

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience delivering scalable, secure, and high-performing applications across full-stack development. Proven expertise in **MongoDB, Node.js, Angular, and Azure**, combined with strong knowledge of **AWS, GCP, SQL, and NoSQL**. Adept at **system architecture, API design, cloud deployment, and infrastructure management**, with a strong record of mentoring teams, improving code quality, and aligning technical execution with business impact. Passionate about leveraging technology for global good and building resilient solutions that drive humanitarian and development initiatives.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js, REST APIs, GraphQL APIs, Middleware, Error Handling
- **Frontend:** Angular (v15+), Angular Material, Kendo UI, Nx Monorepos, Responsive UI Development
- **Databases:** MongoDB (v8+, Atlas, Triggers, Aggregations, Cluster Admin), PostgreSQL, MySQL, SQL Server, DynamoDB, Redis
- **Cloud & DevOps:** Microsoft Azure (Functions, App Service, Front Door, ARM Templates, Azure DevOps), AWS (Lambda, S3, CloudFormation, ECS), GCP (Cloud Run, Firestore, Pub/Sub), GitHub Actions, CI/CD, Docker, Kubernetes, Terraform
- **Infrastructure:** Ubuntu Server, Linux Hardening, Nginx Configurations, Performance Tuning, System Monitoring
- **Security & Identity:** Keycloak (SSO, OAuth2, OpenID Connect), RBAC, JWT, Authentication & Authorization
- **Other Tools:** SurveyJS, Jest, Cypress, Jira, Git, Agile & Scrum methodologies

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Designed and optimized **modular system architectures** leveraging **Node.js, MongoDB Atlas, and Angular Nx monorepos**, ensuring applications met high scalability and reliability standards.
- Implemented and improved **REST and GraphQL APIs** with structured middleware, enhancing system interoperability and reducing integration issues by over 30%.
- Led **Azure cloud deployments** across multiple services (Functions, App Service, Front Door), building automated pipelines with **Azure DevOps and GitHub Actions** to cut release times in half.
- Conducted **MongoDB cluster administration, replication, and performance tuning**, handling millions of records while maintaining high availability and security.

- Guided the **adoption of security best practices** including Keycloak SSO integration, OAuth2 flows, and database encryption policies, strengthening compliance and resilience.
- Partnered with product owners to translate user requirements into technical roadmaps, balancing feature delivery with long-term maintainability.
- Mentored junior engineers via code reviews, pair programming, and technical sessions, fostering a culture of clean code and shared ownership.
- Developed **custom data visualization dashboards** for NGOs and enterprise clients, enabling faster decision-making in humanitarian and development projects.

Syscom Digital

Software Engineer

October 2019 – August 2021

Bucharest, Romania

- Engineered **data-driven web platforms** using Angular and Node.js, integrated with **Azure and AWS cloud services**, ensuring seamless performance at scale.
- Designed robust **SQL and NoSQL database schemas** (PostgreSQL, MongoDB) with optimized queries and indexing strategies, boosting data retrieval performance by 40%.
- Automated deployments with **CI/CD pipelines (Azure DevOps, Docker, Kubernetes)**, reducing downtime and improving consistency of releases.
- Built **survey and dynamic form solutions with SurveyJS**, used for humanitarian data collection and reporting across distributed teams.
- Enhanced platform **security and identity management** by integrating Keycloak for single sign-on, achieving unified access control across multi-tenant systems.
- Conducted **load and penetration testing** to ensure resilience against high-traffic spikes and malicious attacks.
- Created **monitoring solutions** with Prometheus, Grafana, and Azure logs to ensure proactive detection of performance bottlenecks.
- Collaborated cross-functionally with product, UX, and QA teams to deliver reliable, user-centric solutions under strict deadlines.

Soft Build

Software Developer

June 2016 – July 2019

Timișoara, Romania

- Delivered **scalable backend systems** in Node.js and .NET, integrated with Angular-based UIs to support mission-critical enterprise applications.
- Implemented **cloud-native applications** deployed on **AWS and Azure**, leveraging containerization and Infrastructure as Code for faster scaling.
- Managed **MongoDB Atlas clusters** with replication and failover strategies, ensuring uninterrupted operations in production environments.
- Integrated **GraphQL APIs** to unify disparate data sources, reducing complexity for frontend teams and cutting integration effort by 25%.
- Optimized **Linux servers and Nginx configurations**, implementing caching strategies to enhance application response times.
- Designed **multi-language support features** (English, French, Spanish) for platforms targeting global humanitarian organizations.
- Partnered with data teams to create **ETL pipelines** for structured and unstructured data, enabling advanced analytics for clients.
- Acted as a **bridge between product owners and engineers**, ensuring requirements were implemented with both user needs and technical scalability in mind.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Contributed to **Angular and Node.js development** for digital commerce platforms, emphasizing modular design and clean architecture.
- Enhanced **database performance** across SQL and NoSQL solutions through query optimization, schema redesign, and caching.
- Implemented **RESTful APIs** and middleware services that improved integration between frontend and backend modules.
- Configured **CI/CD pipelines with Docker and Jenkins**, streamlining development workflows and improving team efficiency.
- Secured applications by implementing **OAuth2 and JWT-based authentication flows**, aligned with enterprise security guidelines.
- Collaborated with UX designers to implement responsive interfaces compatible with multi-device usage.
- Participated in agile sprints, contributing to backlog refinement and sprint planning with a focus on long-term maintainability.
- Documented technical solutions and best practices to ensure system knowledge transfer within the team.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Supported full-stack development with **AngularJS and Node.js**, gaining hands-on experience in frontend and backend collaboration.
- Assisted in **database administration tasks** for MySQL and MongoDB, including backups, replication, and query tuning.
- Developed **basic API services** and assisted with integration into enterprise systems.
- Learned **Azure cloud service deployment** practices, supporting test and staging environments.
- Wrote **test scripts and documentation** to support QA teams in regression and functional testing.
- Participated in **team code reviews** to understand best practices for maintainability and security.
- Implemented **Linux server updates and configurations**, learning fundamentals of system administration.
- Gained foundational exposure to **DevOps workflows** with Git, CI/CD, and agile development methodologies.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert

- AWS Certified Solutions Architect – Associate
 - Google Cloud Professional Cloud Architect
 - MongoDB Certified Developer Associate
 - Certified Kubernetes Administrator (CKA)
-

PROJECTS

- **Humanitarian Data Platform (Oort-like prototype):** Designed a modular system for NGOs to build and deploy custom apps for crisis response, leveraging Angular, Node.js, and MongoDB Atlas.
- **Survey-Driven Insights Tool:** Built dynamic form solutions with SurveyJS integrated into Angular frontends, enabling real-time data collection for international health organizations.
- **Cross-Cloud Migration Project:** Migrated legacy systems to a hybrid environment across **Azure, AWS, and GCP**, reducing hosting costs by 25% while improving redundancy.
- **Multi-Lingual Aid Management System:** Implemented a system with **English, French, and Spanish support**, allowing NGOs to manage global operations seamlessly.
