

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and results-driven Senior Software Engineer with over 9 years of experience in designing, developing, and deploying scalable enterprise solutions using Java, Spring Boot, Apache Camel, and Azure. Adept at building cloud-native applications, integrating Azure services, and working with microservices architecture. Demonstrated success in international teams, especially within capital markets and finance sectors. Skilled in DevOps, container orchestration, security, and CI/CD automation. Passionate about continuous learning and contributing to collaborative environments.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, Go, SQL, NoSQL
- **Frameworks:** Spring Boot, Apache Camel, Quarkus, Node.js
- **Cloud:** Azure (Functions, Key Vault, Service Bus, SignalR, SQL PaaS), AWS (Lambda, S3, RDS), GCP (Cloud Run, Pub/Sub)
- **DevOps & Tools:** Azure DevOps, GitHub Actions, Docker, Kubernetes, Maven, Gradle, Jenkins, Git, SVN
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Cassandra
- **Protocols:** HTTP/S, SSL/TLS, TCP/IP, WebSocket
- **Other:** REST API, Microservices, OAuth2, Entra ID (Azure AD), RBAC, CI/CD, Agile, TDD

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and deployed microservices-based cloud applications using Java and Spring Boot, integrating Azure services like Service Bus, Key Vault, and Azure SQL for financial analytics platforms.
- Spearheaded migration of legacy systems to Azure-native architecture, improving scalability and performance by 60%.
- Integrated Apache Camel for routing, data transformation, and connecting internal systems, enhancing modularity and reducing code duplication.
- Implemented RBAC-based security using Entra ID for controlling access across distributed services.
- Built CI/CD pipelines in Azure DevOps to automate deployments, reduce manual intervention, and cut release cycles by 40%.

- Collaborated closely with international banking clients to align software deliverables with financial compliance requirements.
- Used SignalR for real-time messaging and dashboards in capital markets reporting tool.
- Conducted code reviews, architecture planning, and performance tuning for global trading applications with high throughput demands.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed distributed systems with Spring Boot and Apache Camel, implementing asynchronous messaging with RabbitMQ and Azure Service Bus.
- Built internal APIs and workflows for financial data pipelines using SQL and NoSQL (MongoDB), improving data availability across platforms.
- Designed and documented RESTful APIs for internal and partner-facing microservices used by insurance and fintech clients.
- Introduced Maven and Gradle as standardized build tools across Java teams, streamlining dependency management and versioning.
- Assisted DevOps in containerizing services with Docker and deploying to Kubernetes clusters on Azure.
- Created unit, integration, and performance tests using JUnit and Postman, achieving 90% coverage for core components.
- Configured Azure Key Vault for securely managing credentials and API secrets.
- Trained junior developers on Git workflows and clean coding practices, enhancing team productivity and quality.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Implemented core business logic in Java for retail and banking apps, using Spring framework and relational databases.
- Worked on RESTful API integration and dynamic content delivery based on customer behavior data.
- Introduced caching and connection pooling to reduce API response times by 50% in high-traffic endpoints.
- Migrated monolith applications into microservices aligned with domain-driven design principles.
- Used Apache Camel to build event-driven pipelines that processed financial data streams from stock exchanges.
- Integrated OAuth2 security for third-party client access using Spring Security.
- Wrote SQL queries and stored procedures for backend analytics components.
- Optimized data serialization and deserialization in REST services using Jackson.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Participated in backend development of e-commerce and B2B integration tools using Java and MySQL.
- Implemented multithreaded job processing systems for product feed normalization.
- Applied SOLID principles and design patterns to enhance code maintainability.
- Contributed to agile ceremonies, sprint planning, and product backlog grooming.

- Used Git for source control and Bitbucket pipelines for CI builds.
- Documented application APIs and system architecture for technical stakeholders.
- Collaborated with UI team to deliver consistent and robust REST services.
- Built internal logging and audit features to meet security compliance needs.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed internal admin tools using Java and Spring for inventory tracking and billing automation.
- Created SQL-backed reporting modules using PostgreSQL.
- Assisted in API integration with payment gateways and invoice systems.
- Implemented automated tests using TestNG and JUnit.
- Provided daily technical support for internal QA and UAT processes.
- Wrote technical documentation and user manuals.
- Attended software security training and applied secure coding practices.
- Shadowed senior developers and contributed to daily code reviews.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Microsoft Certified: Azure Developer Associate
- ❖ Oracle Certified Professional: Java SE 11 Developer
- ❖ Certified Kubernetes Application Developer (CKAD)
- ❖ AWS Certified Developer – Associate

PROJECTS

- ✓ **Capital Markets Data Engine (Sensidev)**
Designed and developed a modular microservices system using Spring Boot, Apache Camel, and Azure for a capital markets analytics platform. Integrated Entra ID authentication and automated deployment via Azure DevOps pipelines.
- ✓ **Real-Time FX Dashboard (Syscom Digital)**
Built a financial trading dashboard using SignalR, Spring Boot, and Azure Functions to display live currency movements and alerts to trading teams. Achieved sub-second latency and 99.99% uptime.
- ✓ **Risk Event Monitoring System (Soft Build)**
Developed a risk analysis engine processing streaming data from trading APIs. Used Apache Camel for message routing and PostgreSQL for transactional storage. Included audit logs and admin too
