

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-driven Java Developer with 9+ years of full-stack and backend experience, recently focused on Spring Boot and scalable enterprise solutions. Strong background building RESTful APIs, integrating microservices, and managing CI/CD deployments in Agile environments. Proficient in relational databases, secure API design, and performance optimization. Adept at collaborating cross-functionally and mentoring teams to deliver high-quality, business-critical applications.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, TypeScript, JavaScript, HTML, CSS
- **Frameworks:** Spring Boot, FastAPI, Flask, Django (basic), Odoo ORM
- **Databases:** PostgreSQL, MySQL, MongoDB, Elasticsearch
- **DevOps:** Docker, GitHub Actions, CI/CD Pipelines, Linux Shell
- **Cloud:** AWS (basic), Heroku, Vercel, DigitalOcean
- **Tools:** Git, JIRA, Postman, Confluence, Figma
- **Testing:** JUnit, Pytest, Jest, React Testing Library
- **Architecture:** RESTful APIs, Microservices, MVC, Layered Architecture
- **Messaging:** RabbitMQ (familiar)
- **Frontend:** React, Next.js, Tailwind CSS, jQuery, Angular (familiar)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led backend architecture and API development using Java and Spring Boot, enabling scalable services for ERP integration and mobile applications.
- Developed robust REST APIs with Spring Security and JWT for authentication, integrated with PostgreSQL and MySQL databases.
- Migrated legacy services to microservices architecture using Spring Cloud, improving system scalability and deployment independence.
- Designed and maintained CI/CD pipelines with Docker and GitHub Actions, automating unit tests and staging deployments.
- Conducted code reviews, enforced Java coding standards, and mentored junior developers on best practices in Spring Boot.
- Integrated Elasticsearch for advanced data querying and analytics within ERP dashboards, reducing report generation latency by 60%.

- Collaborated with cross-functional teams in Agile sprints, ensuring timely delivery and performance-tuned backend modules.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Developed Spring Boot services for ingesting, normalizing, and exposing marketing data via RESTful APIs consumed by analytics platforms.
- Refactored monolithic CRM processes into modular services with Spring Data JPA and Hibernate, improving data consistency and testability.
- Implemented CI/CD pipelines using Docker and GitHub Actions, enabling rapid development and automated deployments.
- Collaborated on designing secure endpoints using Spring Security and OAuth2 protocols for external API integration.
- Created ETL pipelines to process client Excel data, validate schema integrity, and import transformed data into PostgreSQL databases.
- Tuned complex queries and applied indexing strategies to maintain sub-second response times for campaign analytics endpoints.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered scalable enterprise modules using Spring MVC and Odoo ORM, enhancing internal HR, finance, and reporting platforms.
- Developed REST APIs and batch processing tools in Java to integrate timesheet and payroll systems with external accounting platforms.
- Refactored Java-based legacy code into cleaner service-oriented components, reducing maintenance overhead by 45%.
- Implemented job schedulers and cron-based tasks using Spring for automated data archiving and report generation workflows.
- Supported microservice deployment using Docker containers, managed configurations via properties and YAML for staging/prod.
- Led training sessions for junior engineers and contributed documentation on internal Spring Boot development practices.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Built internal services with Java and Spring Boot for tracking web analytics data, syncing logs into PostgreSQL for BI dashboards.
- Participated in migration of client ERP systems, resolving relational conflicts and performing data integrity checks using JPA.
- Developed REST APIs with Spring Boot to expose filtered user engagement metrics to marketing dashboards.
- Contributed to frontend enhancements using JavaScript and AngularJS, streamlining data visualizations in embedded ERP modules.

- Supported CI/CD integration with GitLab pipelines, Dockerized applications, and created reusable Maven build configurations.
- Troubleshoot production issues related to ORM mappings and memory leaks, improving uptime across ERP integrations.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Assisted in development of early microservices using Spring Boot and FastAPI for exposing metadata on ERP logs.
 - Created Java-based CLI tools to transform flat files into normalized SQL records for batch ingestion.
 - Explored early-stage Angular and Spring integration, building CRUD dashboards with REST endpoints.
 - Documented development setup instructions and helped streamline onboarding for new developers.
 - Supported implementation of automated testing with JUnit and basic CI scripts using Git and Bash.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **Spring Framework Masterclass** – Udemy
 - ❖ **Docker for Developers** – Udemy
 - ❖ **Odoo Technical Training** – OdooClass
 - ❖ **Python for Data Science** – Coursera
-

PROJECTS

- ✓ **Microservices Finance Suite:** Java + Spring Boot service cluster to manage invoicing, payments, and reporting with PostgreSQL & RabbitMQ.
- ✓ **Odoo ERP Sync API:** Integrated CRM and campaign tools with Odoo via secure REST APIs using Spring Boot and FastAPI.
- ✓ **CI/CD Pipeline for Java Apps:** Built reusable CI workflows for Java microservices using Docker, GitHub Actions, and test coverage reports.
- ✓ **Dynamic API Gateway:** Built proxy layer for multitenant ERP platform with token validation, caching, and request transformation in Java.
