

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 9+ years of experience building high-performance, scalable web applications. Adept in component-based design using React and TypeScript for front-end and Node.js microservices for back-end. Experienced in SPAs, cloud-native architectures, PostgreSQL, S3, automated testing, CI/CD, and performance optimization. Known for technical leadership, cross-functional collaboration, and delivering impactful B2B SaaS products.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, Node.js, React, HTML5, CSS3, SCSS
- Backend: Express.js, NestJS, RESTful APIs, GraphQL, WebSockets
- Databases & Storage: PostgreSQL, MongoDB, MySQL, Amazon S3
- Cloud & DevOps: AWS (Lambda, S3, EC2), Azure DevOps, Docker, GitHub Actions, CI/CD Pipelines
- Testing: Jest, Mocha, Cypress, Testing Library, TDD
- Architecture: Microservices, Micro-Frontends, Cloud-Native Apps
- Tools: Git, Webpack, Figma, Jira, Confluence, VS Code

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and developed micro front-end architectures in React and TypeScript, powering modular and scalable B2B SaaS platforms for data analytics clients.
- Led the migration from monolith to microservices in Node.js, significantly improving deployment frequency, code maintainability, and cross-team autonomy.
- Created high-performance SPAs with Redux and Context APIs, enabling seamless multi-step user workflows and intuitive dashboards.
- Implemented automated integration tests with Cypress and unit tests using Jest, increasing test coverage to over 95% and reducing regression bugs.
- Integrated REST and GraphQL APIs with secure authentication and real-time update support, enhancing platform interactivity and data consistency.
- Built DevOps pipelines using Docker and GitHub Actions to enable zero-downtime deployments and enforce code quality gates during CI/CD.

- Championed observability practices, implementing logging, metrics, and alerting to reduce average incident response times by 40%.
- Mentored junior developers through pair programming and reviews, fostering a collaborative culture focused on continuous learning.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained customer-facing SPAs in React and Next.js with server-side rendering and dynamic data loading via REST APIs.
- Architected backend services in Node.js and Express with PostgreSQL to support marketing campaign management and analytics.
- Collaborated with product managers and designers in agile sprints, delivering new features end-to-end across UI and backend services.
- Improved web app performance by optimizing bundle sizes, lazy-loading routes, and reducing Time to Interactive (TTI) by 50%.
- Integrated AWS S3 for media asset storage and retrieval, with robust access policies and lifecycle rules for cost optimization.
- Led the implementation of SSO and OAuth 2.0 authentication strategies to secure the platform and improve user management.
- Contributed to team knowledge base and onboarding documentation to streamline ramp-up for new engineers and interns.
- Participated in quarterly hackathons, prototyping analytics dashboards and collaboration features that influenced roadmap priorities.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed and built modular front-end components using React and SASS, aligned with atomic design principles for reusability.
- Built backend services using Node.js, Express, and MongoDB to support real-time notifications and user-generated content.
- Integrated third-party APIs for payment processing, analytics, and social sharing, ensuring resilient fallbacks and error handling.
- Established end-to-end testing pipelines with Selenium and Postman to validate feature rollouts before production deployment.
- Refactored legacy jQuery-based modules into modern React components, reducing code complexity and tech debt.
- Conducted code reviews and provided constructive feedback to enforce quality standards and best practices.
- Led workshops on performance debugging and DevTools usage to upskill team members.
- Automated deployment processes using shell scripts and Git hooks, improving development-to-deployment cycle time.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Built responsive front-end interfaces using HTML5, CSS3, and vanilla JavaScript for e-commerce platforms.
- Contributed to backend logic in PHP and MySQL, ensuring secure user data handling and inventory sync across services.
- Enhanced accessibility and usability by implementing ARIA roles and semantic markup.
- Performed manual and automated testing using Selenium to detect critical UI regressions.
- Collaborated with QA and design teams to ensure cross-browser compatibility and pixel-perfect designs.
- Optimized SQL queries and indexes to improve data retrieval speeds on product and order views.
- Maintained Git-based branching strategy for collaborative development and hotfixes.
- Supported client workshops and demos, providing technical guidance and collecting feedback for iterations.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Contributed to internal tools using JavaScript and Bootstrap to assist with task management and data reporting.
- Created RESTful endpoints in Node.js for task tracking and user authentication with JWT.
- Designed front-end wireframes and translated them into functional layouts using HTML/CSS.
- Participated in sprint planning, bug triage, and retrospectives, learning agile development workflows.
- Wrote test cases and documented API usage to improve onboarding for future interns.
- Built CLI utilities to automate CSV data import/export for team analytics needs.
- Assisted with AWS S3 and EC2 setup for prototype deployment and demos.
- Shadowed senior developers during code reviews and contributed to documentation initiatives.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate
 - ❖ JavaScript Algorithms and Data Structures (freeCodeCamp)
 - ❖ Full-Stack Web Development with React (Coursera / The Hong Kong University of Science and Technology)
 - ❖ Node.js Microservices Certification (Udemy)
-

PROJECTS

- ✓ **CX Insight Dashboard**

Built an analytics dashboard for monitoring user interaction across a digital platform using React, D3.js, and Node.js. Implemented real-time visualizations for clickstream data, heatmaps, and funnel tracking. Integrated RESTful APIs and WebSockets for live updates. Improved customer support metrics by surfacing UX friction points.

- ✓ **CloudSync CMS Migration Tool**

Led development of a Node.js and PostgreSQL-powered tool to migrate CMS content between environments via a visual interface. Deployed with AWS Lambda and S3 integration, supporting JSON and HTML content. Reduced manual migration workload by 70% and enabled reusable migration templates.

- ✓ **Micro Frontend Library Framework**

Developed a pluggable micro front-end library using React and Webpack Module Federation for internal platform. Enabled independent deployment of modules across teams, decreasing inter-team deployment bottlenecks and promoting autonomy.
