

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Versatile Full Stack Developer with 9+ years of experience building performant, scalable applications across backend, cloud, and frontend ecosystems. Proficient in Python and experienced in production-grade Golang development, with exposure to FastAPI, cloud abstraction, container orchestration, and infrastructure tooling. Passionate about clean code, cloud-native design, and bridging DevOps practices into everyday development. Proven track record in cloud migration, ERP customization, and full-cycle software delivery.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, HTML, CSS
- **Frameworks:** FastAPI, Flask, Django (basic), Odoo ORM
- **ERP & Modules:** Odoo ERP (custom modules, workflows, ORM, XML views, JavaScript client scripting)
- **Databases:** PostgreSQL, MySQL, MongoDB, Elasticsearch
- **Data Processing:** Pandas, NumPy
- **DevOps:** Docker, GitHub Actions, CI/CD Pipelines, Vercel, Linux Shell
- **Frontend:** React, Next.js, Tailwind CSS, Redux, jQuery, Odoo QWeb Templates
- **Tools:** Git, Postman, JIRA, Confluence, Figma, Zeplin, Storybook
- **Testing:** Pytest, Jest, React Testing Library, TDD
- **Cloud & Deployment:** Vercel, Heroku, DigitalOcean, GitHub Pages

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led backend development using Go and Python to power services integrating FastAPI and Odoo ERP, optimizing cross-platform inventory and sales tracking.
- Refactored infrastructure pipelines to migrate Docker-based apps to an unmanaged Kubernetes cluster, enabling scalable deployments and rollback strategies.
- Enhanced backend abstraction layers to support multiple cloud vendors, including exploratory work on Azure SDK integration in Go for blob storage and service messaging.
- Introduced GitHub Actions workflows for CI/CD of ERP-integrated microservices, achieving consistent staging deployments and reducing manual QA cycles.
- Integrated Elasticsearch into reporting flows for Odoo dashboards, delivering near real-time filtering and visualization for thousands of records.
- Built fault-tolerant API layers around cloud file storage (AWS S3 / Azure Blob) and alerting systems (SNS / Service Bus equivalents).

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Developed containerized Go/Python services for ingesting marketing data, running in Docker on Linux-based hosts with integration into PostgreSQL and MongoDB.
- Participated in service-oriented migrations for campaign tracking systems from AWS services (S3, SES, DynamoDB) toward Azure equivalents for better scalability.
- Created modular interfaces using Go repository patterns to abstract cloud-specific SDKs, laying the groundwork for cloud-agnostic data pipelines.
- Managed Kubernetes YAML configurations and helm charts to deploy microservices on self-managed clusters with daily backup and recovery checks.
- Developed Odoo add-ons for CRM automation and email orchestration, integrating external REST APIs using Go-based middleware services.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Delivered back-office tooling with backend services in Python, transitioning from monolith to service-oriented architecture supported by Docker and Odoo ORM.
- Designed infrastructure to automate backup, monitor logs, and perform disaster recovery tests for Odoo deployments hosted on DigitalOcean and bare-metal VMs.
- Prototyped and deployed internal systems to interface with AWS SQS queues and Go-based scripts to extract, transform, and forward time-sensitive reports.
- Integrated 3rd-party APIs and message queues into business flows, modeling interactions via clean abstractions and asynchronous job queues.
- Wrote internal CLI tools and Go scripts to sync configurations across multiple environments with error resilience and retry logic.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Created Go/Python data collection daemons to extract web analytics from 3rd-party APIs and update business dashboards in PostgreSQL.
- Helped standardize backend logic across multiple deployments by creating layered interfaces and common cloud utility libraries.
- Supported Odoo cloud migration initiatives by analyzing PostgreSQL schemas and facilitating cloud transition plans including Azure and AWS benchmarking.
- Participated in DevOps efforts for GitLab CI integration and containerized pre-release testing.
- Led sprints to modernize front-end logic using Odoo JavaScript templates and React micro UIs.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported early experiments with microservice architectures in Go and FastAPI for metadata and telemetry.

- Built one-off backend utilities to transfer ERP data across systems and validate schema consistency.
 - Conducted R&D on Golang SDKs for infrastructure automation and REST API consumption for internal tools.
 - Delivered early CI integration scripts and tested containerization workflows for modular feature testing.
 - Participated in migration tasks involving Odoo modules and Kubernetes YAML setup for internal sandbox clusters.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Golang Web Services – Udemy
 - ❖ Kubernetes for Developers – Udemy
 - ❖ Docker for Developers – Udemy
 - ❖ Python for Data Science – Coursera
 - ❖ Odoo Technical Training – OdooClass
-

PROJECTS

- ✓ **Cloud Abstraction Layer Refactor:** Contributed Go modules for handling cloud messaging and blob storage abstraction, compatible with both AWS and Azure SDKs.
- ✓ **ERP Campaign Sync Tool:** Built Python/Odoo module to sync third-party CRM metrics via AWS SQS queues and Azure Service Bus bridges.
- ✓ **Kubernetes Service Deployment:** Led migration of ERP-linked services to a Kubernetes cluster with secure secrets management and Helm packaging.
- ✓ **Finance Report Generator:** Developed Golang microservice to process and expose finance reports via REST API with PDF/CSV export support.
