendations with Chart.js and Redux.
 - ❖ **Healthcare Task Tracker (Soft Build)** – Developed a Vue.js platform to manage hospital staff tasks, synced with backend task schedulers, showing progress, alerts, and role-specific dashboards.
 - ❖ **Kafka Medical Event Stream UI (Decima Digital)** – Implemented clinician UI features for Kafka event tracking in hospital lab systems, displaying results dynamically using AngularJS and D3.
-

PROJECTS

- ✓ **Microsoft Certified: Azure Developer Associate**
- ✓ **Frontend Web Development Certification – freeCodeCamp**
- ✓ **Accessibility in Web Design – W3C**
- ✓ **Certified React Developer – Meta**
