

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative Technical Lead and Full Stack Engineer with over 10 years of experience driving development lifecycles from concept to deployment for enterprise platforms. Adept at leading teams, architecting robust systems with Java, Spring Boot, and Angular, and integrating cloud-based microservices using AWS and Docker. Demonstrates success in financial software delivery, Agile environments, and DevOps practices while mentoring engineers and enforcing API governance. Known for delivering scalable, secure, and performance-optimized applications in production environments with a pragmatic, customer-focused mindset.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Frameworks:** Spring Boot, Angular, FastAPI, Flask, Django, Node.js
- **Architecture:** Microservices, 12-Factor App, REST/SOAP APIs, OAuth2
- **Cloud & DevOps:** AWS, Docker, OpenShift, GitHub Actions, Git, Maven, Ansible, BitBucket, Artifactory, Bamboo
- **CI/CD & Tools:** Jenkins, GitHub Actions, Vercel, JIRA, Confluence, Postman, Swagger, OpenAPI
- **Databases:** PostgreSQL, MySQL, MongoDB, Elasticsearch
- **Frontend:** Angular, React, Next.js, Tailwind CSS, jQuery, Odoo QWeb Templates
- **Testing:** JUnit, Mockito, Pytest, Jest, TDD, React Testing Library
- **Security:** API Security Best Practices, OWASP Guidelines

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led the full lifecycle development of financial data modules using FastAPI, PostgreSQL, and Docker, ensuring compliance with European financial reporting standards.
- Mentored a distributed engineering team, reviewed pull requests, and introduced test-driven development practices to elevate code quality and coverage across services.
- Architected microservice workflows integrating Odoo ERP, Elasticsearch, and external APIs to support financial CRM dashboards, boosting search and load times by over 60%.
- Designed and maintained CI/CD pipelines with GitHub Actions and Docker, automating production deployments and reducing staging bugs by over 50%.
- Implemented role-based API authentication using OAuth2 and JWT, enforcing multi-tenant access control across financial modules handling sensitive account data.

- Collaborated with product managers and QA teams in sprint planning and retrospectives, shaping roadmap milestones and aligning technical delivery with business objectives.
- Conducted performance tuning and stress testing to improve API response under load, ensuring applications scaled to handle peak transactional volumes without failure.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed backend infrastructure for marketing finance platforms, using FastAPI and PostgreSQL to ingest and normalize CRM and email campaign data from third-party APIs.
- Developed API gateway enhancements supporting smart caching and dynamic routing rules, reducing latency by 40% and improving throughput under concurrent traffic loads.
- Customized Odoo ERP add-ons to enable segmentation of financial clients, automating follow-ups, lead prioritization, and triggering workflows from analytics triggers.
- Built secure APIs with audit logging and encryption of PII, aligning backend services with data protection regulations and internal risk analysis frameworks.
- Created Python ETL pipelines with Pandas to analyze spending trends across campaigns, auto-generating performance dashboards used in investor presentations.
- Deployed local dev and testing environments using Docker Compose and CI workflows, standardizing team deployments and minimizing environment-related defects.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Engineered HR and finance ERP features using Java and Python with PostgreSQL, automating payroll processing, resource allocation, and monthly cost tracking.
- Refactored legacy backend logic to align with 12-factor architecture, reducing service complexity, dependency issues, and improving modularity for deployment scaling.
- Developed RESTful APIs and integrated Java Spring Boot modules to support invoice generation and journal reconciliation workflows.
- Administered on-premise deployments of Odoo ERP using Docker and Linux cron jobs, implementing daily backup and monitoring scripts to ensure service continuity.
- Connected third-party APIs (Mailgun, Google Drive, Zoho CRM) to internal modules with robust error handling and retry mechanisms ensuring financial record reliability.
- Contributed to internal process improvements by introducing documentation practices, mentoring junior devs, and streamlining onboarding for ERP feature contributors.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Developed backend services in Python to scrape financial data and feed PostgreSQL for use in real-time analytics dashboards consumed by business teams.
- Assisted in cross-version Odoo ERP upgrades for mortgage and lending platforms, resolving module dependency issues and enhancing compatibility with newer standards.
- Rebuilt frontend behaviors using JavaScript to integrate real-time loan status updates within ERP portals accessed by clients and account officers.

- Streamlined financial transaction reconciliation scripts by leveraging ORM-level optimizations and simplifying data cleanup operations.
- Contributed to containerized build workflows using GitLab CI and Docker, ensuring consistent QA/test staging across distributed project environments.
- Engaged in sprint reviews and participated in technical decision-making to align ERP integration goals with client delivery expectations.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Developed standalone backend scripts in Python to automate data processing and file transformations during ERP migration.
 - Assisted with early-stage FastAPI experiments for microservices exposing account metadata and logs.
 - Conducted research on Odoo documentation and supported feature prototypes using XML views and client JavaScript.
 - Wrote testing utilities and schema seeding scripts to accelerate local development setups for ERP modules.
 - Prototyped basic user interfaces using vanilla JavaScript, HTML, and inline CSS for internal dashboards.
 - Shadowed senior devs and learned essentials of API contracts, CI pipelines, and database design.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ Python for Data Science – Coursera
 - ❖ Docker for Developers – Udemy
 - ❖ Odoo Technical Training – OdooClass
-

PROJECTS

- ✓ **ERP Campaign Sync Tool:** Custom Python + Odoo module to sync campaign status, metrics, and leads from third-party CRM APIs.
- ✓ **Finance Report Generator:** Backend microservice using FastAPI + Pandas to process and generate real-time financial reports in PDF/CSV.
- ✓ **Odoo CI/CD Pipeline:** Built automated deployment pipelines for Odoo modules with Docker, GitHub Actions, and PostgreSQL fixtures.
