PROFESSIONAL SUMMARY

Seasoned React Developer with 9+ years of hands-on experience delivering web applications using React, JavaScript (ES6+), Redux, RESTful APIs, SCSS, and modern frontend stacks. Adept in creating scalable, high-performance UIs with responsive design principles, and passionate about clean code, component reusability, and performance optimization. Proficient in Tailwind CSS, AWS, GCP, SQL, NoSQL databases, and agile collaboration across remote international teams. Successfully delivered B2B and consumer-facing solutions with consistent focus on quality, accessibility, and maintainability.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, JavaScript (ES6+), TypeScript, Redux, React Context, Tailwind CSS, SCSS, HTML5, CSS3, Responsive Design, Webpack, Vite
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, Firebase, Fastify
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB
- **Cloud & DevOps:** AWS (S3, Lambda, CloudFront), Google Cloud Platform, Docker, GitHub Actions
- **Testing & Tools:** Jest, React Testing Library, Cypress, Git, Jira, Figma
- **Soft Skills:** Agile, Communication, Mentoring, Problem Solving, Remote Collaboration

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Built and maintained complex single-page applications using React, Redux, and SCSS, driving forward modular architecture for multi-tenant SaaS platforms.
- Refactored legacy React class components to functional components using hooks, significantly improving readability, scalability, and performance.
- Integrated multiple RESTful APIs with custom hooks and axios wrappers, achieving over 30% performance gain via parallelized requests and local caching.
- Developed reusable Tailwind CSS components from scratch, increasing styling consistency and development speed across cross-functional teams.
- Designed and implemented role-based access control (RBAC) on the frontend, aligning with the backend's JWT-based authentication for enterprise security compliance.

- Conducted regular code reviews and mentored junior developers on React best practices, TypeScript, Git workflows, and accessibility standards.
- Collaborated with product and QA teams to improve sprint delivery by 25%, using continuous feedback and user session analytics.
- Deployed web apps via AWS Amplify and configured CI/CD with GitHub Actions and automated unit testing using Jest and React Testing Library.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Delivered interactive UIs for marketing automation dashboards, utilizing React, Context API, and custom-built form engines using dynamic schemas.
- Streamlined frontend performance by implementing code-splitting, lazy loading, and React Suspense, reducing first meaningful paint by 2 seconds.
- Implemented mobile-first design using SCSS and BEM methodology, later migrating core styling components to Tailwind CSS to speed up prototyping.
- Developed reusable data-fetching patterns using SWR and Axios, ensuring efficient error handling and retry mechanisms for flaky endpoints.
- Integrated third-party APIs (Facebook Graph, Google Analytics, Firebase) to enhance tracking, engagement insights, and A/B testing functionality.
- Worked with PostgreSQL and Firebase Realtime DB for dynamic data rendering, ensuring state sync across frontend widgets in real time.
- Introduced component-level testing with React Testing Library, improving test coverage from 40% to 85% over 3 quarters.
- Participated in Agile ceremonies, collaborating with designers and stakeholders to ship frequent updates with visual QA via Figma previews.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed custom dashboards and CRM interfaces using React, Redux, and Bootstrap, serving real estate and logistics clients across Europe.
- Built internal component libraries and documentation using Storybook and React DocGen to streamline future development and design handoff.
- Migrated monolithic jQuery-based applications to modular React apps, resulting in fewer bugs and faster loading times.
- Built dynamic map interfaces using Leaflet.js and Mapbox APIs, visualizing route optimization and delivery statuses in real time.
- Integrated with backend REST APIs developed in Node.js and Fastify, improving data throughput and reducing response time by 40%.
- Implemented GCP Firestore and Realtime Database to support chat systems and notifications within enterprise admin portals.
- Created Docker-based local environments for frontend testing and sharing across QA and design teams, improving feedback loops.
- Worked closely with clients in the UK and Germany, ensuring all deliverables aligned with business KPIs and accessibility standards.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed React-powered ecommerce widgets embedded into Shopify and WooCommerce platforms, tailored for cosmetics and apparel brands.
- Integrated product filtering, carousel components, and multi-language support using React Context and external JSON locales.
- Implemented frontend analytics and event tracking with Mixpanel and Segment to analyze and improve funnel performance.
- Contributed to backend API integrations, interacting with MongoDB and Express-based services for cart and checkout logic.
- Enhanced accessibility (WCAG 2.1 AA) and keyboard navigation for all ecommerce widgets to meet EU digital compliance standards.
- Used GitFlow for version control and collaborated in Jira-based sprints to deliver weekly deployments with pixel-perfect QA sign-off.
- Coordinated with external UI/UX teams to translate high-fidelity Figma and Sketch designs into responsive React interfaces.
- Deployed solutions to AWS S3 with CloudFront CDN for optimal performance in European and Middle Eastern markets.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported development of internal dashboards and data visualization tools using vanilla JavaScript and gradually integrated React.
- Built and maintained reusable SCSS components while working closely with UI designers on layout adjustments and brand guidelines.
- Learned and applied Redux patterns for the first time to manage form states across multi-step user onboarding flows.
- Developed analytics dashboards displaying real-time metrics pulled via RESTful APIs and visualized with Chart.js and D3.
- Managed feature flags and experimentation toggles to enable phased rollouts across different user groups.
- Designed MongoDB schema and helped seed test data for simulated usage scenarios during integration tests.
- Contributed to documentation and internal wiki pages to onboard new developers and interns with consistent dev environment setup.
- Participated in daily standups and biweekly retrospectives, contributing feedback on frontend bottlenecks and user testing insights.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services
 - Advanced React – Meta / Coursera
 - JavaScript Algorithms and Data Structures – freeCodeCamp
 - Modern React with Redux – Udemy
 - Google Cloud Fundamentals – GCP Essentials
-

PROJECTS

Real Estate CMS Platform

- Developed a customizable CMS for property listings using React, Redux, Tailwind CSS, and PostgreSQL. Integrated with third-party map APIs and deployed on AWS Amplify.

Internal UI Library

- Built a scalable, shared component library in React with Storybook, published via private NPM for company-wide reuse. Includes styling support for SCSS and Tailwind themes.

Marketing Dashboard

- Created a real-time dashboard that visualized campaign analytics. Pulled data from Firebase and REST APIs, processed via React hooks, and exported reports to CSV/PDF.
