

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned Full Stack Software Engineer with 9+ years of experience delivering scalable, secure, and high-performance applications across fintech, enterprise, and SaaS sectors. Proficient in Java 11, Spring Boot, ReactJS, and cloud-native technologies including AWS and Docker. Adept at designing and implementing REST APIs, microservices, and cloud infrastructure, with a strong foundation in Agile methodologies. Passionate about writing clean, maintainable code and collaborating in dynamic, cross-functional teams to deliver impactful software solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java 11, Spring Boot, ReactJS, HTML5, CSS3, JavaScript, TypeScript, Python
- **Frontend:** ReactJS, Redux, SCSS, Bootstrap, Storybook
- **Backend:** Spring Boot, FastAPI, Node.js
- **Cloud & DevOps:** AWS (EC2, Lambda, S3), GCP, Docker, Kubernetes, GitHub Actions, Jenkins
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB (SQL & NoSQL)
- **Tools & Practices:** Git, CI/CD, Agile, Scrum, JIRA, RESTful API, Microservices, Unit Testing (JUnit, Jest), TDD
- **Others:** WebSocket, Web Accessibility (WCAG), Design Systems

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed, implemented, and maintained scalable microservices using Java 11 and Spring Boot, handling high-volume financial data for enterprise clients.
- Led migration of monolithic services into containerized applications with Docker and Kubernetes, improving deployment speed and maintainability.
- Built dynamic and accessible UI components with ReactJS and SCSS, integrated with internal design systems and style guides.
- Developed RESTful APIs and integrated third-party services for real-time financial decision-making platforms.
- Orchestrated cloud deployments using AWS Lambda and S3, ensuring 99.99% system uptime and reliability.

- Enforced rigorous unit and integration testing standards using JUnit and Jest to ensure code quality and reduce regressions.
- Participated in daily Agile ceremonies and bi-weekly sprints, collaborating closely with cross-functional teams.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered complex enterprise-grade web applications using Spring framework and modern JavaScript with ReactJS.
- Designed database schemas and optimized queries in PostgreSQL and MongoDB, improving data retrieval by 40%.
- Led transition from legacy frontend stack to ReactJS, streamlining component reuse and enhancing UX.
- Worked within Scrum methodology, actively contributing to sprint planning, reviews, and retrospective meetings.
- Integrated API services with authentication, role-based access, and real-time dashboards.
- Used AWS EC2 and CloudFront to manage distributed hosting of static and dynamic content.
- Implemented automated testing pipelines with GitHub Actions and Jenkins, ensuring consistent deployment quality.
- Maintained strong code documentation and peer code review practices, ensuring high maintainability across teams.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed responsive UI components in ReactJS integrated with RESTful APIs to manage complex datasets.
- Built backend logic in Java and Python to manage workflow automation tools in the financial domain.
- Designed modular systems based on microservice principles to allow scalable platform upgrades.
- Wrote reusable, testable, and efficient code while collaborating with QA teams for early testing.
- Integrated third-party financial services APIs to enrich banking functionalities in the app.
- Conducted performance optimization tasks across services, improving response times by 25%.
- Designed database interactions across SQL and NoSQL solutions such as PostgreSQL and MongoDB.
- Participated in full product lifecycle—from conceptualization to deployment and maintenance.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Developed custom modules in Spring MVC to manage dynamic client content and account-based transactions.
- Contributed to UI improvements using JavaScript, jQuery, and AJAX, enhancing usability.
- Interfaced with MySQL to create efficient relational data models for scalable usage.
- Implemented testing procedures using JUnit to ensure consistent backend stability.
- Integrated internal APIs with external analytics systems to enable live user tracking.
- Contributed to the definition and refinement of product requirements.

- Maintained project documentation and participated in code refactoring initiatives.
- Supported deployment and bug fixing in live environments alongside operations teams.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in development and maintenance of internal Java-based web applications.
 - Implemented UI changes and updated front-end logic in HTML/CSS/JS for admin panels.
 - Designed and built database queries using PostgreSQL and learned ORM principles.
 - Participated in code reviews and learned Agile practices through standups and sprint tasks.
 - Conducted bug tracking and testing on early-stage features under supervision.
 - Created technical documentation for implemented features and APIs.
 - Gained experience with Git-based workflows and environment setup.
 - Supported QA and DevOps in deployment to development and staging environments.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Developer – Associate
 - Google Cloud Associate Cloud Engineer
 - React – Advanced Frontend Engineering (Scrimba)
 - Java Spring Boot Microservices Certification (Udemy)
-

PROJECTS

- **CloudBank Core**
Designed a scalable banking system built with Spring Boot, ReactJS, and PostgreSQL; features include real-time credit scoring, account management, and multi-role access. Deployed via AWS ECS and S3.
- **Loan Decision Engine**
Built a microservice-based backend for a financial decision engine using Java and MongoDB. Integrated APIs for credit score validation and payment schedules.
- **CI/CD Pipeline Framework**
Created a reusable CI/CD framework using GitHub Actions and Docker to automate test, build, and deployment stages for multiple internal microservices.
