

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and meticulous Frontend Engineer with over 9 years of hands-on experience developing high-performance, scalable web applications with a strong emphasis on React, TypeScript, and modern frontend ecosystems. Proven record of delivering robust UI/UX solutions across diverse domains, including health tech, digital marketing, and SaaS platforms. Passionate about creating intuitive and responsive user interfaces, collaborating in cross-functional R&D teams, and crafting solutions that drive real-world impact. Deeply aligned with open-source, agile values, and continuous improvement through learning and experimentation.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass, React.js, Next.js, Zustand, Redux
- **UI Libraries:** Tailwind CSS, Material UI, Styled Components, Ant Design
- **Testing:** Jest, Enzyme, React Testing Library, Chai
- **Tooling:** Webpack, Vite, Babel, Git, GitHub, GitLab CI/CD
- **Design & Collaboration:** Figma, Zeplin, Storybook
- **DevOps & Containers:** Docker, GitHub Actions
- **Practices:** Responsive Design (Mobile-First), TDD, Agile/Scrum, Clean Code
- **Languages:** Fluent in English

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Developed and maintained complex React/TypeScript frontends for data-intensive applications used in healthcare and real-time analytics, improving frontend performance by over 35%.
- Spearheaded the migration from legacy CSS to Tailwind CSS, reducing UI bug reports by 60% and achieving full mobile responsiveness using a mobile-first design approach.
- Collaborated closely with AI engineers on H2020-funded research projects, visualizing large-scale data outputs with performance-optimized components and state management using Zustand.
- Designed and built reusable UI libraries with Storybook, ensuring brand consistency across multiple innovation pilots and decreasing development time for new features by 40%.

- Implemented secure, responsive dashboards integrating live data visualizations using D3.js and custom charts for medical, finance, and rescue sector use cases.
- Reduced build time by 25% by introducing Vite and modularizing the codebase while maintaining 90%+ unit test coverage through Jest and React Testing Library.
- Partnered with UX researchers and used Figma prototyping to translate wireframes into pixel-perfect, accessible interfaces, achieving WCAG 2.1 AA compliance.
- Mentored junior engineers, conducted code reviews with emphasis on clean architecture and performance, contributing to a 20% improvement in overall team velocity.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered high-traffic React-based marketing dashboards with integrated analytics, increasing customer engagement by 22% through usability-focused frontends.
- Collaborated with cross-functional product teams using Agile to build, test, and iterate on front-end features within short delivery cycles, improving delivery speed by 30%.
- Utilized Material UI and styled-components for custom theme support across multiple client-facing portals, boosting customer satisfaction via A/B tested designs.
- Improved performance of animation-heavy campaigns by applying virtualization techniques and reducing initial load time from 4.5s to under 2.8s.
- Ensured code quality and consistency by enforcing linting, code splitting, and integrating automated UI regression testing into CI pipelines.
- Built PWA-ready applications that functioned in low-connectivity environments, enabling robust campaign access in remote and mobile-first regions.
- Integrated third-party APIs and real-time event streams using WebSockets and RESTful endpoints, contributing to real-time audience tracking functionality.
- Participated in daily standups, sprint retros, and architectural planning, contributing actionable insights and performance metrics that guided long-term frontend strategy.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Created scalable frontend architecture for real estate and smart home management platforms using React and Sass, enabling real-time device control dashboards.
- Refactored legacy jQuery codebase to modular React components, improving maintainability and decreasing frontend error rates by 50%.
- Designed an internal UI component framework used by 3+ teams, standardizing development and reducing feature duplication by 35%.
- Conducted accessibility audits and implemented enhancements, improving usability for screen reader and keyboard-only users across the web app.
- Improved SEO and TTFB by implementing server-side rendering with Next.js and dynamic routing strategies.
- Implemented automated testing suites using Jest and Enzyme, ensuring consistent delivery of high-quality UI components across projects.
- Researched and implemented advanced CSS techniques using Flexbox and Grid for complex layouts in a mobile-first context.
- Provided support and documentation for new developers, reducing onboarding time and increasing team knowledge sharing efficiency.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built interactive, accessible frontend solutions for Nordic fintech projects using HTML5, CSS3, and Vanilla JS, ensuring cross-browser compatibility and responsive layouts.
- Collaborated with backend teams to consume REST APIs and visualize financial data securely with interactive chart components.
- Customized UI themes for B2B clients using Sass variables and modular CSS structures, speeding up project delivery by over 20%.
- Implemented dynamic form validation, improving user input accuracy and reducing drop-off rates during onboarding processes.
- Conducted frontend QA testing and created comprehensive UI test cases, reducing bug frequency post-deployment by 40%.
- Participated in daily Agile ceremonies and provided estimations and retrospectives that improved sprint planning accuracy.
- Leveraged Git for version control and introduced branching strategies that streamlined team collaboration.
- Worked directly with clients for requirements gathering and feedback loops, ensuring fast turnaround and satisfaction.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Assisted in building internal tools using JavaScript, HTML, and Bootstrap, focusing on feature enhancements and minor bug fixes for client portals.
- Developed web components with custom themes, improving reusability across multiple in-house systems.
- Contributed to UI redesign efforts, ensuring alignment with user-centric design principles and improving engagement metrics.
- Built interactive prototypes from mockups using early-stage Figma tools and validated layouts through usability testing.
- Implemented data tables and dynamic filtering interfaces using native JS, reducing query interaction time by 30%.
- Participated in weekly dev reviews and testing cycles, gaining practical experience in Agile workflows.
- Gained experience in integrating with backend APIs and resolving CORS and authentication issues during early development.
- Documented code contributions and assisted in maintaining the team's internal knowledge base.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ Certified React Developer – Meta (Coursera)
 - ❖ Responsive Web Design Certification – freeCodeCamp
 - ❖ Docker Essentials – IBM Skills Network
 - ❖ Git and GitHub for Developers – Udacity
-

PROJECTS

- ✓ **AI-Powered Crisis Response UI** – Developed frontend interfaces for an H2020-funded emergency response system visualizing sensor data, heatmaps, and alerts, supporting security and rescue operations.
- ✓ **Next.js Analytics Dashboard** – Architected and developed a SSR dashboard for monitoring COVID-19 trends, using Tailwind, Chart.js, Zustand, and responsive UX principles.
- ✓ **Healthcare Insights Portal** – Led frontend of a data-driven application for hospitals to track real-time capacity and patient outcomes, integrating GraphQL and Material UI with strict compliance on performance and security.
- ✓ **UX Component Library** – Designed and maintained a modular design system with React, Storybook, and CSS Modules used across 4+ research projects, ensuring consistency and reusability.
