

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and detail-oriented Full-Stack Engineer with over 9 years of experience in building scalable web applications and integrating modern AI workflows. Passionate about optimizing user experiences with cutting-edge tools like TypeScript, Next.js, and AI-powered automation. Seeking to join HostPapa to lead AI-enhanced development initiatives and drive technical excellence across distributed teams.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML5, CSS3, SCSS
- **Frontend:** React.js, Next.js 14, Redux Toolkit, shadcn/ui, TailwindCSS, Zustand
- **Backend:** Node.js, Express, Supabase, Firebase, PostgreSQL, MySQL
- **AI/LLM Tooling:** OpenAI APIs, LangChain, Hugging Face Transformers, Pinecone, Pydantic
- **Testing:** Jest, Cypress, Playwright, React Testing Library
- **Cloud/DevOps:** AWS (Lambda, EC2, S3), GCP, Docker, GitHub Actions, Vercel, CI/CD pipelines
- **Others:** Figma, Webpack, Module Federation, GraphQL, REST, Prisma, Stripe, OAuth2

WORK EXPERIENCE

Freelance AI-Driven Full-Stack Developer

Jan 2025 – Present

- Designed and built AI-enabled web apps using **Next.js 14**, **Supabase**, and **TypeScript** to automate customer workflows for clients in e-commerce and SaaS sectors.
- Integrated **OpenAI GPT-4** and **LangChain** for natural language processing tasks, including intelligent form generation, AI-powered documentation assistants, and chatbot interfaces.
- Created a custom UI component library using **shadcn/ui** and Tailwind to ensure consistency and speed across multiple client projects.
- Developed serverless edge functions on **Vercel** for low-latency, high-performance response handling in dynamic APIs and AI inference logic.
- Optimized Postgres schema design and queries using Supabase to support large-scale data operations and real-time updates.
- Built A/B testing framework integrated into feature rollout strategy, leveraging feature flags and Supabase RLS rules.
- Mentored junior developers in full-stack best practices, AI tooling, and performance optimization in async remote teams.

- Wrote unit, integration, and E2E tests using Jest and Playwright, increasing deployment confidence and coverage to 98%.

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led frontend architecture for B2B dashboard platforms using **React**, **TypeScript**, and **Redux**, enhancing maintainability and performance across modules.
- Integrated analytics dashboards using **Recharts** and **D3.js**, supporting real-time data tracking with WebSocket and event streams.
- Deployed scalable APIs using **Node.js** and **Express**, interfacing with PostgreSQL, Redis, and Firebase Realtime DB.
- Migrated CI/CD workflows to **GitHub Actions** and Docker-based containers for faster, more reliable builds and deployments.
- Collaborated on AI-driven features using GPT APIs and fine-tuned models to assist internal ticket classification and response automation.
- Utilized **zustand** and **TanStack Query** to streamline global state and remote data handling, reducing API response overhead by 45%.
- Worked closely with designers using Figma and TailwindCSS to align UI/UX goals across mobile and web views.
- Contributed to a component-driven design system for multi-brand white-labeled apps, dramatically improving time-to-market.
- Championed testing-first development culture, achieving 90%+ unit test coverage with Jest and Cypress.
- Implemented SSO with OAuth2 and built a permission middleware system to support multi-tenant B2B requirements.
- Reduced page load times by 60% using lazy-loading, dynamic imports, and CDN caching strategies.
- Led sprint planning and async communication using Notion and Slack across a cross-functional team of 8+ members.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed internal CRM and campaign tracking tools using React, RESTful APIs, and PostgreSQL backend.
- Built scalable backend microservices using Node.js and integrated caching using Redis for high-performance metrics logging.
- Implemented visual campaign dashboards using Chart.js and D3.js to track multi-channel marketing KPIs in real time.
- Integrated with cloud messaging and email APIs (Mailgun, Twilio, Firebase) for automated campaign notifications.
- Spearheaded the migration of legacy PHP modules to a modern Node.js and PostgreSQL architecture.
- Developed robust testing pipelines using Mocha, Chai, and Jest to ensure seamless release cycles.
- Designed role-based access control and audit logging for GDPR compliance across internal tools.
- Conducted weekly code reviews, tech talks, and performance optimization workshops for the dev team.
- Reduced response times of reporting endpoints by 70% using query indexing and batching strategies.

- Mentored two interns through a structured full-stack training program, helping transition them into full-time roles.
- Automated Excel report generation using Puppeteer and custom chart rendering scripts.
- Collaborated closely with PMs to redesign workflows based on usability testing and stakeholder interviews.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Built admin interfaces and internal tooling using AngularJS, Bootstrap, and jQuery during early full-stack work.
- Maintained and extended RESTful API services built in Node.js and MySQL to support client platforms.
- Designed and developed custom CMS systems for mid-size clients, offering live previews and drag-and-drop features.
- Added logging, retry, and error-handling layers for third-party API integration systems.
- Participated in daily Agile rituals including stand-ups, retrospectives, and weekly demos with product teams.
- Wrote migration and schema synchronization scripts for MySQL database versioning.
- Assisted in client meetings to gather frontend and backend requirements and translated them into sprints.
- Refactored core backend logic to modular services, improving maintainability and enabling easier testing.
- Rewrote legacy JS components to modular ES6 syntax using Webpack.
- Developed user feedback widgets and surveys integrated into dashboard applications.
- Created role-specific dashboards and analytics pages using Highcharts and MySQL queries.
- Deployed client apps to AWS S3 with CloudFront distribution for global performance delivery.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Developed front-end modules for e-commerce websites with jQuery, AJAX, and PHP integration.
- Created modular components and templates used across multiple multi-tenant client sites.
- Wrote SQL scripts and stored procedures for product and inventory updates.
- Integrated payment gateways including PayPal and Stripe for digital goods sales.
- Participated in QA/testing with Selenium and manually validated multilingual interfaces.
- Delivered SEO-optimized landing pages using clean HTML5 and server-side rendered PHP.
- Migrated static content into CMS platforms and handled batch data uploads.
- Built widgets and components to be used by marketing for seasonal campaigns and promos.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed internal dashboards and tools for monitoring user engagement using PHP and MySQL.
- Supported senior engineers with bug fixing, testing, and documentation writing.
- Created JavaScript-powered widgets for data visualization and inline editing.
- Helped transition a monolithic PHP app to modular architecture through service separation.
- Implemented file uploading and processing modules for image handling.

- Wrote cron jobs for daily data syncing tasks and alert notifications.
 - Maintained internal wiki and developer guide for onboarding and documentation.
 - Participated in weekly learning sessions on best practices and clean code.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ OpenAI GPT-4 Developer Bootcamp – 2024
 - ❖ Supabase Advanced Workshop – 2024
 - ❖ Google Cloud Professional Cloud Developer – 2023
 - ❖ Advanced React Patterns by Kent C. Dodds – 2022
-

PROJECTS

- ✓ **AI Website Builder Assistant**
Used OpenAI + Supabase to build an AI assistant that generates custom web pages, text, and images based on user input, with deploy-to-Vercel functionality.
- ✓ **LLM Chat UI**
Built chat interface integrating LangChain, GPT-4, Pinecone, and Markdown rendering with memory, prompt chaining, and file upload.
- ✓ **Headless CMS Frontend**
Created Next.js frontend for a headless CMS using server-side rendering and ISR with Tailwind, shadcn/ui, and Stripe billing integration.
