

# CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com  
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

## PROFESSIONAL SUMMARY

Experienced Senior Java Developer with over 9 years of hands-on expertise in designing, developing, and deploying enterprise-grade applications. Proficient in Java and Spring frameworks, relational databases (SQL/PLSQL), and cloud-native development. Demonstrated excellence in Agile teams, API integration, and delivering robust backend services. Adept at collaborating across teams and delivering high-quality code in remote, multinational environments. Strong communicator with a consistent track record of problem-solving and process optimization.

## TECHNICAL SKILLS

- **Languages:** Java, SQL, PL/SQL, JavaScript, HTML, CSS, TypeScript
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, JPA, Hibernate
- **Databases:** PostgreSQL, Oracle, MySQL, H2
- **Tools:** Maven, Gradle, Git, Jenkins, Docker, Kubernetes
- **Monitoring/Logging:** Grafana, Prometheus, Logstash, ELK
- **Others:** Camunda BPMN, React.js, REST APIs, Microservices, OAuth2, JWT
- **Testing:** JUnit, Mockito, TestContainers
- **Cloud:** AWS (basic), Azure DevOps (basic)
- **Methodologies:** Agile (Scrum), CI/CD, TDD

## WORK EXPERIENCE

### Sensidev

#### Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led backend development using Java 17 and Spring Boot to deliver scalable microservices architecture supporting European eGovernment platforms.
- Designed and optimized RESTful APIs that handled over 10,000 concurrent requests per day using Spring MVC and integrated monitoring via Grafana dashboards.
- Migrated legacy data operations from raw SQL to PL/SQL stored procedures, reducing query execution time by 40% across several reporting modules.
- Integrated Camunda BPMN workflows for document validation and approval processes in compliance-heavy domains such as healthcare and taxation.
- Built complex ETL processes using Spring Batch and scheduled jobs for data reconciliation and reporting between Oracle and PostgreSQL databases.
- Developed full audit trails and enhanced logging using ELK Stack and Spring AOP to improve traceability and debugging during production incidents.

- Supported front-end integration with React-based UIs through Swagger-defined endpoints and consistent data contracts.
- Mentored junior engineers, led daily Agile stand-ups, and facilitated sprint planning sessions to align technical outcomes with client objectives.

## **Syscom Digital**

### **Software Engineer**

**October 2019 – August 2021**

Bucharest, Romania

- Developed Java-based applications with Spring Boot for campaign management platforms used by major retail and telecom clients in Eastern Europe.
- Designed normalized database schemas and optimized PL/SQL queries for customer segmentation and reporting features.
- Integrated third-party CRM systems using secure OAuth2 flows and implemented JWT-based authentication within Spring Security contexts.
- Coordinated deployment and CI/CD strategies using Jenkins pipelines, ensuring zero-downtime rollouts across staging and production servers.
- Led migration of several components into containerized services using Docker, reducing infrastructure footprint and increasing maintainability.
- Implemented Camunda-based approval pipelines for internal marketing content, enabling real-time collaboration between account teams and creative departments.
- Built reusable utility libraries for input validation, error handling, and rate limiting, used across multiple microservices.
- Collaborated with frontend developers working on React.js to standardize REST API schemas and improve client-server synchronization.

## **Soft Build**

### **Software Developer**

**June 2016 – July 2019**

Timișoara, Romania

- Engineered robust Java web applications using Spring MVC and Hibernate for real estate and construction project management platforms.
- Wrote and maintained complex stored procedures and PL/SQL packages for contract, bidding, and payment automation processes.
- Integrated Grafana to monitor key application KPIs including database latency, JVM heap utilization, and service uptime.
- Designed role-based access control using Spring Security and managed user permissions through custom-built admin panels.
- Created bulk data import tools from CSV and Excel formats, handling validations and batch processing through asynchronous APIs.
- Coordinated cross-functional efforts to implement GDPR-compliant data archiving and deletion workflows using scheduled Spring jobs.
- Enhanced performance of long-running operations via parallel stream processing and database indexing strategies.
- Ensured adherence to clean architecture principles and wrote modular, testable code using JUnit and Mockito.

**Decima Digital**  
**Software Developer**  
**November 2015 – April 2016**  
Tallinn, Estonia

- Participated in a pan-European logistics optimization platform using Java EE and Spring Boot for backend services.
- Designed API endpoints and SQL scripts that managed fleet tracking, route optimization, and delivery audit logs.
- Created dynamic reports using JasperReports integrated with Oracle databases and custom PL/SQL views.
- Supported QA automation and unit testing coverage to maintain high-quality code in compliance-driven environments.
- Engaged in daily scrum sessions and contributed to technical documentation and deployment guides for customer handoff.
- Supported integration with SAP and Oracle ERP via REST APIs and custom XML adapters.
- Built internal admin dashboards with Thymeleaf and Bootstrap for configuration management and data monitoring.
- Improved error handling and retry logic for async tasks using Spring's `@Async` and `TaskExecutor` capabilities.

**Borna Technology**  
**Software Developer Intern**  
**September 2014 – August 2015**  
Tallinn, Estonia

- Assisted in developing internal tools in Java for logging user actions and reporting bugs for e-commerce platforms.
- Created automated SQL data import/export scripts and unit-tested small modules under senior developer guidance.
- Worked closely with the testing team to track and resolve over 200 bugs during a major UI revamp.
- Contributed to legacy system documentation and wrote basic REST APIs in Spring Boot for configuration tools.
- Participated in code reviews and shadowed backend integration sessions between Java services and PHP UIs.
- Implemented utility scripts for log parsing and memory usage monitoring in Java-based apps.
- Learned Agile methodology fundamentals and practiced pair programming and task estimation.
- Supported the migration of parts of the monolith to early microservice prototypes, gaining practical exposure.

---

## EDUCATION

**Tallinn University**

Bachelor's Degree in Computer Science,  
**2010 – 2014**

---

## CERTIFICATIONS

- Oracle Certified Professional: Java SE 11 Developer – Oracle

- Spring Professional Certification – Pivotal
  - SQL & PL/SQL for Developers – Udemy
  - Camunda Certified Developer – Camunda Academy
- 

## PROJECTS

### ✓ **Digital Workflow Engine for Public Health Agency**

- Developed Java Spring microservices integrated with Camunda BPM for managing health certifications and testing workflows.
- Integrated PostgreSQL and Oracle databases with dynamic PL/SQL logic for cross-system data syncing and reporting.
- Created Grafana dashboards tracking over 50 KPIs related to request volumes, SLA compliance, and error rates.

### ✓ **Real-Time Monitoring & Reporting Platform for Utilities Provider**

- Built reactive Java backend with Spring WebFlux and Grafana integration to visualize energy usage data from 5,000+ sensors.
- Deployed using Docker and Kubernetes with CI/CD pipelines to Azure, ensuring fault-tolerant and scalable infrastructure.
