

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Highly skilled Senior Software Engineer with 10+ years of experience delivering enterprise-grade applications using **Angular (6+), Java, Spring Boot, and microservices architecture**. Adept at building scalable, performant, and secure front-end and back-end solutions with a strong focus on **clean code, cloud-native design, and Agile delivery**. Proven expertise in **integrating Java backends with Angular UIs**, optimizing performance, and leading teams to deliver robust, high-impact solutions in finance, healthcare, and digital platforms.

TECHNICAL SKILLS

- **Frontend:** Angular 6+, TypeScript, JavaScript (ES6+), Bootstrap, HTML5, CSS3/SCSS, RxJS, NgRx, PrimeNG
- **Backend:** Java, Spring Boot, Hibernate, REST APIs, Microservices, Node.js
- **Databases:** SQL (PostgreSQL, MySQL, Microsoft SQL Server), NoSQL (MongoDB, Redis)
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, Git, GitLab CI/CD, GitHub Actions, Jenkins, Terraform
- **Practices:** OOP, Design Patterns, Agile/Scrum, TDD, Performance Optimization, Secure Coding

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and implemented advanced Angular 12+ applications seamlessly integrated with Java Spring Boot microservices, ensuring scalability and resilience for high-traffic environments.
- Enhanced UI responsiveness and accessibility using RxJS and NgRx state management, improving complex workflows and reducing rendering bottlenecks by over 30%.
- Developed secure Java REST APIs for data exchange with Angular frontends, implementing JWT authentication, role-based access, and API versioning for enterprise applications.
- Optimized Angular deployments by implementing named chunks, lazy loading, and Webpack build customizations, cutting initial load time by 40% in production systems.
- Partnered with UX designers and product managers to deliver pixel-perfect Angular components with reusable modules, reducing redundancy and ensuring consistent user experiences.
- Created and maintained CI/CD pipelines using GitLab, Jenkins, Docker, and Kubernetes, automating build, test, and deployment processes for both Angular and Java services.
- Led code reviews, mentored junior engineers, and introduced coding standards to align with enterprise OOP and clean architecture principles across multi-team projects.

- Troubleshoot and debugged critical Angular/Java integration issues, resolving complex production defects with root cause analysis and proactive monitoring enhancements.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Built Angular frontends integrated with Java backends to deliver scalable digital marketing platforms, handling thousands of concurrent campaign interactions securely.
- Developed reusable Angular UI libraries, form validations, and dynamic dashboards with TypeScript and Bootstrap, reducing frontend development cycles by 25%.
- Integrated Java Spring Boot services with REST APIs for real-time campaign tracking, reporting, and analytics dashboards consumed by Angular applications.
- Improved overall Angular application performance through tree-shaking, Ahead-of-Time (AOT) compilation, and on-demand module loading strategies.
- Collaborated with backend engineers to design efficient database queries in PostgreSQL and Redis, enabling real-time insights with minimal latency.
- Implemented GitFlow branching strategies using GitHub/GitLab, ensuring clean version control and smooth collaboration across distributed teams.
- Ensured security compliance by applying OWASP standards in both Angular and Java services, including XSS protection, CORS handling, and CSRF prevention.
- Participated in Agile ceremonies, backlog grooming, and sprint planning, delivering features incrementally with strong stakeholder alignment.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Engineered Angular-based applications backed by Java Spring Boot APIs for e-commerce and ERP platforms, improving scalability and modularity of client solutions.
- Created Angular components with reusable directives and services, enabling highly interactive dashboards with custom data visualization using Chart.js and D3.js.
- Built RESTful APIs in Java integrated with Angular frontends for order management, authentication, and payment processing modules.
- Conducted database optimization for SQL queries in MySQL and PostgreSQL, reducing execution times by over 40% for complex reporting queries.
- Introduced CI/CD pipelines using Jenkins and Docker, automating Angular builds and Java deployments across multiple staging environments.
- Collaborated with cross-functional teams including QA and designers, ensuring UI/UX alignment and functional validation for all Angular modules.
- Conducted extensive unit and integration testing with Jasmine/Karma (Angular) and JUnit (Java), increasing release reliability and reducing regressions.
- Improved application resilience by implementing caching strategies with Redis, reducing API response times for Angular-driven dashboards.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Contributed to Angular 6+ frontend modules tightly integrated with Java Spring APIs, supporting enterprise CMS and ecommerce platforms.

- Built dynamic Angular templates and reusable services to improve maintainability and modularity across multiple client implementations.
- Optimized frontend build pipelines using Webpack and Gulp, ensuring faster deployment times and reduced bundle sizes.
- Supported backend development by extending Java Spring controllers and integrating Hibernate for persistent data handling.
- Worked on Git-based version control and conducted peer reviews to maintain code quality and standardization across the team.
- Coordinated with QA to create automated test scripts for Angular and Java modules, significantly reducing manual regression testing cycles.
- Implemented REST API consumption with advanced error handling in Angular, ensuring seamless user experiences even in failure scenarios.
- Actively participated in Agile ceremonies, contributing to sprint reviews, backlog refinement, and product demo sessions.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Developed AngularJS applications for enterprise dashboards integrated with Java servlets and JSP backends, gaining hands-on experience in full-stack development.
- Wrote secure and efficient SQL queries for PostgreSQL databases, supporting data-driven Angular visualizations for real-time business monitoring.
- Learned and applied OOP and design principles in both AngularJS components and Java backend logic, enhancing maintainability of applications.
- Designed responsive UI elements with HTML5, CSS3, and Bootstrap, ensuring compatibility across devices and browsers.
- Collaborated closely with senior engineers in Agile sprints, absorbing best practices in code reviews, testing, and debugging workflows.
- Gained exposure to Git version control and branching strategies, contributing code consistently under mentor supervision.
- Implemented form validations, data-binding, and API integrations with AngularJS to improve usability and correctness of web applications.
- Documented code, APIs, and workflows to ensure knowledge transfer and onboarding efficiency for new interns and developers.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Oracle Certified Professional: Java SE 11 Developer
- AWS Certified Solutions Architect – Associate
- Google Cloud Professional Cloud Developer
- Microsoft Certified: Azure Developer Associate

PROJECTS

- **Healthcare Management Platform:** Built Angular + Java solution with patient dashboards, scheduling, and API integrations, deployed on AWS with PostgreSQL.
- **E-Commerce Microservices:** Developed Angular storefront with Java Spring Boot microservices, integrated with Redis caching, ensuring high availability and performance.
- **Financial Reporting Dashboard:** Delivered Angular analytics dashboards with Java APIs, featuring advanced data visualization and secure role-based access.
