

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-a18682384/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned **Java Developer** with 9+ years of experience designing, developing, and deploying **enterprise back-end systems, APIs, and scalable cloud-native applications**. Expert in **Java 8+, Spring Boot, Hibernate, Oracle DB, API Gateway, Kafka, JMS, AWS, Docker, and CI/CD pipelines**. Proven ability to deliver secure, high-availability solutions with **OpenID Connect, OAuth2, IAM, and SSL/TLS configuration**. Skilled at building **microservices, integrating SOAP/REST services, and optimizing performance for mission-critical systems**. Strong background in FinTech, RegTech, and enterprise domains, with hands-on experience in **security, observability, and blockchain integrations**.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java 8+, Java EE, Spring Boot, Spring, Hibernate, TypeScript, Angular, HTML5, CSS3
- **Databases:** Oracle DB, PostgreSQL, MySQL, MongoDB, Redis, Cassandra (SQL & NoSQL)
- **Messaging & APIs:** Kafka, ActiveMQ, JMS, REST APIs, SOAP, Oracle Service Bus, API Gateway (OAuth2)
- **Cloud & Infrastructure:** AWS (EC2, ECS, Lambda, CloudWatch), Docker, Kubernetes, WebLogic Server, Apache
- **Security:** OpenID Connect, SSO, SSL/TLS, IAM (Secunda, IOP IAM), Encryption & Authentication protocols
- **CI/CD & Tools:** Git, Maven, Bamboo, GitHub Actions, Jenkins, SOAPUI, ReadyAPI, Postman
- **Other Expertise:** Blockchain technology, Procurement & Grant Management, Microservices, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed **enterprise back-end applications in Java 11 with Spring Boot and Hibernate**, delivering secure, scalable, and highly performant services for global clients.
- Designed and implemented **REST and SOAP APIs** integrated with Oracle Service Bus, improving interoperability and supporting multi-system transactions.

- Engineered **Oracle DB schemas with stored procedures, indexing, and optimization**, handling large volumes of structured financial data with high availability.
- Integrated **Kafka and ActiveMQ JMS messaging systems**, ensuring reliable, asynchronous communication across distributed services and microservices.
- Secured applications with **OpenID Connect, OAuth2, and SSO**, implementing strong authentication, encryption, and access management across APIs.
- Deployed applications with **Docker on AWS (ECS, Lambda, CloudWatch)**, improving scalability, monitoring, and automated failover in production systems.
- Built **CI/CD pipelines with Bamboo and GitHub Actions**, automating builds, tests, deployments, and integrating code quality checks into the delivery pipeline.
- Configured **WebLogic servers, reverse proxy rules, and SSL/TLS protocols**, ensuring secure communication channels and compliance with enterprise standards.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed **Java EE and Spring Boot microservices**, supporting large-scale e-commerce and digital marketing platforms with Oracle DB backends.
- Created **API Gateway configurations with OAuth2** and secure token management, protecting access to APIs and ensuring compliance with data protection standards.
- Designed and optimized **Oracle DB and PostgreSQL queries**, enabling high-performance reporting, auditing, and transaction-heavy use cases.
- Integrated **ActiveMQ JMS queues** with backend services to ensure reliable event-driven processing and decoupling of distributed systems.
- Implemented **SOAP and REST service integrations** using SOAPUI, Postman, and ReadyAPI, supporting secure interoperability between systems.
- Migrated applications to **AWS Cloud with Dockerized deployments**, using CloudWatch for monitoring, alarms, and distributed logging.
- Enhanced **CI/CD workflows with Bamboo and GitHub Actions**, reducing release cycle times and improving software delivery reliability.
- Provided **technical documentation, API references, and integration guides**, enabling smooth adoption and reducing support overhead.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed **Java-based backend services** with Spring Boot, Hibernate, and Oracle DB, delivering scalable applications for fintech and enterprise clients.
- Designed **SOAP and REST APIs** with detailed OpenAPI specifications, enabling third-party integrations with secure authentication flows.
- Optimized **SQL queries and Oracle DB schema designs**, handling millions of transactions with low latency and improved data consistency.
- Built **NoSQL solutions with MongoDB and Redis**, supporting caching, high-speed data access, and hybrid analytics use cases.
- Orchestrated deployments with **Docker containers** into AWS-hosted environments, ensuring repeatable builds and reducing infrastructure drift.
- Automated **CI/CD pipelines with Jenkins and Bamboo**, implementing integration tests, code reviews, and release management processes.
- Introduced **SSL/TLS security layers and IAM-based role enforcement**, protecting sensitive customer and financial data.

- Participated in **Agile ceremonies**, collaborating with international teams to deliver features and enhancements on time.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Designed and implemented **Java EE applications** with Spring MVC and Hibernate, focusing on modular, maintainable, and secure back-end systems.
- Developed **REST endpoints integrated with Oracle WebLogic**, enabling enterprise-grade deployment and scaling across multiple regions.
- Configured **reverse proxies and SSL/TLS protocols**, ensuring secure communications and protecting sensitive business transactions.
- Implemented **SQL queries and performance tuning in Oracle DB**, reducing query times and enhancing reporting efficiency.
- Assisted with **containerization using Docker** and deployment automation for test and production environments.
- Participated in **API testing using SOAPUI and Postman**, validating integration with third-party services.
- Contributed to **CI/CD pipelines with Bamboo**, supporting test automation and continuous delivery workflows.
- Enhanced **application monitoring and observability**, integrating logging frameworks and proactive alerts for production readiness.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Supported the development of **Java-based web applications**, working on backend APIs and database integrations for client-facing systems.
 - Assisted with **SQL query optimization** and schema design in Oracle DB and MySQL, improving performance in transactional workflows.
 - Experimented with **NoSQL tools like MongoDB and Redis**, gaining hands-on experience with caching strategies and non-relational storage.
 - Configured **Docker-based development environments**, enabling faster onboarding and consistent builds across developer systems.
 - Learned **SOAP and REST integration testing** with SOAPUI and Postman, contributing to QA cycles and service validation.
 - Participated in **CI/CD pipeline automation with Jenkins**, improving build quality and reducing manual deployment errors.
 - Documented **integration steps, workflows, and troubleshooting guides**, improving internal knowledge sharing and team efficiency.
 - Worked closely with senior developers to understand **secure coding practices, IAM, and encryption basics**.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Oracle Certified Professional, Java SE Programmer
 - Docker Certified Associate
-

PROJECTS

- **Enterprise Procurement Platform:** Developed Java Spring Boot microservices with Oracle DB, Kafka, and Oracle Service Bus to support procurement and grants.
- **API Security Gateway:** Built OAuth2-secured API Gateway with OpenID Connect, WebLogic, and Docker, integrating SOAP and REST services for EU clients.
- **Payment & Identity Hub:** Integrated payment providers and IAM solutions (Secunda, IOP IAM) using Spring Boot APIs and Oracle DB backends.
- **Cloud Migration:** Migrated monolithic Java EE systems into AWS-hosted Docker containers with CI/CD pipelines in Bamboo and GitHub Actions.
- **Blockchain Integration:** Implemented blockchain-based modules for transaction integrity and traceability in enterprise business systems.
