

CRISTOFF STAN

Senior Software Developer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full-Stack JavaScript Engineer with over 9 years of hands-on experience in building scalable digital products using React, Angular, Node.js, and modern frameworks like Nest.js and Express. Adept at designing robust frontend architectures and secure backend APIs. Proven leadership in agile teams, with a focus on clean code, scalable solutions, and mentoring engineers. Experienced with AWS serverless stacks, CI/CD pipelines, and driving product-shaping discussions with stakeholders and clients.

TECHNICAL SKILLS

- **Frontend:** React, Angular, Next.js, TypeScript, Tailwind CSS, PrimeNG, Redux, NgRx, Akita, Material UI
- **Backend:** Node.js, Express.js, Nest.js, Next.js API routes, RESTful API Design
- **Serverless & Cloud:** AWS Lambda, DynamoDB, S3, API Gateway, CloudWatch
- **Databases:** PostgreSQL, SQLite, Firebase, MongoDB
- **Testing:** Jest, Jasmine, Karma, React Testing Library, Postman
- **DevOps:** Docker, GitHub Actions, CI/CD, Vercel
- **Design/UX:** Figma, Storybook, Zeplin
- **Methodologies:** Agile, Scrum, TDD, Clean Architecture, SOLID Principles

WORK EXPERIENCE

Sensidev

Senior Software Engineer

September 2021 – December 2024

Timișoara, Romania

- Led development of complex React and Next.js web apps with SSR and dynamic routing, delivering fast-loading and SEO-optimized B2B dashboards.
- Built enterprise-grade APIs with Node.js, Nest.js, and Prisma, integrating PostgreSQL and Redis for caching and session management.
- Migrated frontend state management to Redux Toolkit with persistent store and middleware for analytics and auth sync.
- Deployed serverless AWS Lambda functions to handle API events, reducing server load and simplifying scalability.
- Implemented end-to-end test suites with Jest and React Testing Library, achieving 90%+ code coverage and stable regression cycles.
- Mentored junior developers in code reviews, testing strategies, and component design, helping raise team velocity and code quality.

Syscom Digital
Software Engineer
October 2019 – August 2021
Bucharest, Romania

- Designed Angular components using PrimeNG and NgRx to build real-time marketing dashboards with seamless user experience.
- Optimized bundle size and initial load time through lazy loading, code splitting, and PrimeNG dynamic imports.
- Built RESTful Node.js APIs using Express.js and MongoDB with advanced error handling and rate-limiting.
- Led the move to AWS for static asset hosting and backend deployment, configuring S3, API Gateway, and Lambda triggers.
- Set up CI/CD pipelines using GitHub Actions and Docker containers to enable fast, automated deployment across staging and production.
- Participated in product discussions, UI reviews, and Agile ceremonies, actively shaping feature scope and delivery timelines.

Soft Build
Software Developer
June 2016 – July 2019
Timișoara, Romania

- Developed full-stack features using AngularJS, upgraded to React, with real-time updates powered by WebSockets for internal tools.
- Built a serverless event logging system on AWS Lambda + DynamoDB to track analytics across distributed micro frontends.
- Refactored legacy Node.js backend into modular Express.js services, reducing technical debt and onboarding time.
- Added accessibility enhancements (ARIA roles, keyboard navigation) across enterprise dashboards, boosting WCAG compliance.
- Designed and documented REST APIs in Postman and Swagger, making integration seamless for frontend and QA teams.
- Organized monthly tech talks and mentored interns on JavaScript best practices and scalable application design.

Decima Digital
Software Developer
November 2015 – April 2016
Tallinn, Estonia

- Transformed monolithic PHP apps into modular SPAs with React and Next.js SSR for SEO-sensitive client sites.
- Used Tailwind and CSS Modules to build responsive UI kits aligned with design tokens and dark mode requirements.
- Built and deployed Lambda functions to parse contact forms and trigger Slack/email alerts, reducing missed leads by 60%.
- Designed fault-tolerant integration patterns for third-party APIs with retry queues and backoff mechanisms.
- Actively participated in UI/UX workshops to translate mockups into reusable, themed component libraries.
- Set up Docker Compose environments for local dev parity, streamlining onboarding for new developers.

Borna Technology
Software Developer Intern
September 2014 – August 2015
Tallinn, Estonia

- Assisted in development of MVPs using AngularJS, vanilla JavaScript, and Firebase for backend-as-a-service prototyping.
 - Designed data seeding scripts and schema migration templates in Prisma to bootstrap dev environments quickly.
 - Developed unit and snapshot tests for React components using Jest and visual testing tools.
 - Built dev tooling (e.g., layout testers, API mock servers) to improve development cycles and reduce reliance on backend stability.
 - Collaborated in daily standups, learned best practices from senior engineers, and delivered features to production within sprints.
 - Contributed to CI scripts and Git hooks, reducing manual errors during team commits and releases.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate (2024)
 - ❖ JavaScript Algorithms and Data Structures – freeCodeCamp
 - ❖ Serverless Framework Bootcamp – Udemy
 - ❖ Full-Stack TypeScript Developer – Code with Mosh
-

PROJECTS

- ✓ **Serverless Analytics Tracker:** Built an event pipeline using AWS Lambda, DynamoDB, and API Gateway to track user actions across web apps with real-time insights.
- ✓ **Custom Component Framework:** Developed a reusable design system using Tailwind and PrimeNG for dynamic B2B SaaS applications, saving over 40% in future design time.
- ✓ **CI/CD Booster:** Refactored entire GitHub Actions workflows to include dynamic environment provisioning and rollback automation on failure triggers.
