

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 9+ years of hands-on experience in full-stack enterprise application development with a focus on Java (Spring Boot), Angular, and REST APIs. Skilled in building scalable backend systems, responsive frontend applications, and complex SQL integrations. Proficient in analyzing functional requirements, collaborating with business departments, and delivering multilingual software solutions in agile environments. Proven ability to work independently and engage in technical discussions with international clients. German language proficiency at B2 level.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, SQL, HTML, CSS, Bash
- **Frameworks & Libraries:** Spring Boot, Angular, Vue.js, React, JPA, Hibernate, REST, JWT, RxJS
- **Databases:** PostgreSQL, Oracle, MySQL, MSSQL, MongoDB
- **Dev Tools:** Git, Docker, Jenkins, Maven, Gradle, Postman, Jira, Figma
- **Cloud & DevOps:** Azure, Firebase, Linux, CI/CD, Nginx
- **Concepts:** RESTful API design, Microservices, Material Design, TDD, SPA, Responsive UI

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Engineered multiple RESTful backend services using Spring Boot and Java 17, enabling seamless integration with external financial APIs and streamlining multi-system data synchronization.
- Designed and implemented Angular-based Single Page Applications (SPA) for enterprise clients, using RxJS, Angular Material, and custom state management for responsiveness and performance.
- Worked directly with German-speaking clients to clarify vague Jira tickets, identify technical gaps, and provide implementation strategies aligned with business requirements.
- Led backend design for a microservices architecture, including authentication (JWT), rate limiting, and data caching layers with Redis to optimize performance under load.
- Wrote optimized SQL queries and managed schema evolution for PostgreSQL and Oracle DBs, including use of views, stored procedures, and triggers.
- Collaborated in cross-functional teams and advised project stakeholders on best architectural patterns for scalable feature development and deployment pipelines.

- Mentored junior engineers on Spring Boot, REST architecture, and frontend Angular testing using Jasmine/Karma to elevate code quality across the team.
- Maintained high code quality and test coverage through rigorous unit and integration testing practices while supporting live deployment environments using Docker and Azure Pipelines.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed business-critical APIs and backend services using Spring Boot, integrating Oracle and MySQL databases with high-performance query design.
- Delivered custom-built Angular SPAs for marketing automation platforms, incorporating user-centric design principles and reactive UI components.
- Participated in sprint planning and user story refinement sessions with German-speaking clients to ensure accurate technical solutions aligned with business logic.
- Refactored legacy codebases into modular Spring components, reducing technical debt and improving maintainability across multiple modules.
- Employed OAuth2 and JWT for secure authentication flows in B2B service portals integrated with third-party identity providers.
- Conducted code reviews, continuous integration, and deployments with Jenkins, Docker, and Git for an agile delivery cycle.
- Improved application performance by optimizing database indexing strategies and minimizing costly joins across transactional data.
- Wrote technical documentation and UML diagrams outlining component interactions, REST contract structures, and deployment specifications.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Implemented full-stack features using Java (Spring Boot), REST APIs, and responsive Angular components integrated with Oracle and PostgreSQL databases.
- Migrated legacy UI to Angular 7 SPA, improving user experience, loading speed, and responsive design for mobile and desktop users.
- Created and maintained Materialized Views and complex stored procedures for analytical dashboards and reporting subsystems.
- Designed REST endpoints to manage configuration settings and workflow orchestration across distributed applications.
- Wrote custom JPA queries and utilized Hibernate caching for performance-critical sections in high-traffic customer portals.
- Contributed to functional requirement analysis and provided technical estimates for new feature implementation in sprint planning sessions.
- Created Angular form components with reactive validation and real-time API integration for insurance and claim processing flows.
- Assisted in integration testing and end-to-end test setup using Selenium for frontend flows and JUnit for backend services.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed RESTful APIs in Spring Boot for document management systems supporting search, versioning, and user role-based access.
- Built reusable UI components in Vue.js to enhance productivity tools for internal staff and third-party integrations.
- Implemented user authentication workflows with Spring Security, covering password recovery, session handling, and access tokens.
- Maintained backend deployment infrastructure using Jenkins CI and Docker for staging and production releases.
- Wrote complex SQL queries for PostgreSQL and improved indexing on large tables, reducing response times on key API endpoints.
- Participated in requirement gathering with business stakeholders and translated user needs into modular backend features.
- Contributed to early prototypes of mobile support using responsive layouts and conditional rendering for desktop/tablet views.
- Documented backend logic and database schemas in Confluence to support team onboarding and knowledge transfer.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported development of internal tools using Java Spring and MySQL, assisting in backend debugging and CRUD API testing.
- Helped refactor legacy JSP modules into REST endpoints and Angular components, improving maintainability and responsiveness.
- Participated in QA testing, wrote bug reports, and reproduced issues for cross-browser inconsistencies in frontend modules.
- Engaged in daily standups and retrospectives to follow Agile Scrum practices and improve team delivery cadence.
- Integrated basic Google Analytics tracking and error monitoring scripts into Angular dashboards for usage analysis.
- Supported localization of web interfaces for multilingual clients, including English, German, and Estonian variants.
- Worked under senior developer guidance to understand design patterns and industry-standard coding conventions.
- Documented workflows and created internal wiki pages for onboarding junior interns to the stack and development process.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Oracle Certified Professional: Java SE 11 Developer
 - ❖ Spring Professional Certification – Pivotal
 - ❖ Angular – The Complete Guide (Udemy)
-

PROJECTS

- ✓ **HR Self-Service Portal**
Led the development of a self-service HR portal used by 10k+ employees, integrating RESTful Spring Boot APIs with Angular SPA. Included multilingual UI, Oracle DB backend, and secure OAuth login.
- ✓ **Financial Workflow Engine**
Designed and implemented a Java-based microservice that processed financial transactions from multiple banks, integrating Oracle stored procedures, Angular dashboards, and client-specific APIs.
- ✓ **Material Management System**
Created a quality management system to monitor material usage and supplier compliance. Backend built with Spring Boot, frontend with Angular, including advanced charting and auditing modules.
