PROFESSIONAL SUMMARY

Experienced Frontend Engineer with 9+ years of hands-on development using modern JavaScript, TypeScript, Web Components, and cloud-native infrastructure. Passionate about legal tech, accessibility-first design, SEO performance, and building scalable, modular frontend architectures. Seeking to contribute to meaningful platforms that empower law, education, and governance.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript (ES6+), Lit.js, React, Vue.js, HTML5, CSS3, SCSS, Tailwind
- **Testing & Tooling:** Lighthouse, Chrome DevTools, Jest, Vitest, Mocha, ESLint, Prettier
- **Performance & SEO:** Core Web Vitals, Technical SEO, Schema.org markup, WCAG 2.1 AA
- **CI/CD & DevOps:** Git, GitHub Actions, GitLab CI, Docker, Jenkins, CircleCI
- **Cloud Platforms:** AWS (Lambda, S3, CloudFront), GCP (App Engine, Cloud Run)
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase (NoSQL), Redis
- **CMS & Integration:** Strapi, Contentful, RESTful APIs, GraphQL
- **Agile & Collaboration:** Jira, Confluence, Scrum, Figma, UX Collaboration
- **OS & Environments:** Linux, Unix, macOS, VSCode, WebStorm

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed modular and reusable Web Components using Lit.js, ensuring performance, scalability, and WCAG-compliant accessibility across all browser targets.
- Integrated frontend modules with Strapi CMS and REST APIs, streamlining legal article publishing and editorial workflows by reducing time-to-publish by over 30%.
- Conducted Lighthouse audits and implemented Core Web Vitals improvements, increasing performance scores from 63 to 92+ on high-traffic legal search pages.
- Led frontend architecture migration from legacy React to Lit.js and TypeScript, enabling a fully decoupled component-driven design system with reusable templates.
- Worked closely with UX teams to ensure semantic HTML and ARIA compliance, boosting accessibility scores and legal eligibility for public sector usage.

- Automated schema markup generation for SEO-rich content, improving structured data indexing and CTR by 12% across key legal opinion pages.
- Deployed components in CI/CD pipelines using GitHub Actions and Docker, ensuring safe and auditable deployment practices for all staging and production environments.
- Mentored 4 frontend developers on web performance profiling, Lighthouse practices, and Lit.js component structuring in weekly code walkthrough sessions.
- Implemented custom performance logs and Sentry-based alerting for client-side rendering issues, helping reduce runtime UI errors by over 70%.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered performant frontend applications with Vue.js and TypeScript, optimizing cross-browser rendering and mobile-first layouts for marketing compliance tools.
- Optimized loading strategies using lazy-loading, prefetch hints, and compression to reduce First Contentful Paint (FCP) and Largest Contentful Paint (LCP) metrics by 40%.
- Led migration of marketing microsites to WCAG 2.1 AA accessibility standards, which unlocked public sector client adoption and reduced legal liability exposure.
- Designed reusable UI components integrated with backend CMS APIs and live campaign metrics via REST and Firebase.
- Integrated Open Graph and schema.org metadata for landing pages, increasing organic search visibility and snippet coverage by over 20%.
- Built and maintained unit tests and visual regression tests, ensuring frontend stability across marketing launches and weekly releases.
- Integrated frontend telemetry using Google Lighthouse CI and WebPageTest, integrating into CI workflows for automated performance validation.
- Actively participated in agile sprint planning and led UX review meetings with cross-functional teams to ensure design alignment.
- Coordinated frontend rollout with cloud deployment teams using AWS CloudFront and Lambda@Edge for CDN caching and performance tuning.
- Maintained Git branching strategy with merge requests, peer reviews, and automated CI validations ensuring stable mainline delivery.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed legal and educational content portals using HTML5, JavaScript, and server-rendered PHP apps, enhancing academic access to curated legal journals.
- Led frontend improvements by introducing modular JS and SCSS structuring, improving code maintainability and onboarding for new devs.
- Built dynamic widgets for legal document search using AJAX and server-driven rendering, increasing search response usability by 25%.
- Assisted in CMS customizations that allowed legal editors to configure metadata and content snippets dynamically without code updates.
- Integrated MongoDB-backed storage for document previews and search cache, improving fetch time and indexability of large court document sets.
- Conducted manual and automated tests of frontend across devices and screen readers to ensure WCAG 2.0 compliance.
- Coordinated releases with remote backend and content teams using Git and Jenkins CI.

- Added technical SEO components, including JSON-LD schema markup and canonical URL logic, to improve Google Scholar indexing rates.
- Improved rendering time for large legal pages using throttled rendering and virtualization techniques for multi-page judgments.
- Participated in legal tech hackathons contributing frontend for case law visual mapping and network graph visualization.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Built reusable frontend components for e-commerce and document platforms with custom vanilla JavaScript modules and modular CSS.
- Integrated REST APIs for court record automation apps and implemented token-authenticated flows and file upload UIs.
- Created dynamic filters and search functionality with deep link support using History API for enhanced UX and SEO.
- Collaborated with backend team using PostgreSQL and Django to handle structured metadata ingestion and presentation.
- Helped implement custom CI/CD with Bitbucket pipelines and static code linting for every merge cycle.
- Built accessibility-aware modal components and toast alerts tested across browsers including IE11, Firefox ESR, and Chrome.
- Ensured UI responsiveness on tablets and mobile via custom Flexbox-based grid systems and media queries.
- Actively participated in UX meetings and legal content onboarding sessions with product and business teams.
- Drafted developer onboarding docs and contributed to component storybook for easier feature collaboration.
- Used Jira and Confluence to document components, state handling, and performance tracking results.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed internal legal annotation tools for markup, tagging, and redaction of legal texts with custom JS and PHP.
- Helped integrate client-side data masking tools for GDPR-sensitive record previews and audit logging.
- Created responsive frontend templates based on Bootstrap and jQuery for legacy admin portal redesign.
- Participated in REST API integration for user management and role-based access control (RBAC) systems.
- Migrated PDF legal documents to HTML format using headless browser rendering and DOM preservation.
- Documented code and conducted manual QA checks for search feature refinements and multilingual UI flows.
- Improved UI translation handling and RTL layout handling for Arabic and Hebrew legal datasets.
- Contributed to time-to-load reduction for internal dashboards by 15% using image optimization and deferred script loading.
- Created internal test scripts for comparing structured markup outputs across multiple jurisdictions.

- Attended legal-tech developer sessions discussing AI-powered annotation trends and client data security.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ **AWS Certified Developer – Associate** (2023)
 - ❖ **Google Cloud Associate Cloud Engineer** (2022)
 - ❖ **Frontend Web Developer Nanodegree** – Udacity (2021)
 - ❖ **Web Accessibility Specialist (IAAP-WAS)** – In Progress
-

PROJECTS

- ✓ **LegalSearch Optimizer** –
Built a legal research interface with Lit.js integrated into headless CMS (Strapi), implementing structured schema markup and web vitals optimization.
- ✓ **CourtDoc Viewer** –
Developed modular, accessible Web Component interface for viewing court decisions with dynamic metadata and linked case law, optimized for mobile-first usage.
- ✓ **SEO Engine for Statute Pages** –
Automated technical SEO enhancements for static legal pages using JSON-LD and semantic markup injection during build phase via TypeScript.
