

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Results-oriented Full-Stack Engineer with over 8 years of experience developing scalable, secure, and high-performance applications across SaaS, EdTech, and marketing automation platforms. Proven success in fast-paced, growth-focused environments using the MERN stack, AWS, and CI/CD workflows. Adept at leading cross-functional teams, optimizing system performance, and delivering rapid iterations through Agile practices. Passionate about building user-centric solutions that drive acquisition, retention, and engagement.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React, Express.js, PHP, Laravel, HTML5, CSS3, SCSS, jQuery, Bootstrap
- Databases:** MongoDB, MySQL, PostgreSQL
- **DevOps & Tools:** Git, GitHub Actions, Docker, Jenkins, Webpack, AWS (EC2, S3, RDS), Firebase, Netlify, Vercel
- **Testing & QA:** Jest, Mocha, Cypress, Postman, Swagger
- **Agile & Collaboration:** Jira, Trello, Slack, Confluence, Figma
- **Other:** RESTful APIs, GraphQL, WebSockets, Server-Side Rendering (SSR), Static Site Generation (SSG)

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Spearheaded development of growth-focused features for a B2B SaaS dashboard using React, Node.js, and MongoDB, increasing trial-to-paid conversion rate by 19% over 3 months.
- Architected and deployed scalable microservices on AWS leveraging Docker and CI/CD pipelines, reducing deployment time by 40%.
- Led Agile sprints within a cross-functional team of 6 engineers and 2 designers, prioritizing rapid experimentation and data-driven development cycles.
- Developed real-time analytics modules using WebSockets and charting libraries to monitor user engagement and support business decisions.
- Integrated third-party APIs including Stripe, Auth0, and SendGrid, facilitating secure payments, authentication, and email workflows.
- Conducted code reviews, enforced best practices, and mentored junior engineers, increasing team output quality and consistency.
- Collaborated with product leads to define technical specs and experiment hypotheses aimed at optimizing user activation funnels.

- Championed performance tuning and load testing, achieving a 70% improvement in page load times across the application.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Designed and built interactive marketing platforms using Node.js, React, and Firebase, reaching over 500,000 unique users in campaign rollouts.
- Created reusable UI components and managed app state with Redux to streamline front-end development across multiple B2C projects.
- Led migration of legacy PHP systems to modern JavaScript-based stack, reducing technical debt and increasing maintainability.
- Configured CI/CD pipelines on GitHub Actions, automating test suites, build deployments, and release cycles for production readiness.
- Implemented SSR and SSG strategies for SEO-critical pages using Next.js, resulting in a 3x increase in organic traffic.
- Set up Firebase Functions and Firestore integrations for real-time data operations and user engagement tracking.
- Delivered A/B testing infrastructure integrated with Google Optimize, allowing product teams to test UX hypotheses iteratively.
- Participated in technical planning and client demos, shaping development priorities based on analytics and user behavior metrics.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Developed internal tools and customer portals using Laravel and Vue.js, enhancing productivity for 3+ business departments.
- Created REST APIs for mobile applications, ensuring authentication and role-based access control via OAuth2.
- Designed MySQL schema optimizations for reporting modules, reducing query latency from 5s to under 500ms.
- Built dashboard systems with dynamic data filtering and visualization to support real-time operational decisions.
- Managed Git version control and implemented peer code reviews, maintaining high code quality and reducing bugs by 25%.
- Worked closely with UI/UX designers to align feature development with brand consistency and responsive design.
- Deployed applications to AWS EC2 instances and configured SSL certificates and domain routing via Route 53.
- Researched and integrated data sanitization/security libraries to meet GDPR compliance for user data management.

Decima Digital

Software Developer

November 2015 – April 2016

Tallinn, Estonia

- Developed CRM integrations using PHP and jQuery, enabling clients to manage leads and automate communications workflows.

- Enhanced existing CMS systems with dynamic forms and AJAX-powered filtering interfaces to improve client satisfaction.
- Configured cron jobs and server-side validation logic for marketing automation email triggers.
- Contributed to bug fixes and technical documentation for third-party plugin development.
- Created responsive front-end layouts to improve usability across devices and browsers.
- Assisted with migrating data from legacy databases to MySQL via custom ETL scripts.
- Coordinated feature testing with QA team to ensure release quality and minimize regression.
- Conducted initial codebase audits and delivered reports on refactoring opportunities.

Borna Technology

Software Developer Intern

September 2014 – August 2015

Tallinn, Estonia

- Collaborated on student management system for a local EdTech startup, using PHP, MySQL, and jQuery.
- Participated in Agile stand-ups, sprint planning, and demo sessions as part of a small 4-person dev team.
- Developed role-based dashboard modules and implemented user permission logic.
- Created unit and integration tests for back-end functions to ensure logic accuracy.
- Wrote detailed documentation for internal APIs, improving onboarding for new developers.
- Conducted usability tests with test users and reported actionable feedback for iteration.
- Designed HTML email templates compatible with multiple clients for notifications.
- Refactored duplicated code patterns to improve modularity and support maintainability.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ✓ MongoDB for Developers – MongoDB University
- ✓ Full-Stack Open – University of Helsinki
- ✓ AWS Cloud Practitioner – Amazon Web Services

PROJECTS

- ❖ **CyberTrack: EdTech Security Analytics Platform**
Developed a gamified learning module for cybersecurity students featuring secure login, challenge progress tracking, and real-time leaderboard using Node.js, React, MongoDB, and Firebase Auth.
- ❖ **Growlytics: Product-Led Growth Engine**
Built a growth experimentation engine supporting A/B testing, funnel analysis, and segmentation dashboards using MERN stack + Chart.js; enabled product teams to measure user retention and optimize onboarding flows.

❖ **DeployHero: CI/CD Dashboard**

Created a developer-focused monitoring tool for GitHub Actions and AWS deployments; used Node.js, Express, and MongoDB to track build statuses and auto-trigger alerts.
