

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Seasoned Senior Developer with 8+ years of experience in full-stack engineering, delivering scalable fintech and enterprise solutions. Proven track record in designing robust system architectures, optimizing performance, and leading cross-functional collaboration. Seeking to contribute technical expertise and problem-solving acumen to build high-impact, innovative products in the financial services domain.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Node.js, Python, PHP, SQL, GraphQL
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3
- **Backend:** Express.js, NestJS, Laravel, Django
- **DevOps:** Docker, GitHub Actions, Jenkins, CI/CD, Nginx
- **Cloud:** AWS (EC2, Lambda, S3), Azure, Firebase
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Architecture:** RESTful APIs, Microservices, MVC, Serverless
- **Tools:** Webpack, Babel, Jira, Postman, Swagger, Figma
- **Testing:** Jest, Mocha, Cypress, TDD
- **Methodologies:** Agile, Scrum, Continuous Deployment

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Architected and led end-to-end development of multi-tenant fintech platforms supporting complex asset management workflows and real-time transaction processing.
- Built RESTful and GraphQL APIs from the ground up with NestJS and TypeORM, enabling integration with external financial data providers and third-party KYC services.
- Spearheaded client-side architecture using React.js and Next.js, optimizing rendering performance for institutional investors and portfolio managers.
- Introduced CI/CD automation with GitHub Actions, reducing deployment friction and ensuring consistent delivery across QA and production environments.
- Conducted in-depth load testing and implemented server-side caching strategies using Redis to support scalable investor dashboards under heavy concurrency.

- Collaborated directly with product owners and financial analysts to translate regulatory requirements into system logic and validation flows.
- Led initiative to migrate from monolithic backend to microservices architecture, improving codebase modularity and scalability.
- Mentored junior developers through weekly code reviews and knowledge-sharing sessions on clean code principles and domain-driven design.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Designed and deployed dynamic marketing automation systems for retail banking clients, integrating with SMS, email, and push notification APIs.
- Developed microservices with Express.js and PostgreSQL to handle campaign targeting logic, user segmentation, and analytics reporting.
- Implemented data synchronization pipelines between PostgreSQL and MongoDB, improving querying speed for analytics dashboards by 40%.
- Built admin portal using React.js with custom form builders and access controls for campaign management teams.
- Integrated SSO and OAuth2 with enterprise identity providers for secure multi-client access.
- Tuned long-running queries and optimized indexes across key financial reporting tables to reduce API latency by 70%.
- Introduced Swagger-based API documentation and testing strategy, ensuring easier handoff to QA and external partners.
- Contributed to design workshops and usability studies, incorporating feedback into product iterations for better client adoption.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed accounting and payroll modules for small business ERP software, ensuring compliance with evolving tax regulations.
- Designed modular backend services in Laravel, later integrating with frontend dashboards via REST APIs.
- Enhanced frontend with Vue.js components for invoice creation, expense tracking, and payroll reports.
- Worked closely with accountants and business analysts to understand edge cases in VAT processing and salary taxation.
- Built automated data import/export features using Excel/CSV converters with validation layers.
- Implemented real-time alerts and notifications using WebSocket-based pub/sub architecture.
- Developed internal testing suite with PHPUnit and Cypress to enforce regression checks during frequent patch updates.
- Introduced role-based access control system with audit logging for compliance and transparency.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Contributed to early-stage development of a custom CRM system designed for cross-border legal consultancy firms.
- Developed modular backend features in PHP and MySQL including case tracking, billing history, and document management.
- Built JavaScript-based form validation and asynchronous file uploads to improve case data entry workflows.
- Integrated Google Drive and Dropbox APIs for client file storage and retrieval directly within the CRM.
- Implemented task reminder system with cron jobs and in-app push alerts to assist with SLA compliance.
- Created detailed unit tests for database models and middleware, helping the team increase test coverage by 50%.
- Performed code refactoring to reduce redundancy and improve maintainability across multiple repositories.
- Participated in daily scrum and sprint reviews as part of Agile delivery pipeline.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Supported senior developers in building e-commerce storefronts using PHP, HTML, and jQuery.
- Designed mobile-first UI components and optimized image rendering for product galleries.
- Built product catalog filter system using AJAX to enable real-time updates without page reload.
- Wrote SQL queries and performed normalization for MySQL product and user schema design.
- Integrated Stripe and PayPal APIs for checkout workflows, assisting in QA validation and sandbox testing.
- Assisted in backend data cleaning scripts to migrate old customer records to new format.
- Created internal documentation on common utility functions and shared components.
- Gained foundational understanding of web application security practices, including input validation and rate limiting.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate
- ❖ Certified JavaScript Developer (CIW)
- ❖ Scrum Foundation Professional Certificate (SFPC)

PROJECTS

✓ **FinOptima Asset Hub**

Built a full-stack financial asset aggregation platform allowing investors to analyze, filter, and track their holdings across banks, brokerages, and custodians. Integrated Plaid and custom APIs for real-time updates. Scaled backend with Node.js microservices and PostgreSQL partitions.

✓ **RealMetrics**

Developed a real estate investment performance dashboard for institutional clients. Leveraged React, D3.js, and AWS Lambda to compute and visualize ROI, rental yield, and depreciation models with hourly refresh rates.
