PROFESSIONAL SUMMARY

Product-focused Senior Frontend Engineer with 8+ years of experience in delivering scalable, performant, and user-centric applications using React, JavaScript, TypeScript, and Next.js. Proven success collaborating cross-functionally in fast-paced Agile teams to design and implement platforms that simplify complex domains like real estate, finance, and digital media. Strong foundation in CI/CD, AWS cloud infrastructure, testing, and software architecture.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), TypeScript, React, Next.js, Redux, Zustand, HTML5, CSS3, SCSS, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, FastAPI, Python
- **Cloud & DevOps:** AWS (Lambda, S3, CloudFront, API Gateway), GCP, Docker, GitHub Actions, Vercel, Netlify
- **Testing:** Jest, React Testing Library, Cypress, Playwright, Pytest
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB (NoSQL), Redis
- **Tools:** Git, GitHub, Jira, Figma, Postman, VS Code

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led frontend development of client-facing portals using React and Next.js, optimizing component reuse and scalability across mortgage and real estate dashboards.
- Built high-performing CI/CD pipelines with GitHub Actions, integrated with AWS Lambda and S3, reducing deployment time and manual errors by over 40%.
- Collaborated directly with product managers and UI/UX designers to implement modern and accessible design systems, aligning with WCAG 2.2 AA standards.
- Integrated AWS services like Cognito, API Gateway, and DynamoDB into the frontend stack to enhance data security and performance across multiple regions.
- Designed a shared component library in TypeScript that streamlined feature rollout across teams and ensured visual consistency across the platform.
- Drove the adoption of testing practices by setting up Jest and Cypress from scratch, resulting in 85% frontend test coverage and stable releases.

- Implemented server-side rendering and static generation with Next.js for marketing and landing pages, reducing initial page load times by 60%.
- Mentored junior developers in React patterns and architecture best practices, leading to a 30% improvement in delivery velocity and fewer code reviews.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Built web apps and marketing campaign dashboards with React and TypeScript, enabling real-time analytics and KPI tracking for media clients.
- Developed reusable UI modules integrated with custom CMS and embedded APIs, improving cross-project maintainability and speeding up future rollouts.
- Created mobile-responsive interfaces that supported localization and RTL layout for international clients across 4+ countries.
- Worked closely with the backend team to design efficient API contracts and integrated GraphQL endpoints to reduce redundant client-server calls.
- Ensured smooth delivery of frontend features through Dockerized environments and GitLab CI/CD pipelines in staging and production.
- Integrated AWS CloudFront and S3 for asset delivery, enhancing static file loading time by up to 70% in mobile-heavy usage environments.
- Ran weekly frontend syncs with designers and PMs to prioritize user experience optimizations, leading to 35% higher customer engagement metrics.
- Introduced Redux Toolkit to simplify state management and reduce boilerplate, improving team code consistency across modules.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed B2B platforms in React and Vanilla JS for logistics and real estate workflows, focusing on intuitive UI/UX aligned with client goals.
- Designed and maintained interactive mapping and search interfaces that handled large datasets from PostgreSQL and MongoDB sources.
- Engineered RESTful APIs in Node.js and Express, integrating business logic and permissions for real-time collaboration tools.
- Set up automated test suites using Jest and Enzyme, improving bug detection and reducing QA cycles.
- Coordinated release planning and versioning strategies, enabling modular deployments and continuous feedback cycles.
- Built and maintained shared configuration and styleguide systems to enforce visual consistency and accessibility best practices.
- Optimized Lighthouse performance scores by restructuring bundle sizes, eliminating render-blocking resources, and reducing JavaScript bloat.
- Integrated webhooks and microservices for payment and messaging modules, boosting platform reliability across B2B transactions.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Delivered e-commerce frontend features using React and jQuery, contributing to checkout optimization and product catalog UX.
- Collaborated with design and QA teams on A/B testing strategies for UI components to refine shopping flow efficiency.
- Improved search engine visibility through structured data, meta tag automation, and accessibility improvements for screen readers.
- Refactored legacy codebase into modular components to increase maintainability and improve onboarding for new team members.
- Built performance benchmarks for page transitions and interactions to establish baseline UX metrics used in quarterly reviews.
- Integrated frontend event tracking with Google Tag Manager and Mixpanel, supporting cross-channel analytics dashboards.
- Coordinated with backend engineers to design mobile-first API contracts tailored for PWA use cases.
- Supported project deployment with version tagging, environment segregation, and rollout schedules managed via Jenkins pipelines.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Built internal dashboard tools and reusable components using React, Bootstrap, and RESTful APIs under senior mentorship.
- Contributed to frontend logic and custom widgets in the company's ERP system, improving UI performance and form usability.
- Created documentation and training materials to onboard new users and internal testers during feature rollouts.
- Performed manual QA and wrote unit tests for legacy modules, contributing to improved software stability.
- Developed analytics modules visualizing sales and inventory data from MySQL databases using D3.js and Chart.js.
- Participated in sprint planning and retrospectives, gaining hands-on experience with Agile methodology and team communication.
- Integrated OAuth-based authentication and role-based permission layers to support scalable access control.
- Used Git for version control and contributed to weekly code reviews with detailed feedback and refactoring suggestions.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services
 - Advanced React & Redux – Udemy
 - TypeScript: The Complete Developer's Guide – Udemy
 - Introduction to Google Cloud Platform – Coursera
-

PROJECTS

Property Management SaaS Platform

- Developed React-based interface for agents and brokers with real-time property management features, integrated with AWS backend and multi-tenant logic.
- Led implementation of CI/CD pipelines and Docker-based dev environments to support 3 cross-functional teams.

Mortgage Broker Portal

- Built scalable UI with Next.js and React, implementing SSR for performance and SEO.
- Integrated AWS Cognito for secure authentication and S3 for file uploads, ensuring fast and secure user interactions.
