

# CRISTOFF STAN

## Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com  
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

## PROFESSIONAL SUMMARY

Detail-oriented and performance-driven full-stack engineer with 8+ years of professional experience building high-impact web and mobile applications. Specialized in Vue.js, JavaScript/TypeScript, and Progressive Web App (PWA) development with robust knowledge of CI/CD pipelines using Azure DevOps. Proficient in integrating RESTful APIs, optimizing frontend performance, and publishing cross-platform mobile apps. Proven ability to deliver scalable digital experiences for diverse markets, contributing to sustainable and zero-emission initiatives.

## TECHNICAL SKILLS

- Frontend: Vue.js, Quasar, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind, Webpack, Babel, PWA
- Backend: Node.js, C# .NET Core, Azure Function Apps, REST API, GraphQL
- Mobile: PWA, Service Workers, App Store Deployment (iOS & Android)
- Testing: Jest, Cypress, Mocha, Chai
- CI/CD & DevOps: Azure DevOps, GitHub Actions, Git, Docker, Kubernetes
- Databases: Cosmos DB, PostgreSQL, Firebase, MongoDB
- Tools: VS Code, Postman, Figma, NPM, Yarn, GitKraken

## WORK EXPERIENCE

### Senior Software Engineer

#### Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led frontend development of enterprise-level PWA solutions using Vue.js, focusing on mobile-first design, performance optimization, and offline-first capabilities.
- Implemented robust CI/CD pipelines in Azure, streamlining deployment workflows and reducing production bugs by 30% through continuous automated testing using Jest and Cypress.
- Built reusable Quasar-based component libraries for use across internal and client-facing platforms, ensuring UI consistency and reducing delivery time by 40%.
- Engineered and deployed full-stack applications integrated with Azure Functions, Cosmos DB, and REST APIs to serve scalable and resilient user data workflows.
- Developed cross-browser compatible features, tested on multiple devices, and ensured seamless user experiences regardless of screen resolution or platform.

- Coordinated mobile publishing procedures for PWA and native wrappers using Capacitor, enabling app store readiness and expanding user base via Android/iOS releases.
- Participated in agile ceremonies and collaborated with stakeholders across multiple time zones, enhancing team productivity and global coordination.
- Integrated telemetry and performance monitoring tools to continuously evaluate frontend KPIs and initiate refinements based on real-time analytics.

## **Software Engineer**

### **Syscom Digital**

**October 2019 – August 2021**

Bucharest, Romania (Remote)

- Developed Vue.js-based mobile-responsive web apps for digital campaigns, optimized for high traffic and concurrency with efficient use of service workers and caching strategies.
- Built robust form builders and interactive UI components using TypeScript, enabling dynamic content generation and high configurability for marketing clients.
- Consumed REST APIs and worked with JSON/XML payloads to sync real-time promotional data across multiple client-side applications.
- Maintained mobile compatibility and implemented accessibility guidelines for all UIs, ensuring legal and usability compliance across international clients.
- Set up Jest and Cypress test suites that achieved 90% code coverage, enabling safer refactors and increasing overall system reliability.
- Contributed to web manifest configuration and push notification integration to improve PWA installability and user retention metrics.
- Participated in cross-functional reviews to align API contract designs and data expectations between frontend and backend teams.
- Designed modular state management architecture for client dashboards, improving data consistency and loading time across real-time reports.

## **Software Developer**

### **Soft Build**

**June 2016 – July 2019**

Timișoara, Romania (Remote)

- Built and maintained interactive mobile dashboards and analytics tools using Vue.js and BootstrapVue for industrial IoT applications.
- Designed progressive enhancements to ensure support for legacy browsers while leveraging modern features for improved performance and UX.
- Engineered server-side integrations using .NET Core Web APIs, including custom middleware for authentication, logging, and exception handling.
- Collaborated on data pipelines connecting frontend dashboards to Azure Cosmos DB and PostgreSQL, ensuring high performance for analytics queries.
- Authored comprehensive documentation for frontend architecture and deployment strategy, accelerating onboarding for junior developers.
- Participated in PWA pilot deployments across internal enterprise tools, delivering high engagement rates and reduced bounce.
- Handled complete CI pipeline setup with Git, Docker, and Azure DevOps, ensuring rapid and reliable delivery from feature branch to production.
- Tuned Webpack and Babel configurations to minimize bundle sizes, optimizing load speed for mobile devices on limited bandwidth.

## **Software Developer**

### **Decima Digital**

**November 2015 – April 2016**

Tallinn, Estonia

- Created mobile-first web components using Vue.js and vanilla JavaScript for e-commerce solutions targeting SME clients.
- Developed and tested REST API integrations, building robust interfaces for payment and shipping provider connectivity.
- Deployed custom service worker configurations to enable offline browsing and caching for product catalog pages.
- Customized UI themes to reflect client branding, integrating Tailwind and scoped CSS for component encapsulation.
- Initiated CI scripts for auto-deployment to staging servers via Git hooks, reducing manual interventions and streamlining QA cycles.
- Reviewed UX designs and translated Figma specs into functional interactive components with pixel-perfect precision.
- Diagnosed cross-browser compatibility issues and implemented polyfills where necessary for broader platform support.
- Created proof-of-concept mobile app wrappers using Cordova to evaluate hybrid deployment for several clients.

## **Software Developer Intern**

### **Borna Technology**

**September 2014 – August 2015**

Tallinn, Estonia (On-Site)

- Built internal dashboard tools and form systems using HTML5, JavaScript, and jQuery during early phase Vue experimentation.
- Worked closely with senior developers to integrate XML-driven data feeds into JSON APIs, creating bridges between legacy and modern stacks.
- Learned principles of REST API design and implemented basic test coverage using Jasmine and Karma.
- Took part in UI/UX testing of mobile versions, proposing adjustments that improved responsiveness across devices.
- Assisted in configuring build pipelines using early Webpack and Grunt, understanding module bundling and task runners.
- Participated in team code reviews and gained hands-on experience in Git version control workflows.
- Delivered weekly update demos to product owners, enhancing communication and feature validation practices.
- Conducted QA checks and logged bugs, ensuring release stability in tight development cycles.

---

## **EDUCATION**

### **Tallinn University**

Bachelor's Degree in Computer Science,

**2010 – 2014**

---

## **CERTIFICATIONS**

- ❖ Azure DevOps Engineer – Microsoft (2023)
- ❖ Certified Vue.js Developer – Vue Mastery (2022)

- ❖ Mobile Web Specialist – Google Developers (2021)
  - ❖ Progressive Web App Fundamentals – Udacity (2021)
- 

## PROJECTS

- ✓ **Smoov App PWA Optimization** – Led frontend initiative to transform legacy mobile views into a performant PWA with service workers, manifest integration, and app store compatibility.
- ✓ **EV Dashboard Analytics** – Designed and deployed full-stack telemetry system using Vue.js, Azure Functions, and Cosmos DB for real-time EV charger monitoring and reporting.
- ✓ **CI/CD Pipeline Automation** – Implemented multi-stage Azure DevOps pipelines with integrated Cypress testing and PWA build optimization for automated releases.
