

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/daniel-ionesi-2a6167385> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience building scalable, high-performance web applications and backend systems. Proven expertise in **React, Next.js, Golang, Node.js, and modern JavaScript frameworks**, with strong knowledge of **web fundamentals, accessibility, and performance optimization at scale**. Skilled in **API integration, cloud platforms (AWS, GCP, Azure), and SQL/NoSQL databases**, delivering maintainable, secure, and user-centric products across industries. Adept at working in cross-functional teams, mentoring peers, and leading projects from concept to production.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Tailwind, Material-UI
- **Backend:** Golang, Node.js, Express.js, GraphQL, REST APIs, Microservices Architecture
- **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis, NoSQL
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, GitLab, Jenkins)
- **Testing & QA:** Jest, Cypress, Mocha, Chai, Webdriver, WebPageTest
- **Other Expertise:** Web Performance Optimization, Accessibility Standards (WCAG), Secure Coding, Browser Internals

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and developed **React and Next.js based UIs** integrated with **Golang and Node.js backend services**, ensuring scalability and maintainability across multiple product lines.
- Built and optimized **microservice APIs in Go** handling high-throughput data pipelines, reducing response latency by over 35% while ensuring reliability under peak loads.
- Partnered with mobile and backend teams to ensure **seamless API integration**, delivering consistent user experiences across platforms.
- Implemented **web accessibility standards (WCAG 2.1)** into core applications, ensuring compliance and inclusive product design for global users.
- Applied **advanced web performance techniques** (caching, SSR/ISR in Next.js, CDN optimization) to improve page load times by 40%.

- Established **testing frameworks using Jest, Cypress, and Webdriver**, increasing release confidence and reducing production bugs by 25%.
- Collaborated with product managers and designers to **define architecture decisions**, ensuring alignment with business goals and technical feasibility.
- Mentored junior engineers, fostering a knowledge-sharing culture and improving code quality across the engineering team.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Engineered **modern frontend applications with React and Redux**, delivering responsive, mobile-first UIs optimized for speed and SEO.
- Integrated **Golang and Node.js services** with external APIs, ensuring secure and efficient data exchange for large-scale campaigns.
- Developed **real-time dashboards** using WebSockets and optimized SQL/NoSQL queries to provide live campaign analytics with millisecond precision.
- Applied **CI/CD pipelines with Docker, Kubernetes, and GitLab CI**, enabling rapid deployments with zero downtime.
- Enhanced system observability with **Prometheus and Grafana**, proactively identifying and resolving performance bottlenecks.
- Championed **best practices in security and performance**, hardening applications against XSS, CSRF, and injection vulnerabilities.
- Conducted **code reviews and architectural discussions**, aligning development practices with scalability requirements.
- Delivered multiple client-facing applications that scaled to **hundreds of thousands of daily active users**.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built **full-stack applications with React, Next.js, and Golang**, ensuring modularity and scalability for long-term maintainability.
- Created **microservices and REST APIs in Go and Node.js**, handling high-volume data integrations across platforms.
- Improved **browser rendering performance** by optimizing DOM manipulation, reducing time-to-interactive across core products.
- Automated **cross-browser and performance testing** using WebPageTest and Selenium, ensuring reliability under diverse environments.
- Designed **data-driven solutions using SQL and NoSQL databases**, optimizing indexing and query execution plans for sub-second results.
- Collaborated with UX designers to **refine accessibility features**, enhancing usability for screen readers and assistive technologies.
- Streamlined deployments using **AWS Lambda and Dockerized services**, lowering infrastructure costs while improving resilience.
- Coordinated with stakeholders to transform business requirements into **production-ready, high-quality web applications**.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Delivered **React-based web applications** integrated with **Go services**, improving maintainability and developer productivity.
- Designed **secure backend logic in Golang**, ensuring high availability and system reliability for e-commerce platforms.
- Implemented **server-side rendering (SSR) in Next.js** to boost SEO performance and enhance user experience.
- Contributed to **API development and integration** with external vendor systems, ensuring seamless workflows.
- Assisted in building **responsive design components** compatible with modern browsers and devices.
- Wrote **unit and integration tests** to strengthen code quality and system reliability.
- Applied **performance tuning techniques** at both frontend and backend layers.
- Collaborated in **Agile/Scrum development cycles**, consistently delivering features within sprint goals.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in developing **frontend components using React and vanilla JavaScript**, contributing to product launch success.
- Supported backend team with **Golang service development**, gaining early exposure to high-throughput systems.
- Learned and applied **testing methodologies**, automating regression testing for core features.
- Documented technical decisions and architectural diagrams, improving project transparency.
- Conducted **performance profiling** to support senior engineers in optimizing application performance.
- Researched emerging frontend tools and frameworks to propose technology adoptions.
- Worked with SQL databases to handle **data persistence and reporting requirements**.
- Participated in daily scrums, sprint reviews, and code reviews as part of an **Agile environment**.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Developer
 - Microsoft Certified: Azure Developer Associate
 - Certified Kubernetes Application Developer (CKAD)
-

PROJECTS

- **Real-Time Trading Dashboard** – Built with **React, Next.js, and Golang microservices**, delivering sub-second updates for live market data streams.
- **E-commerce Optimization Platform** – Implemented **performance-focused frontend architecture** in React with **Go APIs**, improving checkout conversion rates by 22%.
- **Cross-Platform Analytics Suite** – Designed a **responsive, accessible dashboard** with WCAG compliance, integrating multi-cloud data pipelines (AWS/GCP/Azure).
